In Bird Songs, ornithologist Les Beletsky profiles 250 birds alongside colorful illustrations, and includes a digital audio player that provides the corresponding song for each of the 250 birds. Drawing from the collection of the world-renowned Macaulay Library at the Cornell Lab of Ornithology, *Bird Songs* presents the most notable North American birds—including the rediscovered ivory-billed woodpecker—in a stunning format. Renowned ornithologist Les Beletsky provides a succinct description of each of the 250 birds profiled, with an emphasis on their distinctive songs. Lavish full-color illustrations accompany each account, while a sleek, built-in digital audio player holds 250 corresponding songs and calls. In his foreword, North American bird expert and distinguished natural historian Jon L. Dunn shares insights gained from a lifetime of passionate study. Complete with the most up-to-date and scientifically accurate information, *Bird Songs* is the first book to capture the enchantment of these beautiful birds in words, pictures, and song.

Multiple award-winner Loren D. Estleman has produced a major biographical novel on the infamous Mobster known as Scarface, rigorously researched and deftly nuanced to offer an intimate portrait of the gangster whose terrible crimes and larger-than-life persona have both fascinated and appalled the world for nearly a century; whose legacy is still widely debated; and whose brutally ambitious career in the Mafia continues to inspire filmmakers and writers to plumb its excesses and its contradictions. In 1944, after Al Capone has been released from prison, J. Edgar Hoover assigns an FBI junior agent to insinuate himself into Capone's life and gain his trust so that Hoover can nail as many of Capone's Mob confederates as possible. Capone, suffering from the neurological effects of syphilis, is alternately lucid, full of the passion and energy that fueled his rise to the pinnacle of American crime...and rambling or ranting, the broken shell of a man released from prison so he could die at home with his family. With the superb narrative gifts honed in dozens of novels, Estleman has captured the essence of this American icon as never before. With subtly nuanced portrayals of those in Capone's circle—his underrated wife Mae Capone, members of the Chicago Outfit including the deadly Frank Nitti—as well as his nemesis, J. Edgar Hoover, Hoover's secretary Helen Gandy and others, The Confessions of Al Capone is a major literary achievement. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

An acclaimed natural history writer follows the trail of the remarkable hummingbird all over the world. Hummingbirds are a glittering, sparkling collective of over three hundred wildly variable species. For centuries, they have been revered by indigenous Americans, coveted by European collectors, and admired worldwide for their unsurpassed metallic plumage and immense character. Yet they exist on a knife-edge, fighting for survival in boreal woodlands, dripping cloud forests, and subpolar islands. They are, perhaps, the ultimate embodiment of evolution's power to carve a niche for a delicate creature in even the harshest of places. Traveling the full length of the hummingbirds' range, from the cusp of the Arctic Circle to near-Antarctic islands, acclaimed nature writer Jon Dunn encounters birders, scientists, and storytellers in his quest to find these beguiling creatures, immersing us in the world of one of Earth's most charismatic bird families. When a mysterious man claims to be her long-missing brother, a woman must confront her family's closely guarded secrets in this "delicious hybrid of mystery, drama, and elegance" (Lodi Piccoliti, #1 New York Times bestselling author). Washington, DC, 2019: Laura Preston is a reclusive artist at odds with her older sister Beatrice as their elegant, formidable mother slowly slides into dementia. When a stranger contacts Laura claiming to be her brother who disappeared forty years earlier when the family lived in Bangkok, Laura ignores Bea's warnings of a scam and flies to Thailand to see if it can be true. But meeting him in person leads to more questions than answers. Bangkok, 1972: Genevieve and Robert Preston live in a beautiful house behind a high wall, raising their three children with the help of a cadre of servants. In these exotic surroundings, Genevieve strives to create a semblance of the life they would have had at home in the US--ballet and riding classes for the children, impeccable dinner parties, a meticulously kept home. But in truth, Robert works for American intelligence, Genevieve finds herself drawn into a passionate affair with her husband's boss, and their serene household is vulnerable to unseen dangers in a rapidly changing world and a country they don't really understand. Alternating between past and present as all of the secrets are revealed, What Could Be Saved is an unforgettable novel about a family broken by loss and betrayal, and "a richly imagined page-turner that delivers twists alongside thought-provoking commentary" (Kirkus Reviews).

From the New York Times–bestselling author of Where Good Ideas Come From and Extra Life, a new look at the power and legacy of great ideas. In this illustrated history, Steven Johnson explores the history of innovation over centuries, tracing facets of modern life (refrigeration, clocks, and eyeglass lenses, to name a few) from their creation by hobbyists, amateurs, and entrepreneurs to their unintended historical consequences. Filled with surprising stories of accidental genius and brilliant mistakes—from the French publisher who invented the phonograph before Edison but forgot to include playback, to the Hollywood movie star who helped invent the technology behind Wi-Fi and Bluetooth—How We Got to Now investigates the secret history behind the everyday objects of contemporary life. In his trademark style, Johnson examines unexpected connections between seemingly unrelated fields: how the invention of air-conditioning enabled the largest migration of human beings in the history of the species—to cities such as Dubai or Phoenix, which would otherwise be virtually uninhabitable; how pendulum clocks helped trigger the industrial revolution; and how clean water made it possible to manufacture computer chips. Accompanied by a major six-part television series on PBS, How We Got to Now is the story of collaborative networks building the modern world, written in the provocative, informative, and engaging style that has earned Johnson fans around the globe.

As a leader you are not only responsible for your own productivity, but for helping those on your team be as productive as possible, and not just at work, but at home as well. Neen made this book easy to digest and implement the strategies immediately. It's not just a book of theory or unrealistic tips for someone who keeps laminated checklists for their family members. Neen provides nuggets of wisdom and then weaves in the insights from other experts that it is like 10 books rolled into one.--Back cover. There is no mistaking a hummingbird. Even people who hardly know a robin from a sparrow recognize that flash of iridescent feathers and the distinctive hovering flight. So popular have "hummers" become that even casual birdwatchers now travel great distances to hummingbird hot spots to see masses of birds in their annual migrations. In this invitingly written book, June Osborne paints a fully detailed portrait of perhaps the best-known hummingbird in the United States, the ruby-throat. Drawing from her own birdwatching experiences, she offers an "up close and personal" look at a female ruby-throat building her nest and rearing young, as well as an account of a day in the life of a male ruby-throat and stories of the hummers' migrations between their summer breeding grounds in the United States and Canada and their winter homes in Mexico and Central America. In addition to this life history, Osborne recounts early hummingbird sightings and tells how the bird received its common and scientific names. After an overview of hummingbirds' distinctive ways of feeding, flying, and conserving energy, she offers a detailed description of the ruby-throat that will help you tell females from males, immature birds from adults, and ruby-throats from similar species. Osborne also takes you on a visit to the "Hummer/Bird Celebration!" at Rockport, reviews hummingbird banding programs, and explains how to attract hummingbirds to your yard or apartment balcony.

A collection of 100 postcards, each featuring a different and iconic Penguin book jacket. From classics to crime, here are over seventy years of quintessentially British design in one box. In 1935 Allen Lane stood on a platform at Exeter railway station, looking for a good book for the journey to London. His disappointment at the poor range of paperbacks on offer led him to found Penguin Books. The quality paperback had arrived. Declaring that 'good design is no more expensive than bad', Lane was adamant that his Penguin paperbacks should cost no more than a packet of cigarettes, but that they should always look distinctive. Ever since then, from their original - now world-famous - look featuring three bold horizontal stripes, through many different stylish, inventive and iconic cover designs, Penguin's paperback jackets have been a constantly evolving part of Britain's culture. And whether they're for classics, crime, reference or prize-winning novels, they still follow Allen Lane's original design mantra. Sometimes, you definitely should judge a book by its cover.

From the New York Times bestselling author of The Genius of Birds, a radical investigation into the bird way of being, and the recent scientific research that is dramatically shifting our understanding of birds -- how they live and how they think. “There is the mammal way and there is the bird way.” But the bird way is much more than a unique pattern of brain wiring, and lately, scientists have taken a new look at bird behaviors they have, for years, dismissed as anomalies or mysteries -- What they are finding is upending the traditional view of how birds conduct their lives, how they communicate, forage, court, breed, survive. They are also revealing the remarkable intelligence underlying these activities, abilities we once considered uniquely our own: deception, manipulation, cheating, kidnapping, infanticide, and also ingenious communication between species, cooperation, collaboration, altruism, culture, and play. Some of these extraordinary behaviors are biological conundrums that seem to push the edges of, well, birdness: a mother bird that kills her own infant sons, and another that selflessly tends to the young of other birds as if they were her own; a bird that collaborates in an extraordinary way with one species—ours—but parasitizes another in gruesome fashion; birds that give gifts and birds that steal; birds that dance or drum, that paint their creations or paint themselves; birds that build walls of sound to keep out intruders and birds that summon playmates with a special call—and may hold the secret to our own penchant for playfulness and the evolution of laughter.

Drawing on personal observations, the latest science, and her bird-related travel around the world, from the tropical rainforests of eastern Australia and the remote woodlands of northern Japan, to the rolling hills of lower Austria and the islands of Alaska's Kachemak Bay, Jennifer Ackerman shows there is clearly no single bird way of being. In every respect, in plumage, form, song, flight, lifestyle, niche, and behavior, birds vary. It is what we love about them. As E.O Wilson once said, when you have seen one bird, you will not see them all.

Brilliant graphic illustrations and a gentle, thought-provoking text pay homage to birds and their wonder-inspiring ways. Birds are like thoughts. They come, stay awhile . . . and then fly away. Birds come in all shapes, sizes, and colors. They like to chat with one another as they fly high and low in the sky. Birds make music, with songs that are like the loving words of a friend, and we are lucky enough to enjoy those sweet melodies. But best of all, birds are capable of flying wherever they please -- they just let their hearts guide them. And we can do that, too, if we use our imaginations. In a lyrical ode to our winged friends, the creator of Trees turns her eye to a diverse class of creatures that has much to teach about transcending the barriers that lie between us.

Paint by Sticker, the bestselling all-ages activity book series, is now perfect for cat lovers! An engrossing activity for crafters and artists, doodlers and colorers, Paint by Sticker: Cats brings 12 irresistible cats to life, piece by piece. There's a playful ginger tabby hanging from her paws, an elegant, blue-eyed Siamese angling for a head scratch, and more! As in paintby number, each image is divided into dozens of spaces, each with a number that corresponds to a particular sticker. Find the sticker, peel it, and place it in the matching space. Add the next, and the next, and the next--and relish the growing satisfaction of watching a "painting" emerge from a black-and-white illustration to a dazzling image with color, body, and spirit.

Captain Bunn founded SOAR to develop effective methods for dealing with flight anxiety. Therapists who have found this phobia difficult to treat will find everything they need to give their clients success. Anxious flyers who have "tried everything" to no avail can look forward to joining the nearly 10,000 graduates of the SOAR program who now have the whole world open to them as they fly anxiety free wherever they want. This approach begins by explaining how anxiety, claustrophobia, and panic are caused when noises, motions--or even the thought of flying--trigger excessive stress hormones. Then, to stop this problem, Captain Bunn takes the reader step-by-step through exercises that permanently and automatically control these feelings. He also explains how flying works, why it is safe, and teaches flyers how to strategically plan their flight, choose the right airlines, meet the captain, and so on. Through this program, Captain Bunn has helped thousands overcome their fear of flying. Now his book arms readers with the information they need to control their anxiety and fly comfortably.

!Pollan Keeps you turning the pages . . . cleareday and assured.!!New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, How to Change Your Mind is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.
