To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future. This dynamic manual provides guidelines for written and oral scientific presentations, including how to effectively prepare and deliver papers and presentations, how to find reliable research, and how to write research proposals.

Continuing the epic saga of Alexander the Great, The Sands of Ammon brilliantly describes Alexander's quest to conquer Asia, the limitless domain ruled by the Great King of the Persians. Alexander and his men storm Persian fortresses and harbours, crippling King Daruis' domination of land and sea. Ruthlessly, Alexander's war machine moves ever onward taking him up into the snow-covered Anatolian highlands, and ever closer to his destiny. But there is much danger ahead. Despite the defeat of Daruis, the Island City of Tyre and the Towers of Gaza prove to be formidable obstacles. Undeterred, Alexander surges forth over land and sea to the mysterious land of Egypt. And there, in the sands, lies the Oracle of Ammon, waiting to reveal an amazing truth to Alexander. One that will change his already amazing life.

What is the role of dance in the formation of the geopolitical region known as the Nordic Countries or Norden? In this book a group of dance scholars from Denmark, Finland, Norway and Sweden shed light on the topic by juxtaposing material relating to theatrical, folkloric and social dancing in the 20th and 21st centuries. Contextualised in the wider cultural and political making of the region, the chapters relate dance to questions of emerging nations, canon building, local variations of global trends and democratic practices in the arts. The book is intended for an international readership with an interest in dance in all its manifestations.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men ' s struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African ' tradition ' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men ' s vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
