The New York Times bestselling author of *Being Mortal* and *Complications* reveals the surprising power of the ordinary checklist. We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

Small and large telescopes are being installed all around the world. Astronomers have thus acquired better access to more modern equipment; not in the least to photometers, which are very important tools for the contemporary observer. This development of higher quality and more sensitive equipment makes it very necessary to improve the accuracy of the measurements. This guide helps the astronomer and astronomy student to improve the quality of their photometric measurements and to extract a maximum of information from their observations. The book is based on the authors' observing experience, spending numerous nights behind various instruments at many different observatories.

The issue of physician-assisted death is now firmly on the American public agenda. Already legal in five states, it is the subject of intense public opinion battles across the country. Driven by an increasingly aging population, and a baby boom generation just starting to enter its senior years, the issue is not going to go away anytime soon. In *Physician-Assisted Death*, L.W. Sumner equips readers with everything they need to know to take a reasoned and informed position in this important debate. The book provides needed context for the debate by situating physician-assisted death within the wider framework of end-of-life care and explaining why the movement to legalize it now enjoys such strong public support. It also reviews that movement's successes to date, beginning in Oregon in 1994 and now extending to eleven jurisdictions across three continents. Like abortion, physician-assisted death is ethically controversial and the subject of passionately held opinions. The central chapters of the book review the main arguments utilized by both sides of the controversy: on the one hand, appeals to patient autonomy and the relief of suffering, on the other the claim that taking active steps to hasten death inevitably violates the sanctity of life. The book then explores both the case in favor of legalization and the case against, focusing in the latter instance on the risk of abuse and the possibility of slippery slopes. In this context the experience of jurisdictions that have already taken the step of legalization is carefully reviewed to see what lessons might be extracted from it. It then identifies some further issues that lie beyond the boundaries of the current debate but will have to be faced sometime down the road: euthanasia for patients who are permanently unconscious or have become seriously demented and for severely compromised newborns. The book concludes by considering the various possible routes to legalization, both political and judicial. Readers will then be prepared to decide for themselves just where they stand when they confront the issue both in their own jurisdiction and in their own lives.

"A mystery and an elegy for the death of old-fashioned journalism, it's a book that will warm your heart." *The Observer* "Splendid . . . Funny, poignant, perceptive and plenty of sharp elbows along the way." Val McDermid
Thorn Marsh was raised in a house of whispers, of meaningful glances and half-finished sentences. Now she's a journalist with a passion for truth, more devoted to her work at the *London Journal* than she ever was to her ex-husband. When the newspaper is bought by media giant The Goring Group, who value sales figures over fact-checking, Thorn openly questions their methods, and promptly finds herself moved from the news desk to the midweek supplement, reporting heart-warming stories for their new segment, *The Bright Side*, a job to which she is spectacularly unsuited. On a final warning and with no heart-warming news in sight, a desperate Thorn fabricates a good-news story of her own. The story, centred on an angelic apparition on Hampstead Heath, goes viral. Caught between her principles and her ambitions, Thorn goes in search of the truth behind her creation, only to find the answers locked away in the unconscious mind of a stranger. Marika Cobbold returns with her eighth novel, *On Hampstead Heath*. Sharp, poignant, and infused with dark humour, *On Hampstead Heath* is an homage to storytelling and to truth; to the tales we tell ourselves, and the stories that save us.

In his acclaimed memoir *Intern*, Sandeep Jauhar chronicled the formative years of his residency at a prestigious New York City hospital. *Doctored*, his harrowing follow-up, observes the crisis of American medicine through the eyes of an attending cardiologist. Hoping for the stability he needs to start a family, Jauhar accepts a position at a

massive teaching hospital on the outskirts of Queens. With a decade's worth of elite medical training behind him, he is eager to settle down and reap the rewards of countless sleepless nights. Instead, he is confronted with sobering truths. Doctors' morale is low and getting lower. Blatant cronyism determines patient referrals, corporate ties distort medical decisions, and unnecessary tests are routinely performed in order to generate income. Meanwhile, a single patient in Jauhar's hospital might see fifteen specialists in one stay and still fail to receive a full picture of his actual condition. Provoked by his unsettling experiences, Jauhar has written an introspective memoir that is also an impassioned plea for reform. With American medicine at a crossroads, *Doctored* is the important work of a writer unafraid to challenge the establishment and incite controversy.

You may be looking at the back of this book, watching as someone else is reading it—a book entitled: *Love: Expressed*. And you're thinking, 'They must have issues.' So to help them out for a moment: This isn't another one of those 'self-help' manuals. This isn't a book about romance and sex, or feelings and cuddles. This isn't a guidebook offering relationship advice, giving tips on how to find 'love' and 'look after' it. In those senses, this isn't even a book about love. It's a book about life—every part of it. About how it should be lived, how it should be explored, how it should be expressed. This is a book about meaning, about life's trajectories. It's about God. It's about you. It's about them. In that sense, this is all about love. But if I could capture here what I mean by 'love' in that sense, I wouldn't have needed to write a book. "Tristan Sherwin has written a smart and beautiful book showing us that Jesus Christ is the love of God expressed as a human life. This is the life we are called to imitate; this life of love is what we are made for." -Brian Zahnd; Author of *A Farewell To Mars* "Refreshing, authentic, inspiring, and yet practical—Tristan is a breath of fresh air." -Jeff Lucas; Author, Speaker, Broadcaster "Love: Expressed is a work of dirt-under-your-fingers spirituality." -Jonathan Martin; Author of *Prototype*

Feel Satisfied with Who and Where You Are In a world of comparison and discontent, it can feel impossible to be happy with life as we know it. Other people seem to have it all together, to be finding success, to be having more fun. But we weren't meant for a life characterized by dissatisfaction. In this entertaining and relatable book, Alexandra Kuykendall chronicles her nine-month experiment to rekindle her love of her ordinary "actual" life. After wiping her calendar as clean as a mother of four can, Kuykendall focuses on one aspect of her life each month, searching for ways to more fully enjoy her current season. By intentionally adding one thing each month that will make her jump for joy, she provides a practical challenge women can easily replicate. With humor, poignancy, and plenty of personal stories, Kuykendall weaves together spiritual themes and practical application into a holy self-awareness, showing women how a few small changes in their routines can improve their enjoyment of this crazy-busy life. Endorsement "If you ever get the chance to read anything written by Alexandra Kuykendall, take it. She is a gentle, trustworthy storyteller who lives the words she writes about."--Emily P. Freeman, author of *Simply Tuesday*

Imagine Being On Your Death Bed... Who do you want to be around you? How would you like to be treated? Death... is indeed a heavy topic. In *Being Mortal*, Atul Gawande addresses end-of-life care, hospice care and his personal reflections and stories. It has been said that if we live each day as if it was our last, one day we'd surely be right. Life and death is an interesting paradox isn't it? We don't carry anything to Earth when we are born... ... and we can't take anything with us when we are gone. All we have left is the memories of the people we've touched, the things we've

created and our legacy. Being Mortal is written by Atul Gawande and first published in 2014. It is truly a valuable book since death is such a heavy topic and not many people want to talk about it. In his critically-acclaimed book Being Mortal, bestselling author Atul Gawande discusses the hardest challenge that the medical profession faces. That is, how medicine can not only improve life but how does it also improve the process of its ending. Medicine has many triumphs in modern times. This field has transformed birth, disease, and injury from being harrowing to getting more manageable. However, in the inevitable condition of aging and death, the medical field has goals that seem to often run counter to the common interest of the human spirit. Atul Gawande's Being Mortal is full of eye-opening research combined with riveting storytelling. Gawande asserts that the medical field can enhance and comfort our experience even to the very end, as it provides not only a good life but eventually, also a good end. A brilliant and courageous doctor reveals, in gripping accounts of true cases, the power and limits of modern medicine. Sometimes in medicine the only way to know what is truly going on in a patient is to operate, to look inside with one's own eyes. This book is exploratory surgery on medicine itself, laying bare a science not in its idealized form but as it actually is -- complicated, perplexing, and profoundly human. Atul Gawande offers an unflinching view from the scalpel's edge, where science is ambiguous, information is limited, the stakes are high, yet decisions must be made. In dramatic and revealing stories of patients and doctors, he explores how deadly mistakes occur and why good surgeons go bad. He also shows us what happens when medicine comes up against the inexplicable: an architect with incapacitating back pain for which there is no physical cause; a young woman with nausea that won't go away; a television newscaster whose blushing is so severe that she cannot do her job. Gawande offers a richly detailed portrait of the people and the science, even as he tackles the paradoxes and imperfections inherent in caring for human lives. At once tough-minded and humane, *Complications* is a new kind of medical writing, nuanced and lucid, unafraid to confront the conflicts and uncertainties that lie at the heart of modern medicine, yet always alive to the possibilities of wisdom in this extraordinary endeavor. *Complications* is a 2002 National Book Award Finalist for Nonfiction.

NATIONAL BESTSELLER The New York Times bestselling author of *Being Mortal* and *Complications* examines, in riveting accounts of medical failure and triumph, how success is achieved in a complex and risk-filled profession The struggle to perform well is universal: each one of us faces fatigue, limited resources, and imperfect abilities in whatever we do. But nowhere is this drive to do better more important than in medicine, where lives are on the line with every decision. In this book, Atul Gawande explores how doctors strive to close the gap between best intentions and best performance in the face of obstacles that sometimes seem insurmountable. Gawande's gripping stories of diligence, ingenuity, and what it means to do right by people take us to battlefield surgical tents in Iraq, to labor and delivery rooms in Boston, to a polio outbreak in India, and to malpractice courtrooms around the country. He discusses the ethical dilemmas of doctors' participation in lethal injections, examines the influence of money on modern medicine, and recounts the astoundingly contentious history of hand washing. And as in all his writing, Gawande gives us an inside look at his own life as a practicing surgeon, offering a searingly honest firsthand account of work in a field where mistakes are both unavoidable and unthinkable. At once unflinching and compassionate, *Better* is an exhilarating journey narrated by "arguably the best nonfiction doctor-writer around" (Salon). Gawande's investigation into medical professionals and how they progress from merely good to great provides rare insight into the elements of success, illuminating every area of human endeavor.

"With *When Death Becomes Life*, Joshua Mezrich has performed the perfect core biopsy of transplantation—a clear and compelling account of the grueling daily work, the spell-binding history and the unsettling ethical issues that haunt this miraculous lifesaving treatment. Mezrich's compassionate and honest voice, punctuated by a sharp and intelligent wit, render the enormous subject not just palatable but downright engrossing."—Pauline Chen, author of *Final Exam: A Surgeon's Reflections on Mortality* A gifted surgeon illuminates one of the most profound, awe-inspiring, and deeply affecting achievements of modern day medicine—the movement of organs between bodies—in this exceptional work of death and life that takes its place besides Atul Gawande's *Complications*, Siddhartha Mukherjee's *The Emperor of All Maladies*, and Jerome Groopman's *How Doctors Think*. At the University of Wisconsin, Dr.

Joshua Mezrich creates life from loss, transplanting organs from one body to another. In this intimate, profoundly moving work, he illuminates the extraordinary field of transplantation that enables this kind of miracle to happen every day. When Death Becomes Life is a thrilling look at how science advances on a grand scale to improve human lives. Mezrich examines more than one hundred years of remarkable medical breakthroughs, connecting this fascinating history with the inspiring and heartbreaking stories of his transplant patients. Combining gentle sensitivity with scientific clarity, Mezrich reflects on his calling as a doctor and introduces the modern pioneers who made transplantation a reality—maverick surgeons whose feats of imagination, bold vision, and daring risk taking generated techniques and practices that save millions of lives around the world. Mezrich takes us inside the operating room and unlocks the wondrous process of transplant surgery, a delicate, intense ballet requiring precise timing, breathtaking skill, and at times, creative improvisation. In illuminating this work, Mezrich touches the essence of existence and what it means to be alive. Most physicians fight death, but in transplantation, doctors take from death. Mezrich shares his gratitude and awe for the privilege of being part of this transformative exchange as the dead give their last breath of life to the living. After all, the donors are his patients, too. When Death Becomes Life also engages in fascinating ethical and philosophical debates: How much risk should a healthy person be allowed to take to save someone she loves? Should a patient suffering from alcoholism receive a healthy liver? What defines death, and what role did organ transplantation play in that definition? The human story behind the most exceptional medicine of our time, Mezrich's riveting book is a beautiful, poignant reminder that a life lost can also offer the hope of a new beginning.

Summary of Being Mortal Gawande starts by explaining that doctors in general are never trained to tend to the emotional needs of the patient. The only things that he learned was to identify, diagnose, treat and cure diseases that plagued modern medicine. He was trained to understand the complex science behind the human body, not the mind. He did not realize just how relevant emotions are in real life until he started practicing medicine and treating the dying. There is one case in particular that has a lasting impact on Gawande and changed his world forever. During his stay as a junior surgical resident, Gawande treated a patient by the name of Joseph Lazaroff for cancer. Science had not yet found a cure for his condition, so, not surprisingly, radiation treatment failed. There was only one last option left, and it was to perform surgery on Mr. Lazaroff. While surgery was the only real option left, the doctors were aware there was slim chance of success. In the best case scenario, the surgery would be able to extend his life for a few months, a life confined to a hospital bed. While surgery was an option, it was very high risk. There was a good chance that Mr. Lazaroff would not survive the surgery and on top of that, post-surgery complications were severe. The doctors presented the options to Mr. Lazaroff, and he chose the surgery thinking that it was his best solution. The surgery was performed and two weeks later, Mr. Lazaroff passed away due to complications from the surgery. Looking back at this story, Gawande expresses that there was a failure of the doctors to fully comprehend the reality of Mr. Lazaroff's situation, as well as their own abilities. According to Gawande, the surgery was destined to fail before it even began. The doctors chose not to fully confront this reality of a failure, and hoped blindly for a miracle. The doctors were not able to fully communicate their concerns with the surgery to the patient. Gawande states that the real problem was not the doctors involved, the real problem lay with the professional medical institutions that granted their licenses. They were never taught to provide emotional support for a dying patient. They were never even taught to face the reality of a dying person. Gawande states that doctors are not to blame for cases like this, instead the modern medical system of schooling is. Medical schools do not prepare graduates with the training necessary for the realities of a patient's death. Gawande's book is an examination of how an honest and conscious look at the realities and experiences of the dying can serve to benefit them. Sometimes there is no treatment, remedy, or surgery that can save a life. It is during these times that modern medicine has no answer, and continues put lives in a greater risk than necessary, when they need to face reality and provide the best possible solution. This is a Summary of Atul Gawande's Being Mortal, where this bestselling author tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, Being Mortal asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end. A Complete Summary of Being Mortal: Medicine and What Matters in the End. Being Mortal is a book written by Atul Gawande, and it is a book that closely follows concepts of death, aging and mortality. When trying to bring these topics to his readers as close as possible, Gawande uses many examples from real life. Some of them include examples of case studies of his fellow doctors, while some of them include his own research, which he did while observing his own patients and even family members. This book is also a good guide for people who want to know how to live and how to help their family members through their last days, months or years of life. In his book, Gawande also speaks about how elderly people take care of themselves and how do they live when taking care of themselves becomes impossible because of sickness and/or old age. Here, he tries to objectively comprehend everything that institutions like hospitals, nursing homes and hospices offer. To show his readers that what he is talking about in his book is genuine, Gawande uses many personal stories. Being Mortal is interesting because, even though it talks about 'heavy' topics like mortality, aging and the unavoidable death, it does so by objectively talking about them from the view point of an expert. Reimagining Death

There is no more universal truth in life than death. No matter who you are, it is certain that one day you will die, but the mechanics and understanding of that experience will differ greatly in today's modern age. Dr. Haider Warraich is a young

and brilliant new voice in the conversation about death and dying started by Dr. Sherwin Nuland's classic *How We Die: Reflections on Life's Final Chapter*, and Atul Gawande's recent sensation, *Being Mortal: Medicine and What Matters in the End*. Dr. Warraich takes a broader look at how we die today, from the cellular level up to the very definition of death itself. The most basic aspects of dying—the whys, wheres, whens, and hows—are almost nothing like what they were mere decades ago. Beyond its ecology, epidemiology, and economics, the very ethos of death has changed. *Modern Death*, Dr. Warraich's debut book, will explore the rituals and language of dying that have developed in the last century, and how modern technology has not only changed the hows, whens, and wheres of death, but the what of death. Delving into the vast body of research on the evolving nature of death, *Modern Death* will provide readers with an enriched understanding of how death differs from the past, what our ancestors got right, and how trends and events have transformed this most final of human experiences.

A prominent surgeon argues against modern medical practices that extend life at the expense of quality of life while isolating the dying, outlining suggestions for freer, more fulfilling approaches to death that enable more dignified and comfortable choices.

More and more people are dying in nursing homes and hospitals, often alone and miserable. But there is a better way. Find out about the alternative choices you can make about your medical care to give you more comfort and control at the end of your life. In *Being Mortal* Dr. Atul Gawande's discusses the struggle with mental and physical deterioration that most people experience as the end of their life draws near. We are often persuaded to make health care decisions that will prolong our lives as long as possible, without considering the amount of suffering that we might experience in the process. Dr. Gawande promotes his idea of a better way, in which we trade off a little bit more time for a much better quality of life until the end. You will learn: ?? How to stop unnecessary suffering in the healthcare system ?? Why assisted living facilities are the best option for more freedom and a better quality of life ?? How you can take control of the rest of your life with health decisions that will promote the most comfort until the very end.

The Legacy of Greece

An unforgettable, illuminating story of how men live and how they survive, from the acclaimed *New York Times* bestselling author of *Cutting for Stone* When Abraham Verghese, a physician whose marriage is unraveling, relocates to El Paso, Texas, he hopes to make a fresh start as a staff member at the county hospital. There he meets David Smith, a medical student recovering from drug addiction, and the two men begin a tennis ritual that allows them to shed their inhibitions and find security in the sport they love and with each other. This friendship between doctor and intern grows increasingly rich and complex, more intimate than two men usually allow. Just when it seems nothing can go wrong, the dark beast from David's past emerges once again—and almost everything Verghese has come to trust and believe in is threatened as David spirals out of control.

Being Mortal, by writer Atul Gawande focuses on several critical issues that include death, aging, mortality and critical and terminal illness. This is a summary and review of the original book. Available in a variety of formats, this summary offers you as a reader the opportunity to enjoy great writings. when you might not have the time to read the original book *Being Mortal*, by writer Atul Gawande focuses on several critical issues that include death, aging, mortality and critical and terminal illness. The writer has included vast research and has chronicled stories and experiences of his own patients, patients of other doctors and stories of his members of the family. The story based on these experiences provides information to readers regarding various circumstances, life situations and scenarios, which can facilitate people to find an optimum journey through the final days of their own lives or the lives of their family members. Key Takeaways 1. Nursing homes neither have been created for assisting elderly persons to reduce their level of dependency on another person nor to provide better options than the poorhouses. The purpose for creating nursing homes is clearing hospital beds. 2. Assisted living therefore has risen from the requirement to provide alternative solution to nursing homes, which can make patients more independent and have a better grip over their own lives. 3. Most people, in the later years of their own lives want something more than survival and that is where nursing homes, medical institutions and assisted living fail. 4. People must question what makes life worth living at the time when they get old, are frail, ill and have to depend on another person for their daily care.

Author and physician Atul Gawande analyzes the diverse and problematic landscape of end-of-life care. By providing examples of the good and bad, Gawande shows that we as a society can do much better for the elderly and dying. What does this ZIP Reads Summary Include? Synopsis of the original book A detailed look at our current "medical approach" to death An argument for a more palliative approach to death and dying An in-depth editorial review Background on the author About the Original Book: Gawande's book is a measured, insightful criticism of the medical model of end-of-life care. He convincingly shows that a palliative model of care not only improves the quality of our last days, but it even seems to prolong life better than its counterpart. Anyone interested in end-of-life issues, ethics, gerontology, or medicine will enjoy this book, but Gawande's anecdotal style makes this an appealing,

approachable read for just about anyone. **DISCLAIMER:** This book is intended as a companion to, not a replacement for, *Being Mortal: Medicine and What Matters in the End*. ZIP Reads is wholly responsible for this content and is not associated with the original author in any way.

This is a Summary of Atul Gawande's *Being Mortal*, where this bestselling author tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, *Being Mortal* asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end. Available in a variety of formats, this summary is aimed for those who want to capture the gist of the book but don't have the current time to devour all 304 pages. Doctored: The Disillusionment of an American Physician

Over a decade ago, a landmark ten-year study by the MacArthur Foundation shattered the stereotypes of aging as a process of slow, genetically determined decline. Researchers found that that 70 percent of physical aging, and about 50 percent of mental aging, is determined by lifestyle, the choices we make every day. That means that if we optimize our lifestyles, we can live longer and "die shorter"—compress the decline period into the very end of a fulfilling, active old age. Dr. Roger Landry and his colleagues have spent years bringing the MacArthur Study's findings to life with a program called Masterpiece Living. In Live Long, Die Short, Landry shares the incredible story of that program and lays out a path for anyone, at any point in life, who wants to achieve authentic health and empower themselves to age in a better way. Writing in a friendly, conversational tone, Dr. Landry encourages you to take a "Lifestyle Inventory" to assess where your health stands now and then leads you through his "Ten Tips," for successful aging, each of which is backed by the latest research, real-life stories, and the insights Landry—a former Air Force surgeon and current preventive medicine physician—has gained in his years of experience. The result is a guide that will reshape your conception of what it means to grow old and equip you with the tools you need to lead a long, healthy, happy life.

Summary: Being Mortal: Medicine and What Matters in the End

Being Mortal: A Complete Summary! Being Mortal is a book written by Atul Gawande, and it is a book that closely follows concepts of death, aging and mortality. When trying to bring these topics to his readers as close as possible, Gawande uses many examples from real life. Some of them include examples of case studies of his fellow doctors, while some of them include his own research,

which he did while observing his own patients and even family members. This book is also a good guide for people who want to know how to live and how to help their family members through their last days, months or years of life. In his book, Gawande also speaks about how elderly people take care of themselves and how do they live when taking care of themselves becomes impossible because of sickness and/or old age. Here, he tries to objectively comprehend everything that institutions like hospitals, nursing homes and hospices offer. To show his readers that what he is talking about in his book is genuine, Gawande uses many personal stories. Being Mortal is interesting because, even though it talks about 'heavy' topics like mortality, aging and the unavoidable death, it does so by objectively talking about them from the view point of an expert. Here Is A Preview of What You Will Get: - A summarized version of the book. - You will find the book analyzed to further strengthen your knowledge. - Fun multiple-choice quizzes, along with answers to help you learn about the book.
