From the Royal Shakespeare Company – a fresh new edition of Shakespeare's magnificent tragedy of love, jealousy and explosive racial politics THIS EDITION INCLUDES: • An illuminating introduction to Othello by award-winning scholar Jonathan Bate • The play - with clear and authoritative explanatory notes on each page • A helpful scene-by-scene analysis and key facts about the play • An introduction to Shakespeare's career and the Elizabethan theatre • A rich exploration of approaches to staging the play featuring photographs of key productions The most enjoyable way to understand a Shakespeare play is to see it or participate in it. This unique edition presents a historical overview of Othello in performance, recommends film versions, takes a detailed look at specific productions and includes interviews with two leading directors and an actor– Trevor Nunn, Michael Attenborough and Antony Sher – so that we may get a sense of the extraordinary variety of interpretations that are possible, a variety that gives Shakespeare his unique capacity to be reinvented and made 'our contemporary' four centuries after his death. Ideal for students, theatre-goers, actors and general readers, the RSC Shakespeare plays offer an accessible and contemporary approach to reading and rediscovering Shakespeare's works for the twenty-first century.

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

This book is a first-person account of a disaster on a solo hiking trip. Author Amy Racina was hiking in a remote part of King's Canyon National Park in California's Sierra mountains when she lost the trail. With no warning, she suddenly fell sixty feet, breaking both legs on the rocks below. She survived for four days and nights, battling pain, fear and exhaustion, pulling herself along with her hands and refusing to give up. She was miraculously saved, her calls heard by a man who was partially deaf. It describes her dramatic rescue as she was airlifted out, swinging helplessly from two straps, dangling fearfully beneath a helicopter high above the ravine where she had fallen.It is an amazing tale of despair and courage and hope. It speaks of incredible strength and heartbreaking weakness as details what one woman believed might be the last days of her life. It is a memory of the darkest of times and an affirmation of miracles.

Provides revision notes on the key topic areas with many examples. Written in CGP style, this work has an odd bit of fun thrown in to keep concentration levels up.
