When the first BMW 3-series models were launched in 1975, they immediately set the standard by which all other medium-size saloon cars were judged. The later E36 and E46 models, on which this book concentrates, continue the BMW tradition of class-leading refinement, enviable build quality and engineering innovation. In the 3-series, BMW has produced one of the most versatile vehicle designs of recent years, allowing the same basic platform to be used for cars as diverse as the entry-level Compact, the Touring estate models, coupés, convertibles, and the racing-inspired M3. Now available in paperback, this all-color book will fascinate all 3-series owners and enthusiasts.

A blistering romantic suspense novel from the New York Times bestselling author of Pursuit. Far from her sensible life as an English teacher in Kansas, Lora looks forward to a relaxing vacation in Cancun. But fate thwarts her careful plans when a darkly handsome American named Max jumps into her car with a loaded gun.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. Marie, a woman who resided in the dump outside Notley's hometown in the Southwestern desert of America. In this poetical fantasy, Marie becomes the ultimate artist/poet, composing a codex-calligraphy, writings, paintings, collage-from materials left at the dump. She is a "culture of one." The story is told in long-lined, clear-edged poems deliberately stacked so the reader can keep plunging headlong into the events of the book. Culture of One offers further proof of how Notley "has freed herself from any single notion of what poetry should be so that she can go ahead and write what poetry can be" (The Boston Review).

#1 International Best Seller Living a meaningful, satisfying life is an enigma for most people today. We feel stuck, small, without the self-confidence to move in the direction of what we really want. Or, if we do muscle through our fear in pursuit of our dreams, we exhaust ourselves working and striving and achieving and yet somehow, no matter our level of outer-world success, are left dazed and disheartened, asking ourselves, "Is this all there is?" Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting

refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the
