Throughout, Bradsher emphasizes the unpredictability of a correspondent's life and the strains, perils, and privileges of standing witness to momentous world events. In South Asia, Bradsher reported the Dalai Lama's escape from Tibet in 1959 and the last five years that Jawaharlal Nehru led India -- with a side trip to hunt tigers in Nepal with Queen Elizabeth. In Moscow he covered the downfall of Nikita Khrushchev, and he later suffered the KGB bombing of his car in response to his

But after a power shift, they welcomed him as the first American journalist allowed to work in China in over a year. Bradsher predicted and reported Bangladesh's independence struggle, and he worked in the Middle East, covering Egyptian-Israeli peace arrangements. Access to the events that shaped the Cold War also led to Bradsher's meeting many world leaders, including Nehru, Khrushchev,

A personal journey through some of the darkest moments of the cold war and the early days of television news Marvin Kalb, the award-winning journalist who has written extensively about the world he reported on during his long career, now turns his eye on the young man who became that journalist. Chosen by legendary broadcaster Edward R. Kalb captures the excitement of being present at the creation of a whole new way of bringing

Kalb is at the center, occupying a unique spot as a student of Russia tasked with explaining Moscow to Washington and the American public. He joins a cast of legendary figures along the way, from Murrow himself to Eric Severeid, Howard K. Smith, Richard Hottelet, Charles Kuralt, and Daniel Schorr among many others. He finds himself assigned as Moscow correspondent of CBS News just as the U2 incident—the downing of a US spy plane over Russian territory—is unfolding. As readers

World? This question, which reverberates through American foreign policy, is at the heart of Adventures in Chaos. A faltering friendly state, in danger of falling to hostile forces, presents the U.S. with three options: withdraw, bolster the existing government, or try to reform it. Douglas Macdonald defines the circumstances that call these policy options into play, combining an analysis of domestic politics in the U. S., cognitive theories of decision making, and theories of power relations drawn from sociology, economics, and political science. He examines the conditions that promote the

reformist option and then explores strategies for improving the success of reformist intervention in the future. In order to identify problems in this policy--and to propose solutions--Macdonald focuses on three case studies of reformist intervention in Asia: China, 1946-1948; the Philippines, 1950-1953; and Vietnam, 1961-1963. Striking similarities in these cases suggest that such policy dilemmas are a function of the global role played by the U.S., especially during the Cold War. Though this role is changing, Macdonald foresees future applications for the lessons his study offers. A challenge to

Well-crafted text and engaging sources introduce readers to the key players, including Castro, Khrushchev, and Kennedy and examine the intricacies of the crisis including proxy wars, communication systems, and the outcome.

Horror films provide a guide to many of the sociological fears of the Cold War era. In an age when warning audiences of impending death was the order of the day for popular nonfiction, horror films provided an area where this fear could be lived out to its ghastly conclusion. Because enemies and potential situations of fear lurked everywhere, within the home, the government, the family, and the very self, horror films could speak to the invasive fears of the cold
