Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

The Korean peninsula, divided for more than fifty years, is stuck in a time warp. Millions of troops face one another along the Demilitarized Zone separating communist North Korea and capitalist South Korea. In the early 1990s and again in 2002-2003, the United States and its allies have gone to the brink of war with North Korea. Misinterpretations and misunderstandings are fueling the crisis. "There is no country of comparable significance concerning which so many people are ignorant," American anthropologist Cornelius Osgood said of Korea some time ago. This ignorance may soon have fatal consequences. North Korea, South Korea is a short, accessible book about the history and political complexities of the Korean peninsula, one that explores practical alternatives to the current US policy: alternatives that build on the remarkable and historic path of reconciliation that North and South embarked on in the 1990s and that point the way to eventual reunification.

The book describes how the three East Asian writing systems—Chinese, Korean, and Japanese—originated, developed, and are used today. Uniquely, this book: (1) examines the three East Asian scripts (and English) together in relation to each other, and (2) discusses how these scripts are, and historically have been, used in literacy and how they are learned, written, read, and processed by the eyes, the brain, and the mind. In this second edition, the authors have included recent research findings on the uses of the scripts, added several new sections, and rewritten several other sections. They have also added a new Part IV to deal with issues that similarly involve all the four languages/scripts of their interest. The book is intended both for the general public and for interested scholars. Technical terms (listed in a glossary) are used only when absolutely necessary. Focusing mainly on classifiers, Numeral Classifiers and Classifier Languages offers a deep investigation of three major classifier languages: Chinese, Japanese, and Korean. This book provides detailed discussions well supported by empirical evidence and corpus analyses. Theoretical hypotheses regarding differences and commonalities between numeral classifier languages and other mainly article languages are tested to seek universals or typological characteristics. The essays collected here from leading scholars in different fields promise to be greatly significant in the field of linguistics for several reasons. First, it targets three representative classifier languages in Asia. It also provides critical clues and suggests solutions to syntactic, semantic, psychological, and philosophical issues about classifier constructions. Finally, it addresses ensuing debates that may arise in the field of linguistics in general and neighboring inter-disciplinary areas. This book should be of great interest to advanced students and scholars of East Asian languages.

Revised & Updated Edition! God is love. Crazy, relentless, all-powerful love. Have you ever wondered if we're missing it? It's crazy, if you think about it. The God of the universe—the Creator of nitrogen and pine needles, galaxies and E-minor—loves us with a radical, unconditional, self-sacrificing love. And what is our typical response? We go to church, sing songs, and try not to cuss. Whether you've verbalized it yet or not, we all know something's wrong. Does something deep inside your heart long to break free from the status quo? Are you hungry for an authentic faith that addresses the problems of our world with tangible, even radical, solutions? God is calling you to a passionate love relationship with Himself. Because the answer to religious complacency isn't working harder at a list of do's and don'ts—it's falling in love with God. And once you encounter His love, as Francis describes it, you will never be the same. Because when you're wildly in love with someone, it changes everything. This book investigates how transnational English learning experiences can influence students' identities. More specifically, it delineates how Korean early study abroad undergraduates perceive English and how they have formed their ethnic identities based on their early study abroad experiences. They tend to see themselves "in between" two cultures/languages and this in-between-ness is the most distinctive common characteristic of their identities. However, their in-between-ness means more than being connected to both Korea and America or hybridizing Korean and American discourses. As transnational elites who cross the borders freely, they are in a position to be cosmopolitans who can take advantage of the in-between-ness, becoming keen critics of dominant cultures in both contexts, and potentially social activists who can stand up for social justice. In short, the early study abroad experience should be understood not just in terms of language learning, but as a process by means of which learners develop social awareness in multiple language-related contexts that can lead them beyond their own circumscribed world of elitism to a position of responsibility for sharing what they have experienced and learned for the benefit of society.

No book has addressed the simultaneous phenomena of Korea's rapid economic development and its vibrant democratic single coherent paradigm. The late developmentalist approach emphasizes the strong role of Korea's state and bureaucratic efficiency but does not explain how political development was concurrent with the economic miracles in the Han River modernization and dependence theories also fail to explain the aspect of simultaneity in this phenomenon. What the theories commonly miss is the unique relationship between state and society in Korea's long history of political culture. This book, Jongwoo Han takes a holistic approach to understanding these phenomena by examining the state's role in the unprecedented economic development and society's capabilities to resist the state's centralized power. Han re-articulates state-society relations through Onuf's social constructivist approach based on three rules of a political community: hegemony, hierarchy, and heteronomy. This book expands upon this effort to re-construct the state and society relations in two periods: produces case studies of the capital city of Hanyang (Joseon Dynasty from 1392 to 1910), Kyeongseong (Japanese colonial control from 1910 to 1945), and Seoul (1945-current). The capital city is analyzed as a container for the major ideological ways of thinking that have shaped three important political eras. Second, it adopts two indigenous thoughts, Neo-Confucianism and geomancy, as sources of the main political and cultural ideologies that shape Korea's state and society relations. These sources have never been treated as units of political analysis. This book finds that both Neo-Confucianism and geomancy in two periods of Hanyang and Kyeongseong, are two main contributing factors of the emergence of the developmental state and vibrant democracy in Korea in the Seoul era.

The University of Washington-Korea Studies Program, in collaboration with Rowman & Littlefield Publishers, is proud to publish the Journal of Korean Studies. In 1979 Dr. James Palais (PhD Harvard 1968), former UW professor of Korean History and published the first volume of the Journal of Korean Studies. For thirteen years it was a leading academic forum

innovative, in-depth research on Korea. In 2004 former editors Gi-Wook Shin and John Duncan revived this outstanding publication at Stanford University. In August 2008 editorial responsibility transferred back to the University of Washington under the editorial guidance of Clark Sorensen and Donald Baker, the Journal of Korean Studies (JKS) continues to be dedicated to publishing outstanding articles, from all disciplines, on a broad range of historical and contemporary topics concerning Korea. In addition the JKS publishes reviews of the latest Korea-related books. To subscribe to the Journal of Korean Studies or to view back issues, please click here.

North Korea: a ruthless politic actor and true threat to the world - or at least that's how the Western hemisphere sees it. Our factual knowledge of this post-Leninist and totalitarian regime is extremely limited and relatively distorted; it is largely based on circumstantial evidence and judgmental speculation that accounts for our perception of this East Asian state. Karl H. Stuedgen challenges this view with a thorough academic enquiry using models based on foreign policy, power politics and economic considerations to compensate for the lack of data. From these angles, North Korean politics appears neither irrational nor unpredictable: the logic of its actions may at first seem opaque, but it nonetheless displays its own rationale and pattern. The book offers profound insights into the "Juche" philosophy and the concept of autarky introduced by Kim il-Sung in 1967, demonstrating how these ideas form the theoretical core of North Korea's strategy for political survival. It is this balance between North Korean politics and culture that make Stuedgen's book an important contribution to diplomatic relations and international communication.

"China significantly restructured its relationship with both Koreas during the 1980s and 1990s, but the most striking change occurred in the 1990s, rapidly strengthening economic alliance with South Korea. China and Korea closely examines this dynamic transformation - as well as its potentially far-reaching, economic, diplomatic, and military implications." "Professor Lee systematically evaluates three major considerations influencing China's changing policies toward both North and South Korea: shifting domestic and foreign policy priorities under Deng Xiaoping (particularly regarding ideology, security, and economy), a decisive tilt of the inter-Korean power configurations in favor of Seoul, and China's relations with Russia, Japan, and the United States after the cold war." "China and Korea focuses on military policy, diplomatic issues, and economic realities to trace China's dynamic emergence from Mao-inspired ideological isolationism to its embrace of the pragmatic, open-door policy of Deng Xiaoping's modern socialist state."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The second half of the twentieth century saw a great number of powerful vocal pairings as short-lived, but undeniably magical collaborations. Through firsthand interviews from many of the artists, readers will enjoy the back story about which duos got along well and which did not, who was kept in touch, and vice versa. Arranged alphabetically from Bryan Adams to Dottie West, Dynamic Duets gives the back stories on all of the cracked Billboard's Top 40 between 1955 and the end of the century. The book includes photographs of many of the records and/or the artists, and label information, year of release, facts about the songs, and quotes from many of the performers, songwriters, and producers. The listing "Honorable Mentions" follows this book's large main section and consists of those twosomes that did not reach Top 40 (but simply were omitted), or those whose duet partners played more of a minor role. Baby boomers, vinyl collectors, music historians, and classic hits radio fans will find Dynamic Duets a must for their music library.

This book showcases innovative research about the multi-functional and dynamic interrelatedness of questioning and answering practices in institution- and culture-specific interactions ranging from under-explored to extensively researched ones: South-Korean talk shows, Japanese interviews, Chinese news interviews, police-civilian interactions in the USA, Italian interviews and courtroom examinations, Japanese parliamentary debates and Prime Minister's Questions in the UK Parliament. Challenging the view that questions are asked with the purpose of seeking information and eliciting answers, these studies open up new research avenues through insightful investigations and critical scrutiny that problematize the

question-answer paradigm, through which meanings are conveyed, negotiated and/or contested, and through which relationships are established, maintained and/or challenged. Significant findings show that questioning and answering strategies are shaped by the specific norms and constraints of particular communities of practice, while at the same time they are shaping the very same communities of practice. This book will appeal to interdisciplinary scholars and practitioners across the linguistic, media, political, legal and social sciences.

Is there hope for peace on the Korean peninsula? These deeply personal stories of two Western women reveal the almost unimaginable transformation of Korea from a culturally and politically united peninsula at the end of the nineteenth century into today's dangerously divided land. These two women's experiences bracket the twentieth century, a dark time in Korean history, when the peninsula was occupied by Japan, divided into North and South, and wracked by internal war-becoming an unwilling pawn of Cold-War superpowers. Despite everything, South Korea has emerged as an international economic success story, whereas North Korea has become a totalitarian ideological nightmare in which leaders spew the rhetoric of aggression and develop nuclear weapons. What would it take to heal this political schizophrenia that endangers our entire world? Based on a study examining the dynamics of technological development of Samsung's semiconductors, this text investigates the role of Management of Technology in achieving firms' competitiveness. The essence of this study is to recognise the built-in charac

North Korea features highly on the agenda of the main actors in East Asia and around the globe, and many large foreign policy initiatives have been undertaken since the structural constraints of the Cold War started to loosen in the early 1990s. The centrality of North Korea has been particularly emphasized by the country's suspected development of nuclear weapons which is regarded as one of the largest de-stabilising factors in the Asia-Pacific region. This comprehensive book analyzes the formation of the North Korea policy in the context of great power relations in East Asia, specifically focusing on Japan's policy formation and 'the Japan factor' in the North Korea policies of other concerned great powers, namely the US, China, Russia, South Korea and the EU. By adopting an empirical focus on the international interaction over North Korea, this book brings together issues that are highly relevant to contemporary Japanese foreign policy; clarifies what is happening in the region right now and plots what policy options are available for the future. Policy-oriented and based on careful empirical analysis, North Korea Policy will appeal to both policy makers and scholars of Asian foreign policy.

This book assesses the role of identity and Chinese face culture in Chinese foreign policy by analyzing China's political and economic retaliation against South Korea's deployment of the THAAD (Terminal High Altitude Area Defense) system on its soil. By examining the history and military action of China, Japan, and North and South Korea, the book argues that China's divergent responses were caused by different expectations according to whether states had a perceived identity as a friend or a rival. The author demonstrates that Chinese face culture shapes China's reaction to others through three dynamics of seeking, saving, and losing face. This book shows how identity and culture have worked in the relationship between China and neighboring countries through three case studies exploring North Korea's Taepodong-2 missile launch and first nuclear test in 2006, South Korea's decision to allow the United States to deploy the THAAD around 2016, and Japan's decision to deploy two U.S. X-band radars in 2005 and 2014. A timely analysis of the importance of identity and culture in international relations, the book will be of interest to scholars of Chinese foreign policy, Sino-South Korean relations, Sino-North Korean relations, Sino-Japanese relations, Korean Politics, Asian Politics, and International Relations.

Winner of the 2020 R. Wayne Pace HRD Book of the Year Award, this edited book covers major trends, notable distinctions, and the challenges and needs for preparing future HRD activities in South Korea. It consists of three major sections: national and social issues of HRD, sector perspectives on HRD, and contemporary issues and trends. To cover contemporary trends and future issues, authors examine topics in diverse areas, such as the application of data analytics for HRD, action learning trends, and psychological and work climate issues affecting performance. Through theory and cases, this book will show how HRD can be successful at the organizational, industrial, and societal levels as well as the future needs required to further advance HRD in the nation.

The book traces the past decade of dynamic interactions among the concerned states involved in the Six-Party Talks on North Korean nuclear programs. Unlike existing studies which usually dissect incidents of the talks, the book provides a comprehensive systemic analysis of the Six-Party Talks process from A to Z. These new insights into the nuclear drama in the Northeast Asian region will be of value to scholars, policy makers, and analysts.
