In the past decades, lightweight building construction methods and the use of manmade materials in construction and furnishings have become more and more common. The time until structural failure can be expected in a fire has been reduced, and firefighters have seen hotter fires that generate high levels of deadly gasses. But the ventilation methods used by modern firefighters have not kept pace. Positive pressure was first used in the fire service to ventilate a structure after the fire was knocked down. Authors Kriss Garcia and Reinhard Kauffmann have taken positive pressure a step further to

Characterizing Germany as a special locus of literary translation and reception, Fontane contests a prejudice which has since become a significant problem for nineteenth-century German studies, namely the frequent assessment of the epoch as narrowly national. The present collection of essays by thirteen eminent literary scholars and historians is intended to correct this prejudice: it demonstrates that literary life and production in the nineteenth century were governed by complex networks of intercultural exchange, influence and translation, and it does justice to this complexity through its range of

What do prisoner laborers, graduate students, welfare workers, and college athletes have in common? According to sociologist Erin Hatton, they are all part of a growing workforce of coerced laborers. Coerced explores this world of coerced labor through an unexpected and compelling comparison of these four groups of workers, for whom a different definition of "employment" reigns supreme—one where workplace protections do not apply and employers wield expansive punitive power, far beyond the ability to hire and fire. Because such arrangements are common across the economy, Hatton argues that coercion—as well as
