1992-1997 : Tune-Up and Repair Manual

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R.

Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem

within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

This unique 110-page blank journal works great for a boat log or notebook to keep track of repairs, trips, fuel burn or anything else that happens aboard your vessel.

Every fascinating stage of the evolution of the stunning new Lotus Evora is explored in this fully comprehensive book, LOTUS EVORA - SUBLIME SUPERCAR. From its conception, through development, prototype testing, certification, production and on to the marketing of the car, every part of this captivating story is covered in depth. Produced with the full co-operation of Lotus Cars, who once again gave Coterie Press exclusive access to their photo archives as well as their employees, this book contains the reminiscences of virtually everyone involved in the concept, design and development of the Evora. Author Johnny Tipler was the only journalist invited to see and drive the Evora before it was launched to the press and public. With unprecedented access and surprising candor, he is able to describe in detail all of the development stages, through to the construction of the first production examples, culminating in the car's press debut in Scotland. His close involvement with Lotus, and their obvious enthusiasm for the Evora project, is reflected by the openness of all involved who tell him the full story behind this stunning new car.
