Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City–based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated

electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one.” –Jonathan Yardley, The Washington Post Book World

'A landmark in the process of decolonizing imperial Western knowledge.' Walter D. Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has

been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, *International Business Review*

Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, *Multinational Enterprises and the Global Economy* is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, *Journal of International Business Studies*

The second edition of *Multinational Enterprises and the Global Economy* provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and

developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese
