Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory,

filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

Trying to find the one right move that will improve your business's performance can feel overwhelming. But, as you'll discover in Growth IQ, there are just ten simple--but easily misunderstood--paths to growth, and every successful growth strategy can be boiled down to picking the right

combination and sequence of these paths for your current context. Tiffani Bova travels around the world helping companies solve their most vexing problem: how to keep growing in the face of stiff competition and a fast-changing business environment. Whether she's presenting to a Fortune 500 board of directors or brainstorming over coffee with a startup founder, Bova cuts through the clutter and confusion that surround growth. Now, she draws on her decades of experience and more than thirty fascinating, in-depth business stories to demonstrate the opportunities--and pitfalls--of each of the ten growth paths, how they work together, and how they apply to business today. You'll see how, for instance: * Red Bull broke Coca-Cola and PepsiCo's stranglehold on the soft drink market by taking the Customer Base Penetration path to establish a foothold with adventure sports junkies and expand into the mainstream. * Marvel transformed itself from a struggling comic book publisher into a global entertainment behemoth by using a Customer and Product Diversification strategy and shifting their focus from comic books to comic book characters in movies. * Starbucks suffered a brand crisis when they overwhelmed their customers with a Product Expansion strategy, and brought back CEO Howard Schultz to course-correct by returning to the Customer Experience path. Through Bova's insightful analyses of these and many other case studies, you'll see why it can be a mistake to imitate strategies that worked for your competitors, or rely on strategies that worked for you in the past. From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change

Speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more

specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time . . . and have more fun along the way.

But as the Buddha says, change is inevitable; and ten years later, everything is about to change—big-time—for Ten. From the millionaire entrepreneur and New York Times bestselling author of *The 10X Rule* comes a bold and contrarian wake-up call for anyone truly ready for success. One of the 7 best motivational books of 2016, according to Inc. Magazine. Before Grant Cardone built five successful companies (and counting), became a multimillionaire, and wrote bestselling books... he was broke, jobless, and drug-addicted. Grant had grown up with big dreams, but friends and family told him to be more reasonable and less demanding. If he played by the rules, they said, he could enjoy everyone else's version of middle class success. But when he tried it their way, he hit rock bottom. Then he tried the opposite approach. He said NO to the haters and naysayers and said YES to his burning, outrageous, animal obsession. He reclaimed his obsession with wanting to be a business rock star, a super salesman, a huge philanthropist. He wanted to live in a

mansion and even own an airplane. Obsession made all of his wildest dreams come true. And it can help you achieve massive success too. As Grant says, we're in the middle of an epidemic of average. The conventional wisdom is to seek balance and take it easy. But that has really just given us an excuse to be unexceptional. If you want real success, you have to know how to harness your obsession to rocket to the top. This book will give you the inspiration and tools to break out of your cocoon of mediocrity and achieve your craziest dreams. Grant will teach you how to:

- Set crazy goals—and reach them, every single day.
- Feed the beast: when you value money and spend it on the right things, you get more of it.
- Shut down the doubters—and use your haters as fuel.

Whether you're a sales person, small business owner, or 9-to-5 working stiff, your path to happiness runs through your obsessions. It's a simple choice: be obsessed or be average.

Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. Read Larry Winget's posts on the Penguin Blog. Straight-talking, bestselling Pitbull of Parenting Larry Winget says "This is not a fix your kid book. It's a fix the way you parent book. You owe it to your kids to parent with a plan!" Being a parent is the toughest job in the world, especially with the increasing number of negative influences and pitfalls facing our kids today, from childhood obesity and out-of-control celebrity culture to the dangers of the internet and credit card debt. Larry Winget has never been one to shy away from tough truths, and what he says here may well be difficult for some parents to swallow: we are in the midst of a crisis with our kids. Kids today are over-indulged, over-entertained, under-achieving, and under-disciplined, with a sense of

entitlement that is crippling society. And the real problem is that parents aren't paying attention to what's going on. If they were they would realize that most kids today barely read and write, except with their thumbs on their cell phones! Well-behaved, respectful kids are the exception, not the rule, and for the most part, parents are to blame. Responsible parenting is about beginning with the end in mind and parenting with a plan. But most parents have never stopped to consider what kind of adult they want to raise. They have all this fun creating a baby, but they don't have a plan for the end product. Larry's message to parents: Teach your kids to become the best adults they can be. But don't expect your kids to improve until you improve. Your Kids Are Your Own Fault covers familiar lessons and principles that have led Larry's readers to greater success with money, career, and goal setting, this time at a level where they can be taught to children. This book shows parents how to design the adult they want their kid to become and work backwards to make sure it happens. Kids

The #1 New York Times bestseller that has all America talking—with a new afterword on expanding your range—as seen on CNN's Fared Zakaria GPS, Morning Joe, CBS This Morning, and more. “The most important business—and parenting—book of the year.” —Forbes “Urgent and important. . . an essential read for bosses, parents, coaches, and anyone who cares about improving performance.” —Daniel H. Pink Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill, play an instrument, or lead their field should start early, focus intensely, and rack up as many hours of deliberate practice as possible. If you dabble or delay, you’ll never catch up to the people who got a head start. But a closer look at research on the world’s top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule. David Epstein examined the world’s most successful athletes, artists,

musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They're also more creative, more agile, and able to make connections their more specialized peers can't see. Provocative, rigorous, and engrossing, Range makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.

NEW YORK TIMES BESTSELLER • The perfect gift for new parents and grandparents this Mother's Day: a bighearted book of wisdom, wit, and insight, celebrating the love and joy of being a grandmother, from the Pulitzer Prize-winning columnist and #1 bestselling author "This tender book should be required reading for grandparents everywhere."—Booklist (starred review) "I am changing his diaper, he is kicking and complaining, his exhausted father has gone to the kitchen for a glass of water, his exhausted mother is prone on the couch. He weighs little more than a large sack of flour and yet he has laid waste to the living room: swaddles on the chair, a nursing pillow on the sofa, a car seat, a stroller. No one cares about order, he is our order, we revolve around him. And as I try to get in the creases of his thighs with a wipe, I look at his, let's be honest, largely formless face and unfocused eyes and fall in love with him. Look at him and think, well, that's taken care of, I will do anything for you as long as we both shall live, world without end, amen." Before blogs even existed, Anna

Quindlen became a go-to writer on the joys and challenges of family, motherhood, and modern life, in her nationally syndicated column. Now she's taking the next step and going full nana in the pages of this lively, beautiful, and moving book about being a grandmother. Quindlen offers thoughtful and telling observations about her new role, no longer mother and decision-maker but secondary character and support to the parents of her grandson. She writes, "Where I once led, I have to learn to follow." Eventually a close friend provides words to live by: "Did they ask you?" Candid, funny, frank, and illuminating, Quindlen's singular voice has never been sharper or warmer. With the same insights she brought to motherhood in *Living Out Loud* and to growing older in *Lots of Candles*, *Plenty of Cake*, this new nana uses her own experiences to illuminate those of many others. Praise for *Nanaville* "Witty and thoughtful . . . *Nanaville* serves up enough vivid anecdotes and fresh insights—about childhood, about parenthood, about grandparenthood and about life—to make for a gratifying read."—*The New York Times* "Classic, bittersweet Quindlen . . . [Her] wonder at seeing her eldest child grow into his new role is lovely and moving. . . . The best parts of *Nanaville* are the charming vignettes of Quindlen's solo time with her grandson."—NPR

In a perfect corporate world, intellect, hard work, and professionalism would be recognized and rewarded regardless of the color of your skin. Kenneth Arroyo Roldan is here to tell you that nobody works in a perfect corporate world. Stellar performance alone will not determine corporate advancement—minorities need to learn and follow the rules of corporate politics. As one African American employee who started as a systems analyst at Xerox observed, "The reality was that despite your ability, if you weren't playing politics correctly, you would be derailed." In *Minority Rules*, Roldan gives a dose of tough love to minorities in corporate America while educating their majority counterparts. As the CEO of the top U.S. head-hunting firm specializing in placing minorities in fast track jobs, Roldan watched as minority superstars hired at Fortune 500 companies bailed out, disappointed and rejected after only a few years. The problem, Roldan says, is that minorities are not adequately prepared psychologically or culturally for corporate careers. In a six-step plan, he explains how to surmount the obstacles, play corporate hardball, and succeed as a minority in the workplace. Corporate culture is unforgiving to minorities, but it is possible to rise to the top with Roldan as your guide. With refreshing candor, Roldan prepares minorities both

psychologically and culturally for corporate careers. Forget about using affirmative action and discrimination lawsuits to level the playing field. The only way to win is to know the landscape and master the rules of the game—from finding the right mentor to learning the art of networking to focusing on self-reliance, patience, and most of all, performance. Roldan shows minorities how to climb to the top jobs—and keep them.
