Norwegian expedition's successful attempt to reach the South Pole in 1911. Amundsen spends a great deal of time talking about logistics and placing of depots in preparation for his polar attempt all the way from the preparation leading up to the initial sea voyage, the voyage itself and then the establishing of a camp at the Antarctic. Although they were lucky with the weather, and Amundsen attributed the success of the expedition to "good luck", it is obvious that the Norwegian expedition was well prepared and ready for the troubles ahead; the equipment, the sledges with well-trained dogs, the supply depots with seal meat at regular intervals along the route, the sunglasses to avoid snow blindness; it was all thought of in advance.

competed in the race of a lifetime: to be the first aviator to fly over the North Pole. What inspired their dangerous fascination? For some, it was the romantic theory about a “lost world,” a hidden continent in the Arctic Ocean. Others were seduced by new aviation technology, which they strove to push to its ultimate limit. The story of their quest is breathtaking and inspiring; the heroes are still a matter of debate. It was the 1920s. The main players in this high stakes game were Richard Byrd, a dashing Navy officer and early aviation pioneer; and Roald Amundsen, a Viking in the sky, bitter rival of Byrd’s and a hardened veteran of polar expeditions. Each man was determined to be the first aviator to fly over the North Pole, despite brutal

Without power tools or building experience they constructed a floating dwelling complete with a brick fireplace. Towed deep into the sleepy waters of Bloody Bayou, it was their home for eight years. This is the tale of the not-so-simple life they made together -- days spent fishing, trading, making wine, growing food, and growing up -- told by Gwen with grace, economy, and eloquence. Not long after they took up swamp living, Gwen and Calvin met a young

When Admiral Richard E. Byrd set out on his second Antarctic expedition in 1934, he was already an international hero for having piloted the first flights over the North and South Poles. His plan for this latest adventure was to spend six months alone near the bottom of the world, gathering weather data and indulging his desire “to taste peace and quiet long enough to know how good they really are.” But early on things went terribly wrong. Isolated in the pervasive polar night with no hope of release until spring, Byrd began suffering inexplicable symptoms of mental and physical illness. By the time he discovered that carbon monoxide from a defective stovepipe was poisoning him, Byrd was

Through these three main characters—mother, son, adventuring explorer—Mutch triangulates overlapping and layered themes of solitude that enlighten and uplift one another.
