Seventh-grader John "Crash" Coogan has always been comfortable with his tough, aggressive behavior, until his relationship with an unusual Quaker boy and his grandfather's stroke make him consider the meaning of friendship and the importance of family.

Jeffersonian Economic Architecture in the Digital Age By: Robert S. Ellinger Ph.D
Jeffersonian Economic Architecture in the Digital Age is a book focused on how to

synergically adapt to the catastrophic change in culture that humanity is currently undergoing. This is due to seismic change in technology at the dawn of the Digital Age. The author Robert S. Ellinger Ph.D. has created an architectural model using concepts from a variety of academic disciplines including spatial economics, history, systems engineering, information technology, enterprise architecture, and political science. He uses this model to demonstrate how humanity adapted to technology change in the past. He then transforms this model for the future Digital Age. And he does this while keeping Jefferson's

This collection employs a multi-disciplinary approach treating ancient childhood in a holistic manner according to diachronic, regional and thematic perspectives. This multi-disciplinary approach encompasses classical studies, Egyptology, ancient history and the broad spectrum of archaeology, including iconography and bioarchaeology. With a chronological range of the Bronze Age to Byzantium and regional coverage of Egypt,

Greece, and Italy this is the largest survey of childhood yet undertaken for the ancient world. Within this chronological and regional framework both the social construction of childhood and the child's life experience are explored through the key topics of the definition of childhood, daily life, religion and ritual, death, and the information provided by bioarchaeology. No other volume to date provides such a comprehensive, systematic and cross-cultural study of childhood in the ancient Mediterranean world. In particular, its focus on the identification of society-specific definitions of childhood and the incorporation of the

bioarchaeological perspective makes this work a unique and innovative study. Children in Antiquity provides an invaluable and unrivalled resource for anyone working on all aspects of the lives and deaths of children in the ancient Mediterranean world.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine. The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine;

uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal

battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Never in American political history has there been so momentous a reversal of fortunes as that of Richard Nixon. How did it happen? What is this man's legacy to us all? These

are among the questions explored by the staff of the Washington Post in the most penetrating examination of Nixon the man and the Nixon years ever put together. It is a story that begins with a small boy in a California town dreaming of distant places and golden opportunities. It is a story that climaxes with a man who achieved his dreams, yet more than anyone else was the instrument of their destruction. Richard Nixon, the people around him, and the controversies that have swirled throughout his entire career are brilliantly illuminated here. This is unforgettable human drama, and essential reading for all Americans.

Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara's older brothers became violent. When

Gecko doesn't want to go back to Juvenile Detention, but trouble somehow always finds him... Graham "Gecko" Fosse drove the getaway car for a robbery he didn't even know was going down. But that doesn't keep him out of Juvie – the worst place he has ever been.

It's a place where its inmates, some convicted teenage killers, could easily write an encyclopedia on how to inflict pain.

Thankfully, do-gooder Douglas Healy shows up, giving Gecko a chance to swap the slammer for a halfway house lived in by two other young criminals. There are just three crucial

conditions – the three boys must stay in school and out of trouble, all while staying on Social Services' good side. Or else it's back to Juvie for all of them. But Terence seems bent on getting himself into trouble – the boys catch him sneaking down the fire escape, off to pull another heist. If only their fight hadn't gotten physical and Healy hadn't wound up in the hospital with amnesia. If only Gecko wasn't falling for a girl whose dad's best friend was the Deputy Police chief. And that's just the beginning of their problems. One thing's for certain: if the boys are found out, their second chance will

During the twentieth century, medicine has been radically transformed and powerfully transformative. In 1900, western medicine was important to philanthropy and public health, but it was marginal to the state, the industrial economy and the welfare of most individuals. It is now central to these aspects of life. Our prospects seem increasingly dependent on the progress of bio-medical sciences and genetic technologies which promise to reshape future generations. The editors of Medicine in the Twentieth Century have commissioned over forty

In her own singularly beautiful style, Newbery Medal winner Sharon Creech intricately weaves together two tales, one funny, one bittersweet, to create a heartwarming, compelling, and utterly moving story of love, loss, and the complexity of human emotion. Thirteen-year-old Salamanca Tree Hiddle, proud of her country roots and the "Indian-ness in her blood," travels from Ohio to Idaho with her eccentric grandparents.

Along the way, she tells them of the story of Phoebe Winterbottom, who received mysterious messages, who met a "potential lunatic," and whose mother disappeared. As Sal entertains her grandparents with Phoebe's outrageous story, her own story begins to unfold—the story of a thirteen-year-old girl whose only wish is to be reunited with her missing mother.

In a future where most people have computer implants in their heads to control their environment, a boy meets an unusual girl who is in serious trouble.

By reviving his memories of his old high school gym warehouse, Dohyun tries to find out who tortures him. His delusional kidnapper viciously recreates past occurrences that happened there. While trying to win the upper hand, Dohyun unleashes even more of Sungho's controlling energy. When Dohyun collects more and more pieces of the puzzle, he realizes that there is a deeper issue of careless behavior to the whole story... This is the Young Adult Edition, edited for young readers. Perhaps it's Love, the original element, which gives this book its name, concerns four young adults that play a vital role to follow their hearts; sometimes without adequate preparation, or the appropriate equipment as a test of the will. This of course, nearly

crushes each person's spirit. In one-way or another, each youth is linked to each other (ages between 18 and 21). The novel is primarily concerned with choices in love, in some cases a manifesto about its dangers. At the end it, it must be said, nothing was tolerable but the best. No one was without sin. Four youths [1967-68], while being in the process of growth get stirred up quite a lot, some even lost in the commotion of events, while feelings become nourished and intensified, all aching for love, in their own way. A lesson might well be learned if they can only harness their crying hearts; but first

Tumblr and its users have been hugely influential in creating and shifting popular culture, especially progressive youth culture, with the New York Times referring to 2014 as the dawning of the “age of Tumblr activism.” Perfect for those unfamiliar with the platform as well as those who grew up with it, this volume contains essays and artwork that span many different topics: fandom; platform structure and design; race, gender and sexuality, including queer and trans identities; aesthetics; disability and mental health; and social media privacy and ethics. An entire generation of young people that is now beginning to influence mass culture and politics carries a love of age on Tumblr, and this volume is an indispensable guide to the many ways this platform works.

Very few King's earn the appellation 'Great'. Alfred is the only English King honoured with this name and is credited with various successes (the foundation of a navy, English education system and religious revival). His memory looms large in the English Imagination. The medieval 'Life' of King Alfred of Wessex purports to be written by Asser, a monk in the King's service. This account of one of England's best loved and most famous kings has been accepted as offering evidence on many aspects of life in early medieval England and beyond. It was used in Victorian times to create a 'Cult' of Alfred. Alfred Smyth offers a carefully annotated translation of the 'Life' together with a long commentary. He argues that the 'Life' is a forgery which has profound implications not only for our
