The Empath. The word has found its way into our consciousness accompanied by ideas of healing, sharing emotion and pain. Empaths are sensitive, caring, responsive people who have at the core of their nature an innate ability to receive energy, information and awareness from others with a depth and intensity that is beyond our customary understanding of empathy. Yet, this very receptivity and permeability brings its own challenges. It is vital for empaths to recognize themselves as such and to consciously explore, understand and address this energetic flow in their life. Self-inquiry is the essential tool to understanding all that motivates and colors your experience of the world. The book explores in depth this receptivity, as well as tools, concepts and approaches to support understanding and how to flourish with this heightened sensitivity. This book is a shared journey, edited from years of workshops and sessions with Elisabeth Fitzhugh and the Orion group.

The life force, also known as "spirit," is the essence of being and the conscious and most important form of energy. Living energy is personal and within our conscious control, and by learning about it, we can use it to transform our life into vibrant and meaningful expressions of who we really are. Consciousness is purely energetic and therefore difficult to quantify in mechanistic terms. It is the characteristic of living energy and is the foundation of awareness. Consciousness is the thread running through all life. Living Energy is an introduction to the process of mystic spirituality. The reader is encouraged to attain a deep and meaningful connection to the divine with expanded awareness. The principles given in this book are equally relevant to the novice and the advanced practitioner. Robert explains how we may reveal our hidden potential by shifting our perception away from what is customary and comfortable to open the doors to greater spiritual awareness.

Golden keys to making practical choices from the inside out that can guide the real you to creating and manifesting all aspects of your life!

The Living World is often considered a student favorite. George Johnson has written this non-majors textbook from the ground up to be an engaging and accessible learning tool with an emphasis on "how things work and why things happen the way they do". The Living World focuses on concepts rather than terminology and technical information, and features a straightforward, clear writing style and a wide variety of media assets to enhance the content of the textbook. Every chapter of this 9th edition is focused directly on the relevance of its content to today's students. When the discussion of a topic is linked to a student's own experience, it does not seem so unapproachable, and the utility of learning it is far easier to accept.

Life, liberty, and the pursuit of happiness are prescribed ideals in America of 2050. The Moral Authority, the nation's newest branch of government, has virtually eliminated crime, poverty, and most social ills, but it also rules the land with a tyrannical fist, championing ignorance and brandishing fear. Mark Bryan is a gay man whose existence brands him an outlaw; Isaac Montoya is a charming stranger, who entices Mark to defy moral law; and Samuel Pleasant runs the Moral Authority and plans to punish moral offenders and a rebellious uprising-no matter the cost. Will liberty and justice return for all?

This Torah-based book will help clarify your understanding of the Messiah's Truth from a Hebraic perspective.

Ben's 13th year was when his family fell apart, but his 14th year is when his whole world, or more precisely, the whole world, collapses. He had thought 13 was his unlucky number, the year that Time turned its back on him, but he was wrong; that year, it was he who had turned his back on Time. The following year, the fury of the sun turns back Time for everyone in the world. On PF (Power Failure) Day, a huge electromagnetic surge from the sun destroys the power grids and civilization as we know it. Living in the middle of downtown Kansas City makes survival nearly impossible. Starvation, dehydration, disease, freezing temperatures, and out-of-control fires imperil the desperate population. After facing unimaginable losses, Ben finds hope for the future when he meets Sara, who has endured her own share of agonizing loss. But when a murderous gang threatens to take away everything Ben has left, they flee to a wilderness area of a large city park where they learn to live off the land for survival.

"He Walks with Dragons" takes place when what was, what is, and what shall be were one in the same. Draig, a boy on the verge of his manhood, is summoned to the majestic mountain by the Great Ones. There he finds out he is about to transcend the ages and risk his life to prevent the destruction of mankind. Born into the naïve innocence of ancient man, Draig lives a simple pastoral existence in a quiet, small village. But one day he is flung on a magical journey into a forbidden new world. There, Draconos, a dragon, befriends the boy, training him in the art of warfare. From this day forward, the young boy finds himself in awe at the wonders the world holds for him. Not only has Draig become a man, but he is living like a dragon and learning their mystical powers. "From the time Man first crawled upon this earth...we found him worthy to take his rightful place among the creatures that walk upon the earth. While hiding in the shadows, we have protected him. We have nurtured him all these many ages. But now man grows in great numbers and makes war on everything he sees." And when the time comes, will Draig be willing to lay down his life for the sake of saving the dragons? And when the dragons are gone, where will he go? He is no longer just a man.

Clearly, the "normal" way of life is the opposite of genuine sustainability, and it has an expiration date. Any way of life that is fully in balance with the family of life must be genuinely sustainable, a healthy path with a future.

At present, too few really comprehend this concept. It would be wise to learn, and Sustainable or Bust is a useful tool for the job. Seven-point-something billion people can't switch to sustainable living this afternoon, because it's temporarily impossible. But the collapse of industrial civilization is now in its early stages, and when it's done, the human sphere will be much smaller, slower, and simpler. Decades down the road, many new options will become possible, including genuine sustainability. We could help our descendants find a more direct path to health and balance by learning about sustainability now, and sharing this wisdom with the young ones. There's never been a better time to hit the books and feed our minds — before the lights go out. Nothing can change until ideas change. My first book, *What Is Sustainable*, presented an introduction to genuine sustainability, with an emphasis on food. *Sustainable or Bust* is a collection of 64 book reviews, and 16 rants. It's a gallery of thinkers, scholars, and ideas that might make "normal" minds itch and squirm. This book is for pilgrims who are awake, alive, and weary of normal — minds hungry for outside-the-box ideas. I don't expect to see the end of the collapse. What the survivors, if any, choose to do is entirely beyond my control. I am not responsible for the decisions they make, but I am responsible for doing what I can to help them understand their history, predicament, and options. Who are we? Where are we from? How did we get here?

God's Masterpiece is a Children's book which illustrates the first chapter of Genesis, the creation of the world, in a fun little way! The book is simple to read and full of pictures to which one can follow along. A small and great book for the little one who is just learning to read, helping them learn a little more about their faith along the way.

"We are all of us scientists. We live in a world where science impacts our lives daily. Atomic bombs are the product of science, and so are antibiotics and cancer treatments. This year, human babies had their genes edited, and climate change was debated in the halls of Congress. What are we to make of the science that is forming the world in which we will live our lives? How do we know what to fear and what to seek? The first step is to understand how science is done. How does a scientist "know" something? Understanding how to evaluate a scientific claim has become a necessary tool for every educated citizen. *Analyzing Important Experiments* Biology is at its core a detective story. Over many years, scientists have performed experiments to solve mysteries. Faced with a question, they have, like Sherlock Holmes, devised ways to test alternative possibilities. And it doesn't stop there. Learning the answer to one question has led scientists to other questions, addressed by other experiments. Every major concept taught to students taking a biology course is the result of a chain of experiments. In this text, you will analyze many of the most important experiments that have taught us what we know. By seeing how scientists conducted the experiments you can see how scientists think and how ideas are tested"--
