resources for our subsistence and survival. In the food domain, cereal and legume grains occupy the front line, whereas, horticultural crops have occupied the second line of defense. For healthy diet cereals and legumes provide us with carbohydrates and protein, whereas, fruits and vegetables provide us minerals and vitamins. Both macro- and micro- nutrients are essential for human growth and development. The fruits and vegetables are the major source of micro-nutrients. It is estimated that up to 2.7 million lives could potentially be saved each year if fruit and vegetable production was sufficiently increased. Both at national and international levels, food and

agriculture/horticulture development plans and estimates are basically developed, framed and implemented, and narrowed down to cereal production. In the present context of attaining nutrition security, this mode of thinking on "food" needs to be changed to "nutrients", which will include necessarily all those crops including fruit and vegetables which provide all macro- and micro-nutrients to ensure balanced nutrition needed for good human health. The present publication has attempted to reflect and discuss the above views and ideas on the subject of sustainable horticulture development and nutrition security in nine chapters with 32 articles by 32

For fans of Adrian Newey, Guy Martin and Chris Hadfield, in Taking on Gravity inventor Richard Browning tells the inspiring story behind his iconic jet suit, and shares his creative principles for generating true innovation. From Icarus to Iron Man, the dream of human flight has always inspired and challenged us. Now, with his pioneering jet suit, Richard Browning has redefined what is possible. Richard Browning's story is one of groundbreaking innovation. Building an aviation business from his garage,

he has invented a whole new form of personal flight - a fantasy previously reserved for the pages of science fiction. His iconic jet suit has captured the imaginations of millions around the world, triggered ongoing developments in technology and engineering, and inspired a new generation of creative minds to pursue their dreams. In Taking on Gravity, Browning reveals the creative principles of his multimillion-pound company, Gravity Industries, and shows us how grass-roots innovation can disrupt established industries in exciting and unexpected ways. On this journey into the sky we'll experience what it's like to take flight, to test the limits of the

human body, and to convert moonshot ideas into tangible results. The Gravity story is an inspiring example of human creativity and our ceaseless desire to push the boundaries of what is possible. Where we go next is up to you.

[Note: The most complete version of the big picture that eluded Einstein in his attempts to unveil a unified field theory can be found in the book, *The Gravity Cycle*, by the same author as this book. This book, *Einstein Was Wrong!*, was one of many approaches to the ideas that will shake the very foundations of physical science upon which we presently stand.] Modern Physics is built on an erroneous foundation. If we are to

take physics to a new level where gravity can be explained from an atomic/quantum perspective, then someone must boldly say, "Einstein was wrong, but so was Newton." Because they both started with the same wrong premise, their theories of gravity were destined to fall short in any attempt to connect them to atomic/quantum processes. And the same false premise that stifled Einstein in his ability to connect "the movement of planets and stars with the tiniest subatomic particles" prevents modern physicists from explaining the fourth and final force from an atomic/quantum perspective. Alas, "...when one starts with a wrong premise, no amount of

patching can right the problem." But all is not lost. By correcting Newton's mistake (the wrong premise), a new foundation for understanding the role of the atom in the momentum, relativity, and gravity of masses emerges in the form of two new theories: The Atomic Model of Motion (AMM) and The Galaxy Gravity Cycle (GGC). These two theories combine to paint the big picture of how atomic/quantum processes are involved in holding a galaxy together, keeping planets orbiting stars, and preventing people from floating off into space. This book is dedicated to Occam's razor.

Tapping is an activity that many of us engage in everyday without even thinking about what we are doing. We drum our fingers on a desk or table while we wait for something to happen.

We tap our forehead while we are figuring out a problem. We stroke our chin or rub our head as we contemplate the issues of the day. Each of these acts is our body's clumsy way of attending to a need for peace or resolution.

Tapping prayer is a spiritual practice that intentionally focuses our attention on the

rhythmic movement of our finger tips. It directs the energy of God's healing onto specific points on our body that through the practice of acupuncture and reiki, have shown to be conduits of healing. Tapping prayer is the most exciting addition to my spiritual tool belt in 25 years of ministry. It's fun and effective and easy to administer alone, one on one, or in a group. It is very flexible...and did I mention, effective? Tapping prayer is effective in bringing individuals into a one one relationship with God that creates peace, healing, and a

desire to share those gifts with other individuals, communities, and Creation. Tapping prayer is an integration of sacred wisdom from the East and West. It is a spiritual practice that blends a knowledge of the Spirit's movement through our body with an understanding of meridian tapping based on the Emotional Freedom Technique created by Gary Craig. Tapping prayer brings balance and peace to individuals who are experiencing spiritual distress. By gently tapping on identified points of entry for the Holy which correspond to

meridian end points in acupuncture, while praying for God to attend to a particular pain, we focus God's intention to heal and in most cases actually experience a peace which is not of our own doing. By acknowledging pain instead of wishing for relief, we recognize God's interest to heal us and indeed, God heals us. This technique can be used for individuals who are seeking peace from a wide variety of issues ranging from: trauma such as a car accident, an abusive parent, a friend killed in battle, a sudden illness, a job loss, a fire, a

damaged relationship. Tapping prayer can also facilitate forgiveness and/or letting go. Tapping prayer is effective in praying for others (surrogate prayer tapping focused on an individual who is not present to the prayer tapping), for events (9/11, Sandy Hook, a company leaving a community), or Creation (an oil spill, deforestation, strip mining). Wherever there is a disruption to the peaceful flow of the Holy Spirit, tapping prayer can be applied. When I first learned about the Emotional Freedom Technique as a tool to help veterans
