This volume is part of a series of 18 monographs on service learning and the academic disciplines. It is designed to (1) develop a theoretical framework for service learning in accounting consistent with the goals identified by accounting educators and the recent efforts toward curriculum reform, and (2) describe specific active learning strategies that are useful and powerful teaching tools. Part 1, "Theoretical Essays on Service-Learning in Accounting," includes: "Service-Learning: An Active-Learning Approach for Accounting Education" (D.V. Rama); "Service-Learning: The Accountants for the Public Interest Perspective" (Wayne G. Bremser); "'What I Do, I Understand': Service-Learning in Accounting Curricula" (William L. Weis); and "Service-Learning in Accounting: A Department Chair's Perspective" (Alfonso R. Oddo). Part 2, "Implementation Approaches," includes: "Service-Learning: A 'Free Enterprise' Model for Accounting Faculty" (Curtis L. DeBerg); "Expanding the Boundaries of Accounting Education through Service-Learning" (Lynn M. Pringle); "Service-Learning in Accounting: A Role for VITA Tax Programs" (Janice Carr); "Tax Assistance Program Provides Service-Learning at Notre Dame and St. Mary's College" (Ken Milani); "Volunteer Income Tax Assistance and the Use of Technology" (Nathan Oestreich, Carol Venable, and Martha Doran); "Service-Learning Project in the Accounting Information Systems Course: Implementation without the Benefit of Hindsight" (Alfred R. Michenzi); "Reaching Our Goals Together in Service-Learning: A Multi-Semester Accounting Information Systems Course Implementation" (Margarita Maria Lenk); "Service-Learning in a Capstone Course" (James W. Woolley); "Teaching Professional Accounting Ethics with Service-Learning" (Susan P. Ravenscroft); "Student Consulting Organizations: An Alternative Approach to Service-Learning" (Timothy S. Mech); and "Service-Learning Projects in Accounting: Implementation Strategies" (D.V. Rama). An Afterword by Paul Locatelli is titled: "Service-Learning in Accounting Education." A 37-item annotated bibliography is included. (All papers include references.) (SM)

Bioresource Utilization and Bioprocess

Food and Pharmaceutical Applications

This book focuses on the utilization of bio-resources and their conversion pathways for a sustainable future. Tapping into bio-resources by means of thermochemical and biochemical processes has attracted researchers from all over the world; it is a broad area that has given birth to concepts like the biorefinery, as well as a new stream known as biotechnology. Its scope includes biochemical and microbiological engineering, biocatalysis and biotransformation, biosynthesis and metabolic engineering, bioprocess and biosystem engineering, bioenergy and biorefineries, cell culture and biomedical engineering, food, agricultural and marine biotechnology, bioseparation and biopurification engineering, bioremediation and environmental biotechnology, etc. The book discusses a host of new technologies now being used to tap these resources with innovative bioprocesses. All chapters are based on outstanding research papers selected for and presented at the IconSWM 2018 conference.

This comprehensive study of Muslim jurist Ibn Taymiyya's (d. 1328) theodicy of perpetual optimism expositis and analyses his writings on God's justice and wise purpose, divine determination and human agency, the problem of evil, and juristic method in theological doctrine.

Red Beet Biotechnology

Nanotechnology is a fast-evolving discipline that already produces outstanding basic knowledge and industrial applications for the benefit of society. Whereas the first applications of nanotechnology have been developed mainly in material sciences, applications in the agriculture and food sectors are still emerging. Due to a rapid population growth there is a need to produce food and beverages in a more efficient, safe and sustainable way. Here, nanotechnology is a promising way to improve crop production, water quality, nutrition, packaging, and food security. There are actually few comprehensive reviews and clear textbooks on nanotechnology in agriculture, water, and food. In this book there are 10 chapters describing the synthesis and application of nanomaterials for health, food, and agriculture are presented. Nanomaterials with unique properties will dramatically improve agriculture and food production. Applications will include nanofertilisers to enhance plant growth and nanosensors to detect food contamination. An overall view of nanotechnology applications in agriculture, food, water, and environment are described in the first two chapters by Dasgupta et al. and Singh. Health and environmental applications of nanotechnology are presented in chapters 3-5. Shukla and Iravani review green methods to synthesize metal nanoparticles, and give applications to water purification, in chapter 3. The removal of up to 95% of contaminants by nanoparticles, nanotubes and nanostructured membranes is described by Naghdi et al. in chapter 4. Yoti et al. then review nanosensors for the detection of pathogenic bacteria in chapter 5. Those nanosensors can be used as biodiagnostics to control food and water quality. Food applications of nanoscience are presented in chapters 6 and 7 by Kuswandi and Sarkhar et al. Kuswandi explain in chapter 6 that nanomaterials can improve packaging quality and that nanosensors can detect freshness and contaminants. The use of nanoparticles to protect ingredients such as vitamins, flavours, and antimicrobials is reviewed by Sarkhar et al. in chapter 7.

In recent years, emerging trends in the design and development of drug products have indicated ever greater need for integrated characterization of excipients and in-depth understanding of their roles in drug delivery applications. This book presents a concise summary of relevant scientific and mechanistic information that can aid the use of excipients in formulation design and drug delivery applications. Each chapter is contributed by chosen experts in their respective fields, which affords truly in-depth perspective into a spectrum of excipient-focused topics. This book captures current subjects of interest - with the most up to date research updates - in the field of pharmaceutical excipients. This includes areas of interest to the biopharmaceutical industry users, students, educators, excipient manufacturers, and regulatory bodies alike.

Volunteer Coordinator's Handbook

In our modern society, expectations are high, also with respect to our daily diet. In addition to being merely "nutritious", i.e. supplying a variety of essential nutrients, including macro-nutrients such as proteins or micro-nutrients such as minerals and vitamins, it is almost expected that a good diet offers further advantages - especially well-being and health and the prevention of chronic diseases, which are, as we generally tend to grow older and older, becoming a burden to enjoying private life and to the entire society. These additional qualities are often sought in diets rich also in non-nutritive components, such as phytochemicals. In contrast to drugs, which are taken especially to cure or ameliorate diseases, it is expected that a healthy diet acts in particular on the side of prevention, allowing us to become old without feeling old. In the present book, rather than trying to give an exhaustive overview on nutritional aspects and their link to well-being and health, selected topics have been chosen, intended to address presently discussed key issues of nutrition for health, presenting a reasonable selection of the manifold topics around diet, well-being, and health: from the antioxidants polyphenols and carotenoids, aroma-active terpenoids, to calcium for bone health, back to traditional Chinese Medicine.

Biotechnology is a rapidly growing research area which is immediately translated into industrial applications. Although over 1000 research papers have emerged on various aspects of red beet and the chemistry of betalaines pigments, surprisingly no comprehensive book is available. The proposed Red Beet book encompasses a scholarly compilation of recent biotechnological research developments made in basic science, biochemistry of the chief components, technological developments in augmenting and recovery of such useful compounds and value-added products with discussions on future perspectives. The book will provide detailed information of the chemistry of the main components of normal and genetically engineered beetroot.

The current volume presents new empirical data on well-being of youth and emerging adults from a global international perspective. Its outstanding features are the focus on vast geographical regions (e.g., Europe, Asia, Africa, North and South America), and on strengths and resources for optimal well-being. The international and multidisciplinary contributions address the complexities of young people's life in a variety of cultural settings to explore how key developmental processes such as identity, religiosity and optimism, social networks, and social interaction in families and society at large promote optimal and successful adaptation. The volume draws on core theoretical models of human development to highlight the applicability of these frameworks to culturally diverse youth and emerging adults as well as universalities and cultural specifics in optimal outcomes. With its innovative and cutting-edge approaches to cultural, theoretical and methodological issues, the book offers up-to-date evidence and insights for researchers, practitioners and policy makers in the fields of cross-cultural psychology, developmental science, human development, sociology, and social work.

Wildland fires are becoming one of the most critical environmental factors affecting a wide range of ecosystems worldwide. In Mediterranean ecosystems (including also South-Africa, California, parts of Chile and Australia), wildland fires are recurrent phenomena every summer, following the seasonal drought. As a result of changes in traditional land use practices, and the impact of recent climate warming, fires have more negative impacts in the last years, threatening lives, socio-economic and ecological values. The book describes the ecological context of fires in the Mediterranean ecosystems, and provides methods to observe fire danger conditions and fire impacts using Earth Observation and Geographic Information System technologies.

Learn the latest details and most recent groundbreaking discoveries that reveal, for the first time, the mystery of life in the spirit world after death on Earth?proof that our consciousness survives?in Journey of Souls by Michael Newton, Ph.D. Using a special hypnosis technique to reach the hidden

memories of subjects, Dr. Newton discovered some amazing insights into what happens to us between lives. Journey of Souls is the record of 29 people who recalled their experiences between physical deaths. Through their extraordinary stories, you will learn specifics about: ·How it feels to die ·What you see and feel right after death ·The truth about "spiritual guides" ·What happens to "disturbed" souls ·Why you are assigned to certain soul groups in the spirit world and what you do there · How you choose another body to return to Earth ·The different levels of souls: beginning, intermediate, and advanced ·When and where you first learn to recognize soulmates on Earth ·The purpose of life Journey of Souls is a graphic record or "travel log" by these people of what happens between lives on Earth. They give specific details as they movingly describe their astounding experiences. After reading Journey of Souls, you will gain a better understanding of the immortality of the human soul. You will meet day-to-day challenges with a greater sense of purpose. You will begin to understand the reasons behind events in your own life. Journey of Souls is a life-changing book. Already, over 165,000 people have taken Journey of Souls to heart, giving them hope in trying times. You should read a copy, too.

Gracious Ladies, so often as I consider with my selfe, and observe respectively, how naturally you are enclined to compassion; as many times doe I acknowledge, that this present worke of mine, will (in your judgement) appeare to have but a harsh and offensive beginning, in regard of the mournfull remembrance it beareth at the verie entrance of the last Pestilentiaall mortality, universally hurtfull to all that beheld it, or otherwise came to knowledge of it. But for all that, I desire it may not be so dreadfull to you, to hinder your further proceeding in reading, as if none were to looke thereon, but with sighes and teares. For, I could rather wish, that so fearefull a beginning, should seeme but as an high and steepy hil appeares to them, that attempt to travell farre on foote, and ascending the same with some difficulty, come afterward to walk upon a goodly even plaine, which causeth the more contentment in them, because the attayning thereto was hard and painfull. For even as pleasures are cut off by grieffe and anguish; so sorrowes cease by joyes most sweete and happie arriving. After this briefe mollestation; briefe I say, because it is contained within small compasse of Writing; immediately followeth the most sweete and pleasant taste of pleasure, whereof (before) I made promise to you. Which (peradventure) could not bee expected by such a beginning, if promise stood not thereunto engaged. And indeed, if I could well have conveyed you to the center of my desire, by any other way, then so rude and rocky a passage as this is, I would gladly have done it. But because without this Narration, we could not demonstrate the occasion how and wherefore the matters hapned, which you shall reade in the ensuing Discourses: I must set them downe (even as constrained thereto by meere necessity) in writing after this manner. The yeare of our blessed Saviours incarnation, 1348, that memorable mortality happened in the excellent City, farre beyond all the rest in Italy; which plague, by operation of the superiour bodies, or rather for our enormous iniquities, by the just anger of God was sent upon us mortals. Some few yeeres before, it tooke beginning in the Easterne partes, sweeping thence an innumerable quantity of living soules: extending it selfe afterward from place to place Westward, until it seized on the said City. Where neither humane skill or providence, could use any prevention, notwithstanding it was cleansed of many annoyances, by diligent Officers thereto deputed: besides prohibition of all sickly persons enterance, and all possible provision dayly used for conservation of such as were in health, with incessant prayers and supplications of devoute people, for the asswaging of so dangerous a sicknesse. About the beginning of the yeare, it also began in very strange manner, as appeared by divers admirable effects; yet not as it had done in the East Countries, where Lord or Lady being touched therewith, manifest signes of inevitable death followed thereon, by bleeding at the nose. But here it began with yong children, male and female, either under the armpits, or in the groine by certaine swellings, in some to the bignesse of an Apple, in others like an Egge, and so in divers greater or lesser, which (in their vulgar Language) they termed to be a Botch or Byle. In very short time after, those two infected parts were growne mortiferous, and would disperse abroad indifferently, to all parts of the body; whereupon, such was the quality of the disease, to shew it selfe by blacke or blew spottes, which would appeare on the armes of many, others on their thighes, and every part else of the body: in some great and few, in others small and thicke. Even though local governments raise revenues under authority granted by state government, there are many differences in the taxes, fees, and charges that localities impose. Each year the University of Virginia's Weldon Cooper Center for Public Service conducts a comprehensive survey on the tax rates of all cities, counties and incorporated towns in Virginia and provides the results in its annual book, Virginia Local Tax Rates. This publication allows you to compare local government tax policies across Virginia and provides detailed background information on local taxes rates. All cities and counties participated in the latest 2018 survey, as did 133 of the 190 incorprated towns. The survey's results, plus additional information from other sources, provide a comprehensive picture of local tax policies in the state. The text includes descriptions of authorizing state statutes, the various tax categories, and statewide statistics including ranges and averages. Anyone involved with local governments in Virginia, either as a taxpayer, elected official, administrator, business leader, or researcher, will find this an indispensable resource.
