I will tell you more about my book later, but first, let me tell you a story to make my point even more clear. The other day I took my wife to a B&B to an island not too far from where I live. We drove about 130 min to get to the place It was a beautiful day the sun was up. The ocean was calm and nice, no wind you could glide on the surface if you wanted to. Man...this island was beautiful, flowers blooming everywhere in February. Keep reading we will get to the strawberries! So I get to this B&B, my wife is like gleaming can't wait to see what's in the house, the house was set up in a old colonial style at least that's what my wife told me. So before I get in the house I go around, cause there is a beautiful garden and I see that there is a basement floor which is completely empty. By the way what I am telling you has a lot to do with Forex trading, I have a purpose to my madness, so bear with me. But before I go further let me tell you what happened. I go and ask the host about the basement floor... you know why they are not using it, looks decent to me. So she goes ahead and tells me at least a dozen hurricane stories and how last time there was a hurricane, the water stood up eight feet strong on the street and that floor was always stuck under water and had to be completely wiped out and cleaned and how they decided not to use it any more. See my friend, Forex trading can be like that beautiful island and a gorgeous paradise... The problem is that storms and hurricanes are a normal events in tropical paradise. The reason I wrote this book is so you, don't end up being on the basement of Forex and get flushed every time there is a hurricane. If you are a newbie or even a somewhat experienced trader, but live in the basement of Forex, you will get wiped out every single time. I promise you! The basement of Forex is full with indicator worship going on, in all kinds of indicator temples. Of course your broker is leading the main quite... fast to give you the free education and all of the stochastic, bands and other ropes so you can hang yourself fast. See, in most cases your broker is on the opposite side of your trades unless he is an ECN broker(tip there is no guarantees the ECN brokers are not doing it, since they have all the info of your trades and stops) So, basically they have to hedge your trades, because they are not a price maker, but continually bidding for better quotes from the banks. So you, the innocent retail trader enter the trade and the slaughterer begins. I am sick and tired of seeing innocent hard working people, like you get slaughtered every day by the broker. I wrote this book for you, so it doesn't happen again. I have done all the hard work for you, and put a system that will give you a step by step guidance for success with Forex.

You are just a few keyboard clicks away from getting your eyes open to the Forex reality and trading like the pros. Take a click of faith and jump the gap. See you on the other side!

So, you want to sell online? Great! In my opinion, there has never been a better time to sell online. More and more people are doing more and more of their shopping online, and more buyers mean more opportunity for online sellers! More opportunity also means more competition, but don't let this worry you. If there are more opportunities to make money, then more sellers will enter the market. You should see this as a positive marker that there is definitely money to be made. If there wasn't good money to be made, would sellers, including yourself, be entering this market? Of course not! More sellers? More competition? This may sound intimidating, and that may be the reason why you bought this book. The information contained in this book will allow you to buy smart, lower your costs, increase your margins, and source products more efficiently than your competition. Your competition will be way more scared of you than you should ever be of them after you read this book. If they are not using the techniques and strategies outlined in this book, then there is little doubt that their margins are lower than yours are, which means that they are working harder than you are (and for less money). If that trend continues, they will eventually put themselves out of business while your business continues to grow and remain highly profitable.Knowledge is power. Never before in human history has that phrase been more accurate. What you will acquire in this book is the knowledge of how to source products online like a professional reseller.So, what does all of this have to do with product sourcing? It's been said that when you are sourcing products to sell, you make your money when you buy. This is because if you are buying smart, you are buying at a cost that is sure to maintain your margins. Do you actually 'make money' when you buy? No, of course not. But if you buy smart, while you may not always make as much money as you originally expected, you significantly reduce your risk of ever losing money on a purchase for resale.You are using tools, apps, knowledge, strategies, and techniques that allow you to not only find great products to resell, but also to get them at the absolute lowest possible price. This can significantly lower your risk when making buying decisions, almost to the point of zero. You know that you will be able to sell the products for a profit and when you have enough margins built into the products, you will still be profitable even if you have to lower price to due to changing market conditions.One problem that new (and existing) sellers run into is what to sell. Even if they know what to sell, they then need to know where to get it. And even if they know where to get it, they need to know the best way to make their purchases in order to source their products at the absolute lowest possible price.This book will explain how to quickly identify products with great resale potential to buy when shopping online using tools, programs, and apps. We'll discuss many different ways to lower your final purchase price through discounts, coupons, rebates, and more. There are really no limits as to what types of products you can source and from where you can source them. With the tools and apps available to today's online sellers, many have figured out that they do not want to discriminate in what they sell. They will sell anything that is profitable! They just need to be able to quickly identify the salability and margin of an item and then they can decide if the item fits into their individual business model.

Is Pinterest the New Google? Google is a search engine. That means whatever you're looking for, you can Google it. From obscure song lyrics to 'how to hem pants' you can Google a term or phrase and find videos, images, and links to relative content. Sort of like Google, Pinterest is a visual search engine. Pinterest uses a visual platform of images that stand alone as content but also link to resources for deeper and richer information and engagement. Like Google, you can use key words and phrases to search for relative content. Even better than Google, you can save your links or pins to boards which are a helpful way to organize content. Googling a word or phrase can generate the top ten or so articles, images, and other content relative to that search. Many of the results are paid ads which rank higher than organic content. Pinterest; however, can generate many more results from a search and each and every image offered can lead to a deeper dive experience about a subject or related topic. In this way, Pinterest may be better than Google for specific searches. Can Pinterest be Used for Business? When it comes to certain topics like recipes, DIY, and business topics, Pinterest can be a gold mine. As a user, Pinterest is an excellent way to find relative content quickly and save it for use down the line. If you're a content creator, Pinterest is an excellent way to showcase your goods and services and attract customers easier and more effectively than you might have exclusively with Google. It's also superior to social media platforms like Instagram that don't allow links on posts. Pinterest is actually one of the largest drivers of traffic to websites in the world. Many people think Pinterest is used mainly by women or worry their target audience isn't using the social media platform. Both are false, Pinterest demographics include all genders and ages and Pinterest has been found to be more effective at leading people to content than other platforms like Twitter. Optimizing your Website and Your Pinterest Account Makes Sense Everyone knows website optimization is vital to being discovered on the web. It doesn't make sense to invest resources in blogging or creating content if it's lost in the ether. Most people take steps to optimize their sites for SEO or search engine optimization, to increase the likelihood their content is found. It's the same with Pinterest. You can take simple steps to create images, descriptions, and links to your content so they land in front of more people and pop up above relevant searches. It makes sense to use Pinterest for business as there is limitless potential to convert more browsers to buyers, engage more customers, and promote your business with people looking for what you have to offer.

Google AdSense Profits - The Passive Income AdSense Dream ! For the last couple of years, Google AdSense has dominated forums, discussions and newsletters all over the Internet. Already, there are tales of fabulous riches to be made and millions made by those who are just working from home. It seems that Google AdSense have already dominated the internet marketing business and is now considered the easiest way to making money online. The key to success with AdSense is the placing of ads on pages that are receiving high traffic for high demand keywords. The higher the cost-per-click to the advertiser, the more you will receive per click from your site. Obviously, it does not pay to target low cost-per-click keywords and place them on pages that do not receive hits. With all the people getting online and clicking away everyday, it is no wonder why Google AdSense has become an instant hit. For some who are just new to this market, it would be a blow to their pride knowing that their homepage is buried somewhere in the little ads promoting other people's services. But then, when they get the idea that they are actually earning more money that way, all doubts and skepticism is laid to rest. There are two major, and clever, factors that some successful webmaster and publishers are learning to blend together in order to make money easier using AdSense. 1. Targeting high traffic pages on your website. If you check on your logs, you will discover that many of your visitors are taking advantage of the free affiliate marketing resources and ebooks that you are offering on your site. In simple words, your ads are working effectively and are generating more clicks. It also means more money for you. 2. Placing AdSense links on pages that are producing little, or better yet, no profit. By placing AdSense on a free resources page, you will reduce the amount of potential customers being lost to other sites. Tricky, but effective nonetheless. And much more !
