

## Core Curriculum For Maternal Newborn Nursing Ebooks Www

A classic text since it was first published in 1974, the Lippincott Manual for Nursing Practice (LMNP) has provided essential nursing knowledge and up-to-date information on patient care for nearly 40 years. Now in its 10th edition, this full-color text continues to serve as the most comprehensive reference for practicing nurses and nursing students worldwide. Often referred as the 'Lippincott Manual' or simply the 'Lippincott', the LMNP is widely used as a procedure manual for many healthcare institutions (contains 157 Nursing Procedure Guidelines). It is also widely regarded as the Gold Standard for nursing practice in the classroom. Organized into five major parts, LMNP presents a comprehensive reference for all types of core nursing care. Part 1: Nursing Process & Practice; Part 2: Medical-Surgical Nursing; Part 3: Maternity & Neonatal Nursing; Part 4: Pediatric Nursing; Part 5: Psychiatric Nursing. Content is evidence-based with supporting articles highlighted in actual entries and procedure guidelines. Official Guidelines that shape practice are incorporated in to the content and include those from the National Institutes of Health, American Diabetes Association, American Heart Association, American Nurses Association, Joint Commission, AWHONN, and others. A companion Website includes full text, an image bank, and drug-related NCLEX®-style questions, FDA updates, and new clinical studies.

This second edition provides the core knowledge required to skillfully carry out all daily clinical responsibilities. Current, updated coverage examines human reproduction, genetics, high-risk pregnancies, labor and delivery risk, and much more. An official publication of the Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN), Perinatal Nursing, Fourth Edition presents up-to-date information based on the most rigorous evidence and offers suggestions for best practices. This new edition of the authoritative, comprehensive text used by perinatal nurses worldwide features a wealth of new content to keep practice current. New chapters related to patient safety and the development of a highly reliable perinatal unit, inform nurses how to conduct team training and drills for obstetric emergencies, create checklists, and effectively handoff patients. It features expanded coverage of high-risk pregnancy, from bleeding in pregnancy to preterm labor and birth, diabetes, cardiac disease, pulmonary complications, multiple gestation, and benefits of breastfeeding, nutritional components, and preterm milk and lactation. Using an outcome-based, contemporary approach, AWHONN's Core Curriculum for Maternal-Newborn Nursing, 4th Edition provides essential knowledge for care through every stage of pregnancy and childbirth. It is also the definitive resource in preparing for the AWHONN certification examination. A concise, outline format covers concepts of reproduction, fetal development, normal pregnancy, the intrapartum and postpartum periods, the normal newborn, complications in the mother and the newborn, and ethical and legal issues. Edited by two well-respected authors, Susan Mattson, RNC, CTM, PhD, FAAN, and Judy Smith, PhD, RNP-C, this is the only book that includes AWHONN-endorsed content for the practice of maternal-newborn nursing! A bulleted, outline format provides quick review and reference on the management of pregnant women and their newborns through all stages of care. AWHONN-endorsed content makes this the definitive resource in preparing for current practice and for AWHONN specialty nursing certification exams. Case studies and review questions reflect the realities of practice and help you prepare for certification exams. Coverage of outpatient and inpatient care includes families, ethics, legal issues, research, case management, genetics and genetic counseling, and the transition to home and parenthood. New evidence-based practice content includes the latest research and best practice standards for maternal-newborn patient care. New National Institute of Child Health & Human Development (NICHD) terminology fosters interdisciplinary communication and ensures greater accuracy and precision. New patient safety and risk management strategies help in improving outcomes, reducing complications, and increasing patient safety. New information on the latest assessment and monitoring devices describes new applications of technology and the resulting benefits to patient care.

AWHONN's Perinatal Nursing  
Saving Lives, Saving the Future  
An Interprofessional Approach  
Core Curriculum for Neonatal Intensive Care Nursing  
Maternal Newborn Nursing Exam Study System

Handbook of Pediatric Surgical Patient Care focuses on the decision-making process in the overall management of the pediatric surgical patient and provides guidelines for diagnosis. The book covers topics ranging from a wide spectrum of neonatal conditions and surgical critical care to other childhood afflictions, pediatric cancer and the injured child. It also focuses on the current management of common childhood conditions including appendicitis, pyloric stenosis and hernias. The purpose of this handbook is to provide a brief, easily accessible, and up-to-date source of contemporary information to students, residents and practitioners caring for infants and children with surgical disorders.

Suitable for students and practitioners in the clinical setting, this book provides at-a-glance coverage of antepartum, intrapartum, and postpartum care of women and infants, as well as childbearing complications and women's health. It also includes step-by-step descriptions of common procedures in maternal-newborn nursing.

Coverage of outpatient and inpatient care includes families, ethics, legal issues, research, case management, genetics and genetic counseling, and the transition to home and parenthood. --

Providing essential knowledge for today's maternal-newborn nursing practice, the new edition of this practical reference also contains new chapters on domestic violence and ethical decision-making. Normal pregnancies and deliveries appear in separate sections for ease of use.

Core Curriculum for Lactation Consultant Practice

Disease Control Priorities, Third Edition (Volume 2)

Physical Assessment of the Newborn

Outlines and Highlights for Core Curriculum for Maternal-Newborn Nursing by Susan Mattson, Judy E Smith, ISBN

Olds' Maternal-Newborn Nursing & Women's Health Across the Lifespan with MyNursingLab (Access Card)

This established text covers the full range of obstetric ultrasound examinations that a sonographer would be expected to perform in a general hospital or secondary referral setting, and is the only text that combines the practicalities of learning how to perform these examinations with the information needed to carry them out in a clinical setting. It encourages students to think about their practice and provides the sonographer with the necessary tools to provide a 'gold standard' service.

The only exam review for the two leading neonatal critical-care nursing certification examinations, Certification and Core Review for Neonatal Intensive Care Nursing, 4th Edition prepares you for your exam with realistic questions and test simulation. Based on the blueprints of the AACN's CCRN-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the information in Core Curriculum for Neonatal Intensive Care Nursing, 3rd Edition, and reflect essential knowledge, the latest evidence, and best practices. A total of 600 questions and answers with rationales are provided. Developed by the AACN, AWHONN, and NANN, this powerful review tool offers excellent preparation for your certification exam! This title includes additional digital

media when purchased in print format. For this digital book edition, media content is not included. Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN), the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Answers are provided for each question, accompanied by rationales and references to enhance your understanding of the material. Realistic exam practice is offered through questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Updated questions reflect the information in Core Curriculum for Neonatal Intensive Care Nursing, 4th Edition, and the latest test plans by both AACN and NCC. Complete remediation includes rationales for both correct and incorrect answers. A compact, portable size makes the book easier to study anytime, anywhere.

Presented in a concise and consistent outline format, each chapter in this valuable reference walks readers through the neonatal condition including the definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes.

Based on the IBLCE exam blueprint, this updated resource allows aspiring and established lactation consultants to assess their knowledge, experience, and expertise in developing an effective study plan for certification. The Second Edition of this text, contributed to by Rebecca Mannel, Patricia J. Martins, and Marsha Walker, has been updated and is the perfect resource to study for the certification exam.

A Nursing Orientation and Care Guide in a Nutshell

How, Why and When

Core Curriculum for Neonatal Intensive Care Nursing - E-Book

Core Curriculum for Maternal-Newborn Nursing E-Book

Principles and Practice

Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101's Textbook Specific. Accompany: 9781437715767.

In-depth, state-of-the-art guidance covers everything that readers must know to excel in neonatal intensive care nursing including newborn assessment, resuscitation, all major cardiopulmonary disorders, surfactant replacement, ECMO, and high-frequency ventilation. Content appears in outline format for fast, convenient review. Study questions reinforce knowledge and facilitate certification preparation.

Ensures you're referencing the most accurate information surrounding nursing practice in today's neonatal intensive care unit with AWHONN's Core Curriculum for Maternal-Newborn Nursing, 6th Edition. Developed by one of the most authoritative associations in neonatal intensive nursing care, AWHONN, this renowned guide provides in-depth coverage of the most common neonatal disorders and their management — focusing on the latest evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications. Additionally, the concise outline format makes information easy to find as it highlights the essentials of each condition including the definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes. With timely content that sets the standard for neonatal nursing practice, this trusted reference is an excellent resource for practicing nurses working in any NICU worldwide. Content developed by AWHONN, one of the most authoritative associations in neonatal intensive care nursing, ensures the information is both accurate and relevant. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Full-scope coverage of neonatal nursing practice provides information on families, ethics, legal issues, research, case management, the transition to home, and evidence-based practice related to preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. Strategies to promote inclusionary care better reflect today's nursing care today with a focus on family-centered care, comprehensive perinatal records, health care teams in the NICU, and infant care best practices. NEW! Expanded information on breastfeeding and acquired opioid dependency keep you informed with the latest best practices related to these two ever-changing areas. NEW! Updated neonatal resuscitation guidelines ensures you follow the most up-to-date protocols and procedures in this critical skill area. NEW! Additional tables and boxes help you quickly find important information.

The midwife's role is examined in the community and family-health context in this handbook on effective maternal and newborn care for midwives and other healthcare providers. The skills, competencies, and knowledge required to make informed decisions about neo- and postnatal care are covered, including anatomy and the physiology of reproduction, high-risk pregnancies, and labor and birth. Theoretical and practical issues illuminate a midwife's role in the prevention of illness in mothers and babies, with attention to the unique challenges of midwifery in developing nations. Insights from current research studies and critical questions about midwife practice will help those new to health care understand the unique challenges of this form of health-service delivery.

Emergency Nursing Core Curriculum - E-Book

Merenstein & Gardner's Handbook of Neonatal Intensive Care - E-Book

Certification and Core Review for Neonatal Intensive Care Nursing - E-Book

Care of the Childbearing and Childbearing Family

AWHONN's High-Risk & Critical Care Obstetrics

Emergency Nursing Core Curriculum, 7th Edition, presents a clear, concise, and thorough overview of emergency nursing. Authored by the Emergency Nurses Association (ENA), this new edition includes updated information on cancer guidelines, diabetes, HIPAA information and more! Building upon the strengths of previous editions, new photographs and illustrations make content more accessible, bringing essential concepts to life. This edition provides nurses with an invaluable resource for certification review. Used by practicing emergency nurses at all levels, this highly-respected resource is essential for gaining knowledge, developing practice standards, and improving quality of care. Authored by ENA, you can rely on this text to be the most authoritative and up-to-date resource available. The text's outline format and alphabetical listing of the Clinical Emergencies chapters mean you can find the information you need – fast! NEW! Updated content incorporates the latest information about: New types of insulin Cancer statistics Stroke guidelines HIPAA information Healthy People 2020 Sepsis protocols Forensic Aspects of Emergency Nursing Violence in the ED Palliative care ENA-authored ensures text is the most authoritative and up-to-date resource available. NEW! Reorganized unit on trauma emergencies makes facts more easy to find. Updated outline and alphabetical listing of the Clinical Emergencies chapters makes information quickly accessible. NEW! Additional illustrations and tables enhance your understanding of key information.

Maternal-Neonatal Nursing Made Incredibly Easy! Second Edition offers everything nurses need to know for optimal maternal-neonatal nursing care. This thoroughly updated edition includes new information on bed rest, postpartum depression, alternative therapies, substance abuse, and complex psychosocial disorders, plus a new icon highlighting evidence-based practice. The book is written in the entertaining, award-winning Incredibly Easy! style, with numerous charts and illustrations, two four-page full-color inserts, humorous cartoons, icons emphasizing key information, memory joggers, and end-of-chapter quick quizzes. A bound-in CD-ROM contains more than 250 NCLEX®-style questions, as well as concept maps and lists of disorders with their associated nursing diagnoses.

Make sure you fully understand how to care for women and newborns! Foundations of Maternal-Newborn and Women's Health Nursing, 7th Edition integrates essential maternity information into the overall continuum of nursing care to show how to provide safe care in the clinical setting. With easy-to-understand language, this evidence-based text includes evidence-based guidelines and step-by-step instructions for assessments and interventions to help you quickly master key skills and techniques. Also emphasized is the importance of understanding family, communication, culture, and clinical decision making. This edition reflects the latest QSEN competencies, and the accompanying Evolve website includes review questions to prepare students for the NCLEX® exam! Safety checks integrated into the content help you develop competencies related to safe nursing practice. Unfolding case studies help you apply what you've learned to practice.

UPDATED Evidence-Based Practice boxes highlight the latest research and the most current QSEN (Quality and Safety Education for Nurses) practice guidelines for quality care. Patient teaching boxes provide teaching guidelines, including communication guides, directed at patients and families. Critical to Remember boxes highlight and summarize need-to-know information. Critical Thinking exercises focus on clinical situations designed to test your skills in prioritizing and critical thinking. Nursing Care Plans help you apply the nursing process to clinical situations. Chapter summaries appear at the end of each chapter and help you review core content in each chapter while on the go. Updated Drug guides list important indications, adverse reactions, and nursing considerations for the most commonly used medications. Procedure boxes provide clear instructions for performing common maternity skills, with rationales for each step. UNIQUE! Therapeutic boxes present concise nurse-patient dialogues, identifying communication techniques and showing a responsible, nonconfrontational communication blocks. Knowledge check helps you assess your mastery of key content. Glossary provides definitions of all key terms. NEW! Reorganized content integrates complications into clinical care, includes new sections on obesity, and recommendations for infant safe sleep environment and reductions of SIDS risk. NEW! Contributing content from known experts in the field of Maternal and Women's Health include a former AWHONN president.

Co-authored by an interprofessional collaborative team of physicians and nurses, Merenstein & Gardner's Handbook of Neonatal Intensive Care, 9th Edition is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care; new evidence-based care 'bundles'; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations – all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach to neonatal intensive care. Consistent organization within clinical chapters includes Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-highlighted point-of-care clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Patient Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care 'bundles' keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW! Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice.

Core Curriculum for Neonatal Intensive Care Nursing E-Book

Maternal-Newborn Nursing

Certification and Core Review for Neonatal Intensive Care Nursing - E-Book

Obstetric & Gynaecological Ultrasound E-Book

The evaluation of fetal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a reference. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care.

KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral cues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

Develop top-level guidelines for high-risk and critically ill pregnancy women with AWHONN High-Risk & Critical Care Obstetrics, 4th Edition, an official publication of the Association of Women's Health, Obstetric & Neonatal Nurses (AWHONN). This comprehensive analysis of critical care obstetrics concepts offers summary of research findings and top-notch clinical expertise. This is the expert guidance you need to navigate complex patient conditions and promote safe, effective perinatal care.

Core Curriculum for Maternal-Newborn Nursing

Handbook Of Pediatric Surgical Patient Care

Guide to Evidence-Based Practice

Study Guide to Accompany Maternal and Child Health Nursing

Ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition prepares you for your examination with hundreds of high-quality, evidence-based and realistic test simulation. Based on the latest test plans of the AACN's CCRN-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence, essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation – included free with each new copy of the book – mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website.

Thoroughly UPDATED review content reflects AACN's latest CCRN-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

Use this as a resource in the classroom or for exam preparation, the authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing – AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW!

Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with

TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

A better way to learn maternal and newborn nursing! This unique presentation provides tightly focused maternal-newborn coverage in a highly structured text.

All aspects of safe, effective, holistic care for birthing mothers, newborns, and their families are included in this easy-access guide for new antepartum and postpartum nurses and their preceptors during the orientation period. Presented in the convenient, easy-to-use Fast Facts format, the book provides up-to-date information regarding care for both low- and high-risk antepartum and postpartum patients. It encompasses evidence-based practice guidelines and clinical recommendations for routine antepartum assessment and nursing care, care of women with pre-existing conditions prior to pregnancy or complications of pregnancy, routine postpartum assessment and care, postpartum complications, and care of special populations. Each chapter features a helpful orientation guide to acquaint the new orientee with essential information on procedures and policies, equipment, medications, and evidence-based protocols. Chapters are organized systematically to include assessment and management guidelines, health promotion and teaching recommendations, routine laboratory and ultrasound tests, and holistic evidence-based nursing care practices. A separate section addresses special populations and outlines care components specific to these women and their families. They include culturally diverse families, women on each end of the age spectrum, women with fetuses or newborns diagnosed with adverse outcomes, women who have a history of being victimized, and those with deployed partners. While targeted to hospital-based nurses and new nurses in hospital orientation and their preceptors, it is also a helpful resource for nurses who practice in a great variety of related settings, as well as nurse midwifery students. Appendices include a skills checklist, a list of commonly used medications, abbreviations, and lab values. Key Features: Covers all aspects of safe, evidence-based, holistic care for birthing mothers, newborns and their families Written for nurses in orientation and their preceptors as well as nurses working with mothers and newborns in any practice setting Provides key information demonstrating the impact of newborn status on assessing, planning, and implementing care Includes an orientation guide to acquaint new orientees with essential information on procedures, policies, equipment, medications, and evidence-based protocols Addresses specific care components needed for special populations

Maternal and Newborn Care

Labor and Delivery Nursing

Studyguide for Core Curriculum for Maternal-Newborn Nursing by Mattson, Susan

Reducing Maternal and Neonatal Mortality in Indonesia

Maternal Newborn Test Practice Questions and Review for the Maternal Newborn Nurse Exam

The Republic of Indonesia, home to over 240 million people, is the world's fourth most populous nation. Ethnically, culturally, and economically diverse, the Indonesian people are broadly dispersed across an archipelago of more than 13,000 islands. Rapid urbanization has given rise to one megacity (Jakarta) and to 10 other major metropolitan areas. And yet about half of Indonesians make their homes in rural areas of the country. Indonesia, a signatory to the United Nations Millennium Declaration, has committed to achieving the Millennium Development Goals (MDGs). However, recent estimates suggest that Indonesia will not achieve by the target date of 2015 MDG 4 – reduction by two-thirds of the 1990 under-5 infant mortality rate (number of children under age 5 who die per 1,000 live births) – and MDG 5 – reduction by three-quarters of the 1990 maternal mortality ratio (number of maternal deaths within 28 days of childbirth in a given year per 100,000 live births). Although much has been achieved, complex and indeed difficult challenges will have to be overcome before maternal and infant mortality are brought into the MDG-prescribed range.

Reducing Maternal and Neonatal Mortality in Indonesia is a joint study by the U.S. National Academy of Sciences and the Indonesian Academy of Sciences that evaluates the quality and consistency of the existing data on maternal and neonatal mortality; devises a strategy to achieve the Millennium Development Goals related to maternal mortality, fetal mortality (stillbirths) and neonatal mortality; and identifies the highest priority interventions and proposed steps toward development of an effective implementation plan. According to the UN Human Development Index (HDI), in 2012 Indonesia ranked 121st out of 185 countries in human development. However, over the last 20 years the rate of improvement in Indonesia's HDI ranking has exceeded the world average. This progress may be attributable in part to the fact that Indonesia has put considerable effort into meeting the MDGs. This report is intended to be a contribution toward achieving the Millennium Development Goals.

Core Curriculum for Interdisciplinary Lactation Care provides a trustworthy source for lactation-specific information and education for students, interns, certification candidates, instructors, and clinicians-in any discipline or specialty-who provide care to breastfeeding families. Published in association with the Lactation Education Accreditation and Approval Review Committee (LEAARC), it reflects the current state of practice and serves as a fundamental resource for beginning clinicians, orienting staff, and planning continuing education programs. Organized in three sections, Core Curriculum for Interdisciplinary Lactation Care focuses on the science, management, and professional aspects of lactation care. With contributions from a team of clinical lactation experts from several countries around the world, it emphasizes an interdisciplinary approach to provide comprehensive care for breastfeeding families.

"Where was this book when I was a new nurse just learning the ropes of labor and delivery? This is a true gem of a book-a must for any new grad going into labor and delivery. I recommend this book for every labor and delivery floor." Cindy Curtis, RNC, IBCLC, CCE Former Director, The Family Birth Center Culpeper Regional Hospital Lignum, VA "The best one stop reference book for the experienced and novice Labor and Delivery RN...Finally an excellent Labor and Delivery book by RN's – for RN's." Carla DeWalt, RNC Presbyterian Hospital in the Family Birthing Center Albuquerque, NM

This report is intended to be a contribution toward achieving the Millennium Development Goals.

Core Curriculum for Interdisciplinary Lactation Care provides a trustworthy source for lactation-specific information and education for students, interns, certification candidates, instructors, and clinicians-in any discipline or specialty-who provide care to breastfeeding families. Published in association with the Lactation Education Accreditation and Approval Review Committee (LEAARC), it reflects the current state of practice and serves as a fundamental resource for beginning clinicians, orienting staff, and planning continuing education programs. Organized in three sections, Core Curriculum for Interdisciplinary Lactation Care focuses on the science, management, and professional aspects of lactation care. With contributions from a team of clinical lactation experts from several countries around the world, it emphasizes an interdisciplinary approach to provide comprehensive care for breastfeeding families.

"Where was this book when I was a new nurse just learning the ropes of labor and delivery? This is a true gem of a book-a must for any new grad going into labor and delivery. I recommend this book for every labor and delivery floor." Cindy Curtis, RNC, IBCLC, CCE Former Director, The Family Birth Center Culpeper Regional Hospital Lignum, VA "The best one stop reference book for the experienced and novice Labor and Delivery RN...Finally an excellent Labor and Delivery book by RN's – for RN's." Carla DeWalt, RNC Presbyterian Hospital in the Family Birthing Center Albuquerque, NM

Working Maternal and Neonatal Mortality in Indonesia is a joint study by the U.S. National Academy of Sciences and the Indonesian Academy of Sciences that evaluates the quality and consistency of the existing data on maternal and neonatal mortality; devises a strategy to achieve the Millennium Development Goals related to maternal mortality, fetal mortality (stillbirths) and neonatal mortality; and identifies the highest priority interventions and proposed steps toward development of an effective implementation plan. According to the UN Human Development Index (HDI), in 2012 Indonesia ranked 121st out of 185 countries in human development. However, over the last 20 years the rate of improvement in Indonesia's HDI ranking has exceeded the world average. This progress may be attributable in part to the fact that Indonesia has put considerable effort into meeting the MDGs. This report is intended to be a contribution toward achieving the Millennium Development Goals.
