Bringing together cutting-edge research from a range of disciplines, this handbook argues that despite often being overlooked or treated as marginal, the study of Islam from an African context is integral to the broader Muslim world. continent has been a site for the development of rich Islamic scholarship and religious discourses. Over the course of the book, the contributors reflect on: The history and infrastructure of Islam in Africa Politics and Islamic reform Gender, youth, and everyday life for African Muslims New technologies, media, and popular culture. Written by leading scholars in the field, the contributions examine the connections between Islam and broader sociopolitical developments across the continent, demonstrating the important

For years economists have spoken of 'Africa rising', and despite the global financial crisis, Africa continues to host some of the fastest growing economies in the world. Africa's Shadow Rise however argues that the continent's apparent economic 'rise' is essentially a mirage, driven by developments elsewhere - most particularly the expansion in China's economy. While many African countries have experienced high rates of growth, much of this growth may prove to be unsustainable, and has contributed to environmental

Similarly, new economic relationships have produced new forms of dependency, as African nations increasingly find themselves tied to the fortunes of China and other emerging powers. Drawing on in-depth fieldwork in southern Africa, *Africa's Shadow Rise* reveals how the shifting balance of global power is transforming Africa's economy and politics, and what this means for the future of development efforts in the region.

centrality of multilateral organizations and international donors in African development, awarding a fairly minimal role to local partners. In the context of today's development scheme for Africa, ownership is often considered to be the panacea for all of the aid-dependent continent's development woes. Reinforced through the Organization for Economic Cooperation and Development (OECD)'s Paris Declaration on Aid Effectiveness and the Accra Agenda for Action, ownership is now the preeminent procedure for achieving aid

effectiveness and a range of development outcomes. Throughout this book, the author illustrates how the ownership paradigm dictates who can produce development knowledge and who is responsible for carrying it out, with a specific focus on the health sectors in Burkina Faso and Kenya. Under this paradigm, despite the ownership narrative, national stakeholders in both countries are not producers of development knowledge; they are merely responsible for its implementation. This book challenges the preponderance of

conventional international development policies that call for more ownership from African stakeholders without questioning the implications of donor demands and historical legacies of colonialism in Africa. Ultimately, the findings from this book make an important contribution to critical development debates that question international development as an enterprise capable of empowering developing nations. This lively and engaging book challenges readers to think differently about the ownership, and as such will be of interest

Sub-Saharan Africa faces three big challenges over the next generation. It will double its population to two billion by 2045. By then more than half of Africans will be living in cities. And this group of mostly young people will be connected through mobile devices. Properly harnessed and planned for, these are positive forces for change. Without economic growth and jobs, they could prove a political and social catastrophe. Old systems of patronage and of muddling through will no longer work.

"This handbook provides an authoritative and foundational disciplinary overview of African Public Policy and a comprehensive

examination of the practicalities of policy analysis, policymaking processes, implementation and administration in Africa today. The book assembles a multidisciplinary team of distinguished and upcoming Africanist scholars, practitioners, researchers and policy experts working inside and outside Africa to analyse the historical and emerging policy issues in 21st-century Africa. While mostly attentive to comparative public policy in Africa, this book attempts to address some of the following pertinent

questions: How can public policy be understood and taught in Africa? How does policymaking occur in unstable political contexts, or in states under pressure? Has the democratisation of governing systems improved policy processes in Africa? How have recent transformations, such as technological proliferation in Africa, impacted public policy processes? What are the underlying challenges and potential policy paths for Africa going forward? The contributions examine an interplay of

prevailing institutional, political, structural challenges and opportunities for policy effectiveness to discern striking commonalities and trajectories across different African states. This is a valuable resource for practitioners, politicians, researchers, university students, and academics interested in studying and understanding how African countries are governed"--

This volume presents an account of how people in sub-Saharan Africa have fared

under changing life circumstances of the past centuries until the present. By introducing the geography of the region it traces a time line of different historical periods that have shaped livelihoods of ordinary people of the region, and addresses the major milestones in political and economic development. It focuses on social indicators pointing to significant changes that have affected the health, education and wealth of sub-Saharan Africans and their outlook on the future since the wind of change blew through the region.

With case studies and vignettes the book highlights how individual citizens across the 44 different countries of sub-Saharan Africa experience well-being and express their aspirations for the future. This book provides relevant material for practitioners and policy makers, including community and development workers, in non-governmental and other organizations in sub-Saharan African countries.

"This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries. Its starting point is the striking variation in African economic performance. Unevenness and inequalities form a central fact of African economic experiences. The authors highlight not only differences between countries, but also variations within countries, differences often organized around distinctions of gender, class, and ethnic identity. For example, neo-natal mortality and school dropout have been reduced,

particularly for some classes of women in some areas of Africa. Horticultural and agribusiness exports have grown far more rapidly in some countries than in others. These variations (and many others) point to opportunities for changing performance, reducing inequalities, learning from other policy experiences, and escaping the ties of structure, and the legacies of a colonial past. The book rejects teleological illusions and Eurocentric prejudice, but it does pay close attention to the results of policy in more industrialized parts of the world. Seeing the contradictions of capitalism for what they are - fundamental and enduring - may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it would be were certain

impediments suddenly removed. The authors criticize a wide range of orthodox and heterodox economists, especially for their cavalier attitude to evidence. Drawing on their own decades of research and policy experience, they combine careful use of available evidence from a range of African countries with political economy insights (mainly derived from Kalecki, Kaldor and Hirschman) to make the policy case for specific types of public sector investment"--

By analysing transitions within and beyond the continent, the authors identify a 'democratic playbook' robust enough to withstand threats to free and fair elections. internal process of continental integration. In particular, there are normative and policy efforts to revive the spirit of Pan-Africanism: the 21st century is witnessing the evolution of Pan-Africanism, notably through the constitution and establishment of the African Union (AU). Given the fact that there is a dearth of analysis on this phenomenon, this volume will also interrogate the notion of Pan-Africanism through various lenses – notably peace and security, development, the environment and trade. The volume will also engage with the emerging role of the AU as an international actor, e.g. with regard to its role in the reform of the United Nations Security Council, climate change, the International Criminal Court

The Handbook will also assess the role of African social movements and

Turning Politics to Africa's Advantage

Africa faces several major development challenges that have adversely affected the political and material well being of the majority of the people living there. This collection of new essays rigorously analyzes those frontier development issues--including democracy, leadership, the economy, poverty alleviation through microfinance schemes, food security, education, health and political instability--and offers prescriptions that differ from the dominant neoliberal solutions.

This book critically examines the current social policy in post-apartheid South Africa and proposes an alternative social policy agenda to create a new development pathway for the country. Taking social policy as a vehicle that will facilitate the creation of a new society altogether, namely the "Good Society," the author argues for the adoption of policy that will socially re-engineer South Africa. The author shows how the policy tools and development interventions which were undertaken by the post-apartheid state in driving South Africa's transformation agenda failed to emancipate many individuals, families, and communities from the cycle of intergenerational poverty and underdevelopment. He contends that social policy interventions that foster the social re-

engineering of South African society must take place to untangle the inherited colonial-apartheid social order. This book includes comparative analyses on the Global South and Global North to present the ways in which countries such as post-Second World War Great Britain and Sweden, and post-independence Zambia of the 1960s and 1970s, were able to use social policy to create new societies altogether or places similar to the "Good Society." The conceptual and methodological issues that form the basis for this book reside in public policy-making and the public good and will be of interest to scholars of social policy, social development, and South African society.

has taken myriad directions since Christianity first arrived on its shores. This handbook charts both historical developments and contemporary issues in the formation and application of theologies across the member countries of the African Union. Written by a panel of expert international contributors, chapters firstly cover the various methodologies needed to carry out such a survey. Various theological movements and themes are then discussed, as well as biblical and doctrinal issues pertinent to African theology. Subjects addressed include: □ Orality and theology □ Indigenous religions and theology □ Patristics □ Pentecostalism □ Liberation theology □ Black theology □ Social justice □ Sexuality and theology □ Environmental theology □ Christology □ Eschatology □ The

This wide-ranging volume presents the most complete appraisal of modern African history to date. It assembles dozens of new and established scholars to tackle the questions and subjects that define the field, ranging from the economy, the two world wars, nationalism, decolonization, and postcolonial politics to religion, development, sexuality, and the African youth experience. Contributors are drawn from numerous fields in African studies, including art, music, literature, education, and anthropology. The themes they cover illustrate the depth of modern African history and the diversity and originality of lenses available for

examining it. Older themes in the field have been treated to an engaging re-assessment, while new and emerging themes are situated as the book's core strength. The result is a comprehensive, vital picture of where the field of modern African history stands today.
