Alongside listening, speaking, reading and writing, memory underpins every aspect of successful language learning. *Memory Activities for Language Learning* explores the cognitive processes of memory and provides a bank of activities to facilitate their development. This book will help teachers discover what makes language memorable, as well as how to optimize learners' language memory by engaging and developing their abilities to recognize, notice, store, retrieve and reactivate language. Recent developments in psycholinguistics and corpus linguistics, including a renewed focus on the importance of acquiring a critical mass of lexis and phraseology as soon as possible, have made this practical advice even more critical. Photocopiable material for use in the classroom can be printed out from the accompanying CD-ROM.

Experts from all over the world take a critical, highly international and often controversial perspective on the ADHD phenomenon – a condition that has reached global proportions, significantly affecting the lives of children, parents and teachers worldwide. This book raises a number of concerns often not covered by the material currently available to parents and practitioners. *Critical New Perspectives on ADHD* unpicks the myths surrounding the development of this phenomenon and leaves no stone unturned in its search for answers. An in-depth exploration into the reasons for the

emergence and maintenance of ADHD lead to suggested explanations of the dominance of US psychiatric models and the need for new markets for major pharmaceutical companies, as well as the functions that ADHD diagnoses fulfil in families, classrooms and communities. In a world where moves to educational inclusion are paradoxically paralleled by the ever-increasing use of medication to control children's behaviour, this book scrutinises current accepted practice and offers alternative perspectives and strategies for teachers and other education professionals. This is an invaluable resource for anyone with a serious interest in ADHD and other behavioural difficulties.

This volume has three foci - the rationale for considering how aspects of education can affect social cohesion; case studies that review particular country experiences with curricula and textbooks; and practical guidelines and applications to help countries improve

areas of education.

Paint a picture of a familiar character, and chances are you'll encounter that person in this collection of short stories. This anthology abounds with the funny, positive things that come up in life. The wonder of short stories can motivate you to investigate all that life has to offer. "These sparkling short stories by Cynthia Cordell are a great way to spend your time curled up on the sofa or bed with a steaming cup of chamomile at your side. The majority are slices-of-life vignettes; peeks into the lives of ordinary people going about their business, and then, surprise! ... the occasional sci-fi story thrown in to add a bit of contrast and allow Ms. Cordell to show the ease with which she can change genres. The stories are a brilliant mix of the intricacies of computer programming and website design juxtaposed with makeup and hair issues and quite a lot of the love of food. The masculine and the feminine combined ... and a mix I've never encountered as a reader before. Get your copy and get your tea ready! Highly recommended!" –Gerald Hansen, author of *An Embarrassment of Riches*, *Hand in the Till*, and *Fleeing the Jurisdiction*

The Rise of English is a masterful account of the spread of English as the dominant lingua franca worldwide, its intimate connections with globalization and neoliberalism, and its effects on linguistic justice, opportunity, and identity. Deeply researched and wide-ranging in scope, this book shows how English has privileged some and disadvantaged others, but ultimately offers the promise of transcending cultural and linguistic borders in a multilingual world. Patriots & Parasites, completed just days before Smuts's unexpected death in 2016, is her account of the momentous period in South African history known as the Transition Era, through the lens of her 25-year career as a key opposition MP and a respected legislator. With ambitious breadth and rare insight, she examines: The arduous but exhilarating work of writing the Constitution and the Bill of Rights; The great experiment in catharsis that was the Truth and Reconciliation Commission; The reinvigoration of racial polarisation under the Mbeki administration, and the slow burn of

resentment that is coming to a head among the next generation (as manifested in the #RhodesMustFall campaign); The entrenchment of cronyism under Zuma, and the fight to protect the crucial balance of accountability enshrined in the freedom of the media and the independence of the judiciary.
