

The iMovie '11 Project Book

The Using series is not just a book; it is highly integrated with online video, audio, and additional bonus content that enables our authors to provide modern, best of class instruction to the beginning audience. Using books are designed to offer a solid and accessible introduction:both tutorial and reference-to a topic. The Using series is written in a succinct yet friendly manner and offers real-world advice and step by step tasks. Using iMovie i11 teaches you how to create Hollywood-level movies with ease. Beginning with tips on shooting your footage, to importing and organizing it, the authors then take the readers through all the steps of creating a finished movie, including editing, adding transitions, titles and special effects, making color corrections and video touchups, and adding and editing audio and sound effects. Then, after you have a completed movie, you'll learn how to share your movies with the world using iMovie's built in sharing features. In addition to the book's text, readers of Using iMovie '11 have unlimited access to exclusive media content including myraid videos and audio podcasts that show readers how to perform a task they just read about. These videos show readers an iMovie process (that is, trimming audio from a clip, adjusting your video's colors, and so on), so readers can see for themselves the process right on their screens:great if you're a visual learner. The podcasts also delve into additional subjects for the aspiring filmmaker, including tips on pre-production and how best to get your movie in front of your intended audience.

This innovative product uses interactive video to explain everything a beginner needs to know to create polished-looking videos with iMovie 11, from importing and organizing video files to using special effects like Green Screen, which lets you superimpose video footage of a person onto any background you want. Users will learn how to adjust the color of video clips, stabilize shakiness, and use Themes--which give a project special transitions, titles, and graphics. A major component is learning to build a movie by assembling and editing clips, and users will learn various ways to share their finished movie, such as creating a DVD and sharing online. Experienced instructor Maxim Jago presents 3 hours of exceptional quality video tutorials, complete with lesson files, assessment quizzes, and review materials. The video is wrapped in a unique interface that allows the viewer to jump to any topic and also bookmark individual sections for later review. The unique Watch-and-Work mode shrinks the video into a small window to allow the student to work alongside in iMovie. Project files used in the lessons are included on the disc so viewers can practice what they've learned, and interactive review questions help reinforce freshly gained knowledge.

Maintaining dignity for patients approaching death is a core principle of palliative care. Dignity therapy, a psychological intervention developed by Dr. Harvey Max Chochinov and his internationally lauded research group, has been designed specifically to address many of the psychological, existential, and spiritual challenges that patients and their families face as they grapple with the reality of life drawing to a close. In the first book to lay out the blueprint for this unique and meaningful intervention, Chochinov addresses one of the most important dimensions of being human. Being alive means being vulnerable and mortal; he argues that dignity therapy offers a way to preserve meaning and hope for patients approaching death. With history and foundations of dignity in care, and step by step guidance for readers interested in implementing the program, this volume illuminates how dignity therapy can change end-of-life experience for those about to die - and for those who will grieve their passing.
