Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, or lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

On his first international tour with the prestigious National Ballet of Canada, dancer David Knight is the unfortunate wing man to his best friend as they gawk in Amsterdam's famous red-light district. He'd jet lagged, tired from punishing rehearsals and just wants to crawl into his hotel bed. But when two thugs grab him and knock him out, he's thrown into a world he only knows through spy novels. David is brought to a clinic owned by Billionaire Richard Reynolds who has a problem. A prototype for a device that can save his company has gone missing and its location is locked up in the memories of very dead cold war spy. To find the device he needs David to 'host' the last 30 seconds of the spy's memories to extract the location. But the procedure goes awry. All the spy's memories flow into David, and the memories aren't happy. The memories take over Davis and breaks him free from Reynold's clinic. He stumbles into the Amsterdam night. Dazed and disoriented. Reynolds needs him alive to find the device, while a TV evangelist wants him dead as the device could derail the millions of dollars of donations his ministry receives every day. "Sheer pleasure. . . . Wonderfully entertaining."--Chicago Sun-Times Acclaimed by Norman Mailer more than twenty years ago as "possibly the only American writer of genius," William S. Burroughs has produced a body of work unique in our time. In these scintillating essays, he writes wittily and wisely about himself, his interests, his influences, his friends and foes. He offers candid and not always flattering assessments of such diverse writers as Ernest Hemingway, F. Scott Fitzgerald, Joseph Conrad, Graham Greene, Jack Kerouac, Allen Ginsberg, Samuel Beckett, and Marcel Proust. He ruminates on science and the often dubious paths into which it seems intent on leading us, whether into outer or inner space. He reviews his reviewers, explains his famous "cut-up" method, and discusses the role coincidence has played in his life and work. As satirist and parodist, William Burroughs has no peer, as these varied works, written over three decades, amply reveal.

The complete works of one of England's greatest Edwardian writers Saki is perhaps the most graceful spokesman for England's 'Golden Afternoon' - the slow and peaceful years before the First World War. Although, like so many of his generation, he died tragically young, in action on the Western Front, his reputation as a writer continued to grow long after his death. His work is humorous, satiric, supernatural, and macabre, highly individual, full of eccentric wit and unconventional situations. With his great gift as a social satirist of his contemporary upper-class Edwardian world, Saki is one of the few undisputed English masters of the short story and one of the great writers of a bygone era. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.
