"Understanding Texts & Readers makes comprehension make sense. In it, Jennifer Serravallo narrows the distance between assessment and instruction. She maps the four fiction and four nonfiction comprehension goals she presented in The Reading Strategies Book to fourteen text levels and shares sample responses that show what to expect from readers at each. Jen begins by untangling the many threads of comprehension: Levels, engagement, stamina, the relevance of texts, and much more. Then level by level she: - calls out with precision how plot and setting, character, vocabulary and figurative language, and themes and ideas change as fiction across levels - specifies how the complexity of main idea, key details, vocabulary, and text features increases in nonfiction texts - points out what to expect from a reader as text characteristics change - provides samples of student responses to texts at each level - shares progressions across levels to support instructional planning"--

*Much of the data available today is unstructured and text-heavy, making it challenging for analysts to apply their usual data wrangling and visualization tools. With this practical book, you'll explore text-mining techniques with tidytext, a package that authors Julia Silge and David Robinson developed using the tidy principles behind R packages like ggraph and dplyr. Practical code examples and data explorations will help you generate real insights from literature, news, and social media. Learn how to apply the tidy text format to NLP Use sentiment analysis to mine the emotional content of text Identify a document's most important terms with frequency measurements Explore relationships and connections between words with the ggraph and widyr packages Convert back and forth between R's tidy and non-tidy text formats Use topic modeling to classify document collections into natural groups Examine case studies that compare Twitter archives, dig into NASA metadata, and analyze thousands of Usenet messages An updated edition of the key reference work in the area of second and foreign language vocabulary studies. The world's foremost entrepreneurial coach shows you how to make a mindset shift that opens the door to explosive growth and limitless possibility--in your business and your life. Have you ever had a new idea or a goal that excites you... but not enough time to execute it? What about a goal you really want to accomplish...but can't because instead of taking action, you procrastinate? Do you feel like the only way things are going to get done is if you do them? But what if it wasn't that way? What if you had a team of people around you that helped you accomplish your goals (while you helped them accomplish theirs)? When we want something done, we've been trained to ask ourselves: "How can I do this?" Well, there is a better question to ask. One that unlocks a whole new world of ease and accomplishment. Expert coach Dan Sullivan knows the question we should ask instead: "Who can do this for me?" This may seem simple. And it is. But don't let the lack of complexity fool you. By mastering this question, you will quickly learn how billionaires and successful entrepreneurs like Dan build incredible businesses and personal freedom. This book will teach you how to make this essential paradigm-shift so you can:

- Build a successful business effectively while not killing yourself
- Immediately free-up 1,000+ hours of work that you shouldn't be doing anyway
- Bypass the typical scarcity and decline of aging and other societal norms
- Increase your vision in all areas of life and build teams of WHOs to support you in that vision
- Never be limited in your goals and ambitions again
- Expand your abundance of wealth, innovation, relationships, and joy
- Build a life where everything you do is your choice--how you spend your time, how much money you make, the quality of your relationships, and the type of work you do

Making this shift involves retraining your brain to stop limiting your potential based on what you solely can do and instead focus on the nearly infinite and endless connections between yourself and other people as well as the limitless transformation possible through those connections.
