***This proceedings is a
collection of 46 selected
papers that were
presented at the 12th
International Wheat
Genetics Symposium
(IWGS). Since the launch
of the wheat genome
sequencing project in***

2005, the arrival of draft genome sequences has marked a new era in wheat genetics and genomics, catalyzing rapid advancement in the field. This book provides a comprehensive review of the forefront of wheat research, across various important topics such as germplasm and genetic diversity, cytogenetics and allopolyploid evolution, genome sequencing, structural and functional genomics, gene function and molecular biology, biotic

stress, abiotic stress, grain quality, and classical and molecular breeding. Following an introduction, 9 parts of the book are dedicated to each of these topics. A final, 11th part entitled "Toward Sustainable Wheat Production" contains 7 excellent papers that were presented in the 12th IWGS Special Session supported by the OECD. With rapid population growth and radical climate changes, the world faces a global food

crisis and is in need of another Green Revolution to boost yields of wheat and other widely grown staple crops. Although this book focuses on wheat, many of the newly developed techniques and results presented here can be applied to other plant species with large and complex genomes. As such, this volume is highly recommended for all students and researchers in wheat sciences and related plant sciences and for those who are interested in

seemingly endless. To
describe them all would***

be to describe the entire history of sewing. In The Art of manipulating Fabric, Colette Wolff has set herself just this task, and she succeeds brilliantly. Working from the simplest possible form - a flat piece of cloth and a threaded needle - she categorizes all major dimensional techniques, show how they are related, and give examples of variations both traditional and modern. The result is an encyclopedia of techniques that

To respond to the increasing need to feed the world's population as well as an ever greater demand for a balanced and healthy diet there is a continuing need to produce improved new cultivars or varieties of plants, particularly crop plants. The strategies used to produce these are increasingly based on our knowledge of relevant science,

First performed in a hit off-off-Broadway production, and soon to be a film starring Sigourney Weaver and Anthony LaPaglia, The Guys is a timeless drama about the surprising truths people can discover in ordinary lives, and the connections we make with others and ourselves in times of tragedy. Paralyzed by grief and unable to put his thoughts into words, Nick, a fire captain, seeks out the help of a writer to

compose eulogies for the colleagues and friends he lost in the catastrophic events of September 11, 2001. As Joan, an editor by trade, draws Nick out about “the guys,” powerful profiles emerge, revealing vivid personalities and the substance and meaning that lie beneath the surface of seemingly unremarkable people. As the individual talents and enthusiasms of the people within the small firehouse community are realized, we come to understand the uniqueness and value of what each

definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to

master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. battleship will explode in a Cuban harbor, plunging the U.S. into war. Spanning five years and half a dozen countries, this is the unforgettable story of that extraordinary moment: the turn of the twentieth century, as seen by one of the greatest storytellers of our time. Shot through with a lyrical intensity and stunning detail that recall Doctorow and Deadwood both, A Moment in the Sun takes the whole era in its sights—from the white-racist coup in Wilmington, North Carolina to the bloody dawn of U.S. interventionism in the Philippines. Beginning with Hod Brackenridge searching for his fortune in the North, and hurtling forward on the voices of a breathtaking range of men and women—Royal Scott, an

African American infantryman whose life outside the military has been destroyed; Diosdado Concepción, a Filipino insurgent fighting against his country's new colonizers; and more than a dozen others, Mark Twain and President McKinley's assassin among them—this is a story as big as its subject: history rediscovered through the lives of the people who made it happen.

What shapes the cultural, political and ideological values of young people living in Southeastern Europe? Which identities matter to them? How are their values changing, and how can they be changed? Who is changing them? Europe's periphery is the testing ground for the success of European values and identities.

The future stability and political coherence of the Union will be determined in large measure by identity issues in this region. This book examines the ways in which ethnic and national values and identities have been surpassed as the overriding focus in the lives of the region's youth. Employing bottom-up, ethnographic, and interview-based approaches, it explores when and where ethnic and national identification processes become salient. Using intra-national and international comparisons of youth populations of Albania, Bosnia-Herzegovina, Croatia, Macedonia, Montenegro, and Serbia, contributors uncover the mechanisms by which ethnic identities are evoked, reproduced and challenged. In addition to

exploring political, regional cultural generational and class identities, the contributors examine wider questions of European unity. This volume offers a corrective to previous thinking about youth ethnic identities and will prove useful to scholars in political science and sociology studying issues of ethnic and national identities and nationalism, as well as youth cultures and identities. Roger Ebert's *I Hated Hated Hated This Movie*, which gathered some of his most scathing reviews, was a best-seller. This new collection continues the tradition, reviewing not only movies that were at the bottom of the barrel, but also movies that he found underneath the barrel. From Roger's review of *Deuce Bigalow: European Gigolo* (0

stars): "The movie created a spot of controversy in February 2005. According to a story by Larry Carroll of MTV News, Rob Schneider took offense when Patrick Goldstein of the Los Angeles Times listed this year's Best Picture nominees and wrote that they were 'ignored, unloved, and turned down flat by most of the same studios that . . . bankroll hundreds of sequels, including a follow-up to Deuce Bigalow: Male Gigolo, a film that was sadly overlooked at Oscar time because apparently nobody had the foresight to invent a category for Best Running Penis Joke Delivered by a Third-Rate Comic.' Schneider retaliated by attacking Goldstein in full-page ads in Daily Variety and the Hollywood Reporter. In an open

letter to Goldstein, Schneider wrote: 'Well, Mr. Goldstein, I decided to do some research to find out what awards you have won. I went online and found that you have won nothing. Absolutely nothing. No journalistic awards of any kind. . . . Maybe you didn't win a Pulitzer Prize because they haven't invented a category for Best Third-Rate, Unfunny Pompous Reporter Who's Never Been Acknowledged by His Peers. . . .' Schneider was nominated for a 2000 Razzie Award for Worst Supporting Actor, but lost to Jar-Jar Binks. But Schneider is correct, and Patrick Goldstein has not yet won a Pulitzer Prize. Therefore, Goldstein is not qualified to complain that Columbia financed Deuce Bigalow: European Gigolo while passing on the

opportunity to participate in Million Dollar Baby, Ray, The Aviator, Sideways, and Finding Neverland. As chance would have it, I have won the Pulitzer Prize, and so I am qualified. Speaking in my official capacity as a Pulitzer Prize winner, Mr. Schneider, your movie sucks." What's It Like to Be Married to Me? is about knowing the difference between having a desire for a better marriage and setting the goal of a better marriage—as readers look in the mirror to see how they can change. Bestselling author Linda Dillow understands that most women want more from their marriage but don't know how to get it. In What's It Like to Be Married to Me?, Dillow challenges readers to ask the riskiest questions: What is is like to be married to me? What is

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of

political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia. This book is dedicated to international cooperation, understanding and peace. It is the end result of several years of cooperative work between scientists of three countries: the United States, Germany, and Portugal. The work presented, however, draws from a much broader base, hopefully achieving the objective of NATO

Advanced Research Workshops, which have been established to allow and stimulate the exchange of new ideas and the synthesis of information by scientists of NATO countries. The tasks of the workshop were several; to review established methodologies that have provided insight into ecosystem function and adaptations of plants in mediterranean climate zones; to examine new methodologies that have recently been applied in ecological studies and have provided new types of information; to summarize recent studies in mediterranean regions of plant

water relations, photosynthesis and production, mineral nutrition, plant growth and development, and response to fire; to stimulate in particular an exchange of information among scientists of European Mediterranean countries; and to discuss means by which all of these objectives might be even more effectively achieved in the future through cooperative international research efforts. This variety of themes is clearly evident in the layout of the book. Held in Sesimbra, Portugal in October of 1985, the workshop took place in a ..
