Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it [good] or [bad]. Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis: suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are television critics of all backgrounds.

A Visual Guide to Understanding and Maintaining Your Home

The story of two people who begin to love each other as boy and girl. Some mysterious agency seems to be at work, all through the story, in their behalf; for though apparently separated as children forever, they are brought together again by a most singular chain of circumstances. Apparitions and other strange hallucinations abound in the work. Altogether a pleasantly weird and odd story, and very much different from Wilkie Collins' other novels.

This book is intended for the homeowners of older houses who appreciate the beauty, tradition, and fine craftsmanship of their older homes and who wish to maintain and restore them in a way that is true to their individual histories.

Have you ever wondered how you can find out more about a word? Where did it come from? How has its meaning altered? How can it be pronounced? What is its relationship to other words? Language is not fixed, but is an evolutionary process: words develop and change, in meaning, association, and pronunciation, as well as in many other ways. Exploring the routes taken by the words we choose to investigate leads us on fascinating journeys. How to Read a Word, written by the noted lexicographer Elizabeth Knowles, shows us how we might delve into the origins, associations, and evolution

of words, and is primarily concerned with the following two points: what questions can be asked about a word? And how can they be answered? Utilising the unrivalled resources and the language-monitoring programs of the Oxford English Dictionary, the book leads you through the various stages of investigation into the myriad aspects of individual words, from etymology to date of first use and regional distribution, and from spelling and pronunciation to shifts in meaning. Supported by many examples of investigation into specific words, and featuring a full index, a wide selection of useful online resources, and reams of useful tips for avoiding common pitfalls, it is both a thought-provoking and practical handbook, providing readers with the essential tools to confidently interrogate the words by which they are surrounded. How to Read a Word is the perfect gift for anyone who is fascinated by the development and intricacies of the English language.

Providing a practical introduction for students of electronic music, installation, and sound-art to the craft of making, this text covers the basics of practical circuitry. It tours the world of electronics, encouraging artists to get to know the inner workings of basic electronic devices.

From "Silicon Valley's Martha Stewart" comes a new manifesto for the modern homemaker in the digital age. Over the past three generations, the rules of homemaking and our very notions of what a homemaker is and does have radically changed. We are still a nation of makers, but we are crafting and creating beyond the home, in both the analog and digital worlds. And in the next ten years "making" and "homemaking" will evolve further. Tomorrow's women will find themselves actually manufacturing everything from decor to clothing, from right inside their homes. In Homemakers, Brit Main, founder of the wildly popular lifestyle brand and website Brit + Co., reimagines homemaking for the twenty-first century. While today's generation thrives in the virtual world, they like to work and create in the physical world. Morin inspires you to combine the best of analog and digital, to help you reconnect with your inner creative child—the one who used to love to draw, to build, and to play—to make your home a more creative, functional, and beautiful place. Full of captivating, colorful spreads, step-by-step DIYs, tips, and unique ideas, Homemakers explores a range of domestic skills room by room in a house, from cooking advice in the kitchen to health and beauty tips in the bathroom. Simple, beautiful, and stylish, it offer ideas for creative living to encourage and enable the digital generation to make.

Non-fiction Biography / history Ireland - War of Independence/Civil War Description: An in-depth study of the death of Michael Collins, hero of the 1916 Easter Rising, and leader of Ireland's War of Independence. This book offers a startling new perspective on one of history's most notorious unsolved mysteries: his fatal shooting in 1922, while Commander-in-Chief of newly-independent Ireland. Its controversial reconstruction of events at Beal na mBlath may be shocking to some: yet demonstrably fits the known facts and eyewitness accounts. This is the first book on this famous "cold case" in decades; carrying on where John Feehan's landmark edition of 1991 left off. It presents the most complete overview of the evidence ever published; as well as an itemized catalogue of the various witnesses' mutual contradictions and corroborations."

Hey kids, do you want to know how to make all-stars for your baseball league? Or parents, do you feel like the coaches keep passing your child up? Well no more! Or coaches, want drills and ways to motivate your players to get better? Coach Andy Collins is going to tell you everything he knows from his 35 years of youth and adult coaching and watching what works and what doesn't work. It's chock-full of ideas in 86 pages. He'll cover: * How your league chooses all-stars * What all-star selectors are really looking for * 7 tried and true methods of getting better at baseball * But more importantly, little known ways to get the people picking the team to notice you * And how to beat the "politics" that seem to get in the way Year after year kids sit in the stands crying after the all-star teams are announced and they weren't one of the players that were chosen. At the same time the students I've trained do make those same all-star teams. It was then I realized I had the information that the kids in the stands and their parents and coaches were looking for. Whoever there are kids around the world that play youth baseball, there are kids that long to make the league's all-star team. Every year it's the same, kids that desperately want to have their name called out (or see it announced on the list) don't make it, and a little bit of them is hurting deep inside; and they don't know why they were not picked. Little did they know that they could have fairly accurately predicted their chances almost from day one of when the season started. And if they knew what you're about the find out, they could improve enough in skill in the eyes of the all-star selectors as to be a better player or even make the all-star team. The good news is that in this book, there is a way to learn how to make the all-star team for the next upcoming season; and if not then, the following year (if you're willing to listen and follow the advice I give). While I have written this for parents and coaches to learn how this process works and how they can help these youngsters achieve their dreams, this is mostly a book written for the kid who wants to make all-stars, not a book for the parent who wants their kid to make all-stars (there is a difference). And it will be in that voice that this book will be written.

Based on the popular Artech House classic, Digital Communication Systems Engineering with Software-Defined Radio, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters, as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

A man's home is his castle, or so the saying goes, but could it withstand an attack by Attila and the Huns, Ragnar and the Vikings, Alexander and the Greeks, Genghis Khan and the Mongols, or Tamerlane and the Tartars? Backyard Ballistics author William Gurstelle poses this fascinating question to modern-day garage warriors and shows them how to build an arsenal of ancient artillery and fortifications aimed at withstanding these invading hordes. Each chapter introduces a new bad actor in the history of warfare, details his conquests, and features weapons and fortifications to defend against him and his minions. Clear step-by-step instructions, diagrams, and photographs show how to build a dozen projects, including "Da Vinci's Catapult," "Carpin's Crossbow," a "Crusader-Proof Moat," "Alexander's Tortoise," and the "Cheval-de-frise." With a strong emphasis on safety, the book also gives tips on troubleshooting, explains the physics behind many of the projects, and shows where to buy the materials. By the time they've reached the last page, at-home defenders everywhere will have succeeded in creating a fully fortified home.

More than half-a-million business leaders have discovered the power of the StoryBrand Framework, created by New York Times best-selling author and marketing expert Donald Miller. And they are making millions. If you use the wrong words to talk about your product, nobody will buy it. Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers. The StoryBrand process is a proven solution to the struggle business leaders face when talking about their companies. Without a clear, distinct message, customers will not understand what you can do for them and are unwilling to engage, causing you to lose potential sales, opportunities for customer engagement, and much more. In Building a StoryBrand, Donald Miller teaches marketers and business owners to use the seven universal elements of powerful stories to dramatically improve how they connect with customers and grow their businesses. His proven process has helped thousands of companies engage with their existing customers, giving them the ultimate competitive advantage. Building a StoryBrand does this by teaching you: The seven universal story points all humans respond to; The real reason customers make purchases; How to simplify a brand message so people understand it; and How to create the most effective messaging for websites, brochures, and social media. Whether you are the marketing director of a multibillion-dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, Building a StoryBrand will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers.
