Are you ready to develop mind control methods using NLP? If yes, then keep reading... Dark psychology is a look into the minds of the most heinous, monstrous humans that exist. When you are looking into the depths of dark psychology, you are looking into the minds of those who are out to hurt others. Serial killers, master manipulators, and abusers alike often share these traits, and those traits make them particularly dangerous. What is worse, however, is that these people also understand psychology. They understand exactly how they need to interact with other people in order to be seen as charismatic and trustworthy enough to win a spot in the hearts of their victims and targets. Nonetheless, they can only hurt and manipulate you if you give them that power. Remember, having the power to recognize and reject abuse from a dark psychology user will be your best shield and sword against them. Not only will it help you guard against them and their attempts, you will also be able to access their minds to help you fight back. There are several different ways that a dark manipulator will take control over your mind and get you to react a certain way. They will often get in close with you, befriend you, and cause you to act in certain ways. Many times, a rational intelligent person will be caught in the trap, without realizing what is going on, until it is too late to do anything about it. This is what makes dark psychology so dangerous and why it is so important to identify the signs and understand the different methods early on. This guidebook will give you the information and the understanding that you need to recognize and defend against dark psychology. We will discuss some of the different methods that are used with dark psychology and much more. One of the best things that you can do to protect yourself from dark psychology is to learn as much about it as possible.
