Become a more attentive observer and deepen your appreciation for the natural world. The unique five-year calendar format of The Naturalist's Notebook helps you create a long-term record and point of comparison for memorable events, such as the first songbird you hear in spring, your first monarch butterfly sighting of summer, or the appearance of the northern lights. Biologist Nathaniel T. Wheelwright and best-selling author Bernd Heinrich teach nature lovers of all ages what to look for outdoors no matter where you live, using Heinrich's classic illustrations as inspiration. As you jot down one observation a day, year after year, your collected field notes will serve as a valuable record of your piece of the planet. This deluxe book, with a three-piece case, gilt edges, a burgundy ribbon bookmark, and a belly band with gold foil stamping, is a perfect gift for all nature lovers.

guide to one of the world's most beautiful and varied regions. Santa Barbara and the neighboring counties of San Luis Obispo and Ventura comprise a transitional zone where the plants and animals of Northern California mix with those of the south, creating diverse and dynamic habitats. Lucid explications of the geological and ecological forces that continue to shape and reshape the area are interspersed with personal accounts, as the author delights in the salty breath of a two-hundred-ton whale near the Channel Islands, the antics of beach hoppers along the shoreline, the explosion of wildflowers on the Carrizo Plain, memories of exploring the chaparral with her father, excursions into oak woodlands, and hikes to lofty peaks and canyons cloaked with pinyon pine and juniper. Enhanced with ample, specially commissioned photographs, maps, and charts, this book will broaden our understanding and deepen our enjoyment of a unique and constantly surprising region."--Back cover.

In this guide, biologist Mark Gustafson introduces residents and visitors to the history, geology, water resources, plants, and animals found in the nineteen counties occupying the eastern part of the Edwards Plateau, the heart of the Hill Country. He profiles three hundred of the most common and unique species from all of the major groups of plants and animals: trees, shrubs, wildflowers, cacti, vines, grasses, ferns, fungi, lichens, birds, mammals, reptiles, amphibians, fishes, and invertebrates. Color photographs are included for each species along with a brief description. He closes with a chapter on significant state parks and natural areas in the region as an invitation to visit and explore the Texas Hill Country. As large metropolitan areas continue to encroach on the Hill Country, newcomers are moving in and more people are flocking to its many attractions. This guidebook will enrich the appreciation of the region's rich and unique biodiversity and encourage conservation of the natural world encountered.

The California Naturalist Handbook

Get Free A Naturalists Guide To The Butterflies Of Borneo By Honor Phillips

provides a fun, science-based introduction to California's natural history with an emphasis on observation, discovery, communication, stewardship and conservation. It is a hands-on guide to learning about the natural environment of California. Subjects covered include California natural history and geology, native plants and animals, California's freshwater resources and ecosystems, forest and rangeland resources, conservation biology, and the effects of global warming on California's natural communities. The Handbook also discusses how to create and use a field notebook, natural resource interpretation, citizen science, and collaborative conservation and serves as the primary text for the California Naturalist Program.

A charmingly illustrated keepsake and guide to native, wild plants of North America. In this exquisitely detailed naturalist's handbook, Laura C. Martin provides profiles of 85 wild plants and flowers found across North America, each accompanied by lovingly illustrated and charming watercolor

Get Free A Naturalists Guide To The Butterflies Of Borneo By Honor Phillips

paintings. With dozens of notes, arrows, and details, each chapter encourages the reader to look at the plants as a naturalist would—opening up a whole new way of seeing nature. Martin gives details on where the plants can be found, how they grow, how to identify them, and what natural properties they each have. The handbook features plants from across North America, including the Purple Coneflower, found along the East Coast from Quebec to Florida, and the Opuntia (prickly pear) cacti found in Mexico and America's Southwest. In addition to the wildflower profiles, readers will find information on growing native plants, instructions for plant crafts, tips for conservation, and ideas for activities with children. They'll also discover recipes for teas, herb mixes, tinctures, and salves using the plants described. Crafts and activities include making dyes, simple baskets, wreaths, and crowns. A Naturalist's Book of Wildflowers is a gift book and field guide in one, with its treasure trove of handy information and beautiful colored drawings.
