

Grinding It Out The Making Of Mcdonalds

This enhanced edition of The Total Recall holds 16 videos clips, including behind the scenes footage from Terminator 3, political speeches from the Governor years and clips from Pumping Iron. In this fully illustrated eBook, Arnold Schwarzenegger takes us through each of the 170+ photographs and narrates each image. Total Recall is the unbelievably true story of Arnold Schwarzenegger's Life. Born in the small city of Thal, Austria, in 1947, he moved to Los Angeles at the age of 21. Within ten years, he was a millionaire business man. After twenty years, he was the world's biggest movie star. In 2003, he was Governor of California and a household name around the world.

Examines the early life of Ray Kroc, shares the story of how he started the McDonald's chain of fast food restaurants, and discusses his contributions to charity, and his purchase of the San Diego Padres.

Chronicles the rise and expansion of the nation's number-one fast-food chain and the Horatio Alger life of founder Ray Albert Kroc

Back in the scenes of our most ambitious radio programs and witness an intensely real-time moment in a medium that's changing the way we tell stories. Every week, millions of devoted fans download or tune in to This American Life. The Moth, Radiolab, Planet Money, Snap Judgment, Radio Diaries, 99% Invisible, and other nonfiction narrative radio shows. The compelling stories they produce are almost cinematic in scope and approach intricately weaving sound into robust and engaging storytelling. A lot goes into making the shows we love. Anchored by surprising characters and big questions, their stories are tightly structured, edited, and soundtracked, and they introduce us to authentic voices from every walk of life. Radio and podcasts today are entrepreneurial and DIY; there's a can-do, collaborative spirit that characterizes people working in this field, fearlessly breaking new artistic ground. And more than ever, given the excellence and explosive popularity of shows like Serial, it's clear that the creative producers working in this medium hold the key to storytelling secrets that the rest of us must learn. Out on the Wire, a documentary comic, literally illustrates those secrets, gleaned straight from those on the frontlines of radio's revolution. With the help of This American Life's Ira Glass, cartoonist Jessica Abel uncovers just how producers construct a story, spilling some juicy insider details along the way. Jad Abumrad of Radiolab talks about chasing moments of awe with scientists, while Planet Money's Robert Smith speaks candidly about his slightly embarrassing strategy for putting interviewees at ease. And Abel reveals how mad—really mad—Ira Glass becomes when he receives tough edits from his colleagues. Informative and inventive, Out on the Wire shows us the magic that makes these shows great and why we can't stop listening to them.

How to Manifest Exactly What You Want and Have an Epic Life!

An exhaustive and unforgettable portrait of India's greatest and most respected industrialist. Written with J.R.D. Tata's co-operation, this superb biography tells the J.R.D. story from his birth to 1993, the year in which he died in Switzerland. The book is divided into four parts: Part I deals with the early years, from J.R.D.'s birth in France in 1904 to his accession to the chairmanship of Tatas, India's largest industrial conglomerate, at the age of thirty-four. Part II looks at his forty-six years in Indian aviation (the lasting passion of J.R.D.'s life) which led to the initiation of the Indian aviation industry and its development into one of India's success stories; Part III illuminates his half-century-long stint as the outstanding personality of Indian industry; and Part IV unearths hitherto unknown details about the private man and the public figure, including glimpses of his long friendships with such people as Jawaharlal Nehru, Mahatma Gandhi, Indira Gandhi and his association with celebrities in India and abroad.

For decades the suburbs have been where art happens despite: the conformity, the emptiness, the sameness. Time and again, the story is one of gems formed under pressure and that resentment of the suburbs is the key ingredient for creative transcendence. But what if, contrary to that, the suburb has actually been an incubator for distinctly American art, as positively and as surely as in any other cultural hothouse? Mixing personal experience, cultural reportage, and history while rejecting clichés and pieties and these essays stretch across the country in an effort to show that this uniquely American milieu deserves another look.

Meet a genuine American folk hero cut from the homespun cloth of America's heartland: Sam Walton, who parlayed a single dime store in a hardscrabble cotton town into Wal-Mart, the largest retailer in the world. The undisputed merchant king of the late twentieth century, Sam never lost the common touch. Here, finally, inimitable words. Genuinely modest, but always sure if his ambitions and achievements. Sam shares his thinking in a candid, straight-from-the-shoulder style. In a story rich with anecdotes and the "rules of the road" of both Main Street and Wall Street, Sam Walton chronicles the inspiration, heart, and optimism that propelled him to lasso the American Dream.

Principles of Modern Grinding Technology, Second Edition, provides insights into modern grinding technology based on the authors' 40 years of research and experience in the field. It provides a concise treatment of the principles involved and shows how grinding precision and quality of results can be improved and costs reduced. Every aspect of the grinding process—techniques, machines and machine design, process control, and productivity optimization aspects—comes under the searchlight. The new edition is an extensive revision and expansion of the first edition covering all the latest developments, including center-less grinding and ultra-precision grinding. Analyses of factors that influence grinding behavior are provided and applications are presented assisted by numerical examples for illustration. The new edition of this well-proven source for technicians, engineers, researchers, teachers, and students who are involved with grinding processes. Well-proven source revised and expanded by undisputed authority in the field of grinding processes Coverage of the latest developments, such as ultra-precision grinding machine developments and trends in high-speed grinding Numerically worked examples give scale to essential process parameters The book as a whole and in particular the treatment of center-less grinding is considered to be unchallenged by other books

The Six Mindsets That Distinguish the Best Leaders from the Rest

The Untold Story of the British Family Firm that Became a Global Brand

The Organic Artist

In this #1 New York Times bestseller, the CEO of Starbucks recounts the story and leadership lessons behind the global coffee company's comeback and continued success. In 2008, Howard Schultz decided to return as the CEO of Starbucks to help restore its financial health and bring the company back to its core values. In Oward, he shares this remarkable story, revealing how, during one of the most tumultuous economic periods in American history, Starbucks again achieved profitability and sustainability without sacrificing humanity. Offering you a snapshot of the recession that left no company unscathed, the book shows in riveting detail how one company struggled and came back in the end. In all, this edition, you'll get an inside look at Schultz's central leadership philosophy: It's not about winning; it's about the right way to win. Onward is a compelling, candid narrative documenting the maturing of a brand as well as a businessman's. Ultimately, Schultz gives you a sense of hope that, no matter how tough times get, the future can be more successful than the past.

Summary, Analysis & Review of Ray Kroc's Grinding It Out with Robert Anderson by Instaread Preview: Grinding It Out: The Making of McDonald's is Ray Kroc's rags-to-riches story of how he built the fast-food behemoth McDonald's from the ground up. His book has been widely recognized as a business executive's bible for how to succeed. Kroc narrates his life story and demonstrates how the grit and determination he used as a paper cup salesman led him through a series of twists and turns to meet the McDonald brothers, Richard and Maurice, who were running a successful hamburger stand in San Bernardino, California. From there, he constructed one of the world's most successful franchise systems and built an empire that continues to dominate its industry even now, decades after his death. Kroc initially met the McDonald brothers at their San Bernardino restaurant in 1955. At the time, Kroc was running a business selling commercial milkshake machines. He believed that if he could franchise the McDonald's business, he'd... PLEASE NOTE: This is a Summary, Analysis & Review of the book and NOT the original book. Discusses the people, the strategies, and the innovations that turned a hamburger stand into a multi-billion-dollar corporation that revolutionized an industry and influenced the culture of America.

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, The Absolutely True Diary of a Part-Time Indian, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live.

With artwork by Markus Zsasz, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

Rise and Grind

How Starbucks Fought for Its Life without Losing Its Soul

The Grinding Season

Presenting a comprehensive treatment of grinding theory and its practical utilization, this edition focuses on grinding as a machining process using bonded abrasive grinding wheels as the cutting medium. It provides a description of abrasives and bonded abrasive cutting tools.

What is it about McDonald's that has enabled it to produce more millionaires from within its ranks than any company in history? What earns the undying respect and loyalty of its franchisees, vendors, and 47 million customers served daily, from Moscow to Evansville to Rio de Janeiro? And how does it continue to expand its products, retool its image, and become more popular with each passing year? Few authors are as qualified to answer those questions as company insider Paul Facella. Beginning behind the counter at age 16, Paul literally grew up at McDonald's. From counter, to grill, to Regional Vice President, he has, over the course of his distinguished 34-year career, developed an intimate knowledge of the fast-food giant's management practices and culture. He's also forged personal ties to its legendary leaders, including founder Ray Kroc and CEOs Fred Turner, Mike Quinlan, Jack Greenberg, former President Ed Rensi, and current CEO Jim Skinner. Everything I Know Ab out Business I Learned at McDonald's delivers an up-close-and-personal look at a company where talent is cultivated and encouraged to thrive, from the individual restaurant to the corner office. With the help of in-depth interviews and "in their own words" commentaries from company executives, franchisees, and vendors, he explores McDonald's result-driven culture, and reveals the core principles, first laid down by founder Ray Kroc in 1955, that have successfully guided the company for more than five decades. Finally, Paul distills all that knowledge and experience into powerful lessons on teamwork, leadership, integrity, communication, and relationship building that you'll use to achieve stellar results in your company-whether your goal is to build an international business empire of your own, or just the best darned shop in town.

#1 New York Times Bestseller 2014 NATIONAL BOOK AWARD FINALIST In her first memoir, New Yorker cartoonist Roz Chast brings her signature wit to the topic of aging parents. Spanning the last several years of their lives and told through four-color cartoons, family photos, and documents, and a narrative as rife with laughs as it is with tears, Chast's memoir is both comfort and comic relief for anyone experiencing the life-altering loss of elderly parents. When it came to her elderly mother and father, Roz held to the practices of denial, avoidance, and distraction. But when Elizabeth Chast climbed a ladder to locate an old souvenir from the "crazy closet" with predictable results-the tools that had served Roz well through her parents' seventies, eighties, and into their early nineties could no longer be deployed. While the particulars are Chast-ian in their idiosyncrasies-an anxious father who relied heavily on his wife for stability and a former staid and a former stepmother whose overbearing personality had sidelined Roz for decades-the themes are universal: adult children accepting a parental role; aging and unstable parents leaving a family home for an institution; dealing with uncomfortable physical intimacies; managing logistics; and hiring strangers to provide the most personal care. An amazing portrait of two lives at their end and an only child coping as best she can. Can't We Talk about Something More Pleasant will show the full range of Roz Chast's talent as cartoonist and storyteller.

In the tradition of Phil Knight's Shoe Dog comes the incredible untold story of how Netflix went from concept to company-all revealed by co-founder and first CEO Marc Randolph. Once upon a time, brick-and-mortar video stores were king. Late fees were ubiquitous, video-streaming unheard was of, and widespread DVD adoption seemed about as imminent as flying cars. Indeed, these were the widely accepted laws of the land in 1997, when Marc Randolph had an idea. It was a simple thought-leveraging the internet to rent movies-and was just one of many more and far worse proposals, like personalized baseball bats and a shampoo delivery service, that Randolph would pitch to his business partner, Reed Hastings, on their commute to work each morning. But Hastings was intrigued, and the pair-with Hastings as the primary investor and Randolph as the CEO-founded a company. Now with over 150 million subscribers, Netflix's triumph feels inevitable, but the twenty first century's most disruptive start up began with few believers and calamity at every turn. From having to pitch his own mother on being an early investor, to the motel conference room that served as a first office, to server crashes on launch day, to the now-infamous meeting when Netflix brass pitched Blockbuster to acquire them, Marc Randolph's transformational journey exemplifies how anyone with grit, gut instincts, and determination can change the world-even with an idea that many think will never work. What emerges, though, isn't just the inside story of one of the world's most iconic companies. Full of counter-intuitive concepts and written in binge-worthy prose, it answers some of our most fundamental questions about taking that leap of faith in business or in life: How do you begin? How do you weather disappointment and failure? How do you deal with success? What even is success? From idea generation to team building to knowing when it's time to let go, that will Never Work is not only the ultimate follow-your-dreams parable, but also one of the most dramatic and insightful entrepreneurial stories of our time.

Summary, Analysis & Review of Ray Kroc's Grinding It Out With Robert Anderson

Beyond the Last Blue Mountain

The Grinding

Grinding It Out

Theory and Application of Machining with Abrasives

The remarkable story of how Joe Foster developed Reebok into one of the world's most famous sports brands, having started from a small factory in Bolton. Since the late 19th century, the Foster family had been hand-making running shoes, supplying the likes of Eric Liddell and Harold Abrahams - later immortalised in the film Chariots of Fire - as well as providing boots to most Football League clubs. But a family feud between Foster's father and uncle about the direction of their business led to Joe and his brother Jeff setting up a new company, inspired by the success of Adidas and Puma, and so Reebok was born. At first, money was so short that Joe and his wife had to live in their rundown factory, while the machinery that made the shoes was placed around the edge of the floor, because it was so weak it could have collapsed if they'd been positioned in the middle. But, from this inauspicious start, a major new player in the sports equipment field began to emerge, inspired by Joe's marketing vision. By the 1980s, Reebok had become a global phenomenon, when they were the first to latch onto the potential of the aerobicis craze inspired by Jane Fonda. Soon, Reeboks were being seen on Hollywood red carpets and even in the film Aliens, where Sigourney Weaver wore a pair of Reebok Altium Stompers. Like the international bestseller Shoe Dog, by Nike's Phil Knight, Shoemaker is a powerful tale of triumph against all the odds, revealing the challenges and sacrifices that go into creating a world-beating brand; it is also the story of how a small local business can transform itself, with the right products and the right vision, into something much, much bigger.

The Grinding Season, the first of a series of novels written by T. M.Hukins, is the story Rémi Rousseau, an ambitious Cajun youth who risesfrom the depths of poverty to the heights of the planter class aristocracy inmid-nineteenth century Louisiana. Swept away on a daring adventure toTexas during the Mexican Invasion of 1842, he finds his fortune, or rather,his fortune finds him. Rémi Rousseau is an ordinary young man who findhimself in extraordinary circumstances to which he must adapt if he is tomaintain his hard-won position in society and establish himself as thepatriarch of Prosperine, a struggling sugarcane plantation along theMississippi River.

Haunted is a novel made up of twenty-three horrifying, hilarious, and stomach-churning stories. They're told by people who have answered an ad for a writer's retreat and unwittingly joined a "Survivor"-like scenario where the host withholds heat, power, and food. As the storytellers grow more desperate, their tales become more extreme, and they ruthlessly plot to make themselves the hero of the reality show that has surely been made for their plight. This is one of the most disturbing and outrageous books you'll ever read, one that could only come from the mind of Chuck Palahniuk. From the world's most influential management consulting firm, McKinsey & Company, an insinuat-packed, revelatory look at how the best CEOs do their jobs based on extensive interviews with today's most successful corporate leaders—including chiefs at Netflix, JPMorgan Chase, General Motors, and Sony. Being a CEO at any of the world's largest companies is among the most challenging roles in business. Billions, and even trillions, are at stake—and the fates of tens of thousands of employees often hang in the balance. Yet, even when "can't miss" high-achievers win the top job, very few excel. Thirty percent of Fortune 500 CEOs last fewer than three years, and two out of five new CEOs are perceived to be failing within eighteen months. For those who shoulder the burden of being the one on whom everyone counts, a manual for excellence is sorely needed. To identify the 21st century's best CEOs, the authors of CEO Excellence started with a pool of over 2400 public company CEOs. Extensive screening distilled that group into an elite corps, sixty-seven of whom agreed to in-depth, multi-hour interviews. Among those sharing their views: Jamie Dimon (JPMorgan Chase), Satya Nadella (Microsoft), Reed Hastings (Netflix), Kazuo Hirai (Sony), Ken Chenault (American Express), Mary Barra (GM), and Peter Brabeck-Letmathe (Nestlé). What came out of those frank, no-holds-barred conversations is a rich array of mindsets and actions that deliver outsized performance. Compelling, practical, and unprecedented in scope, CEO Excellence is a treasure trove of wisdom from today's most elite business leaders.

Ray & Joan

Handbook of Ceramics Grinding and Polishing meets the growing need in manufacturing industries for a clear understanding of the latest techniques in ceramics processing. The properties of ceramics make them very useful as components—they withstand high temperatures and are durable, resistant to wear, chemical degradation, and light. In recent years the use of ceramics has been expanding, with applications in most industry sectors that use machined parts, especially where corrosion-resistance is required, and in high temperature environments. However, they are challenging to produce and their use in high-precision manufacturing often requires adjustments to be made at the micro and nano scale. This book helps ceramics component producers to do cost-effective, highly precise machining. It provides a thorough grounding in the fundamentals of ceramics—their properties and characteristics—and of the abrasive processes used to manipulate their final shape as well as the test procedures vital for success. The second edition has been updated throughout, with the latest developments in technologies, techniques, and materials. The practical nature of the book has also been enhanced; numerous case studies illustrating how manufacturing (machining) problems have been handled are complemented by a highly practical new chapter on the selection and efficient use of machine tools. Provides readers with experience-based insights into complex and expensive processes, leading to improved quality control, lower failure rates, and cost savings Covers the fundamentals of ceramics side-by-side with processing issues and machinery selection, making this book an invaluable guide for downstream sectors evaluating the use of ceramics, as well as those involved in the manufacturing of structural ceramics Numerous case studies from a wide range of applications (automotive, aerospace, electronics, medical devices)

COMING IN LATE SEPTEMBER 2013 Six months ago, the world watched in horror as we lost an American city. The Grinder. That's what the survivors of Tucson called the monster. Just one touch, and they became a part of it. It used their bodies as limbs and as weapons. In just a matter of hours, it became huge, a towering monstrosity made entirely out of tens of thousands of people and animals. This isn't behind-the-scenes bullshit from the point of view of the military. This isn't yet another conspiracy theory about what really happened to Air Force One that night, or about the decision to nuke Tucson. This is a rare, eyewitness account. But most importantly, it is the terrifying truth.

Are you ready to manifest exactly what you want...make more money...& have an epic life? Following his near-death experience, one simple shift in awareness tripled David Neagle's wages-his annual income then became his monthly income. The Millions Within documents David's journey from high-school dropout to multi-millionaire entrepreneur. And, while David's rise to financial freedom began as a dockworker, his dedication to learning and applying the UNIVERSAL LAWS were at work behind his unlikely success. In this guide to the laws of the Universe-how life works, and how you, your beliefs and your intentions function to produce the results and circumstances (positive & negative) you experience daily-learn how to employ conscious, intentional use of these rules to produce the results (financial and personal) that you dream of...NOW! The teachings contained inside the pages of The Millions Within are nothing short of the gateway to prosperity, no matter where you're starting from, or how long you've struggled. The trick lies in understanding where you are now is NOT where you think it is!

"Should appeal to all rugged individualists who dream of escape to the forest."—The New York Times Book Review Sam Gribley is terribly unhappy living in New York City with his family, so he runs away to the Catskill Mountains to live in the woods—all by himself. With only a penknife, a ball of cord, forty dollars, and some flint and steel, he intends to survive on his own. Sam learns about courage, danger, and independence during his year in the wilderness, a year that changes his life forever. " An extraordinary book . . . It will be read year after year. " —The Horn Book

Metal working Fluids (MWFs) provide important functions such as lubrication and cooling in the machining of metals. This book reviews the issues surrounding the use of fluids for cutting and grinding throughout the metal working process, from selection and testing to disposal. The book opens with chapters considering the mechanism and action, selection and delivery of MWFs to the machining zone before moving onto discuss the many issues surrounding MWFs during machining such as selection of the proper MWF, environmental concerns, supply methods, circulation and monitoring. The final chapters discuss the maintenance, replacement and disposal of MWFs. With its distinguished editors and international team of expert contributors, Metalworking Fluids (MWFs) for cutting and grinding is an invaluable reference tool for engineers and organizations using metal cutting/machining in the manufacturing process as well as machine designers/manufacturers and machining fluid suppliers. Chapters consider the mechanism and action, selection and delivery of MWFs to the machining zone Environmental concerns, supply methods, circulation and monitoring are also discussed Written by distinguished editors and international team of expert contributors

"He either enchants or antagonizes everyone he meets. But even his enemies agree there are three things Ray Kroc does damned well: sell hamburgers, make money, and tell stories."—from Grinding It Out Few entrepreneurs can claim to have radically changed the way we live, and Ray Kroc is one of them. His revolutions in food-service automation, franchising, shared national training, and advertising have earned him a place beside the men and women who have founded not only businesses, but entire empires. But even more interesting than Ray Kroc the business man is Ray Kroc the man. Not your typical self-made tycoon, Kroc was fifty-two years old when he opened his first franchise. In Grinding It Out, you'll meet the man behind McDonald's, one of the largest fast-food corporations in the world with over 32,000 stores around the globe. Irrespressible extrovert, intuitive people person, and born storyteller, Kroc will fascinate and inspire you on every page.

The movie The Founder, starring Michael Keaton, focused the spotlight on Ray Kroc, the man who amassed a fortune as the chairman of McDonald's. But what about his wife Joan, the woman who became famous for giving away his fortune? Lisa Napoli tells the fascinating story behind the historic couple. Ray & Joan is a quintessentially American tale of corporate intrigue and private passion: a struggling Mad Men-era salesman with a vision for a fast-food franchise that would become one of the world's most enduring brands, and a beautiful woman willing to risk her marriage and her reputation to promote controversial causes that touched her deeply. Ray Kroc was peddling franchises around the country for a fledgling hamburger stand in the 1950s—McDonald's, it was called—when he entered a St. Paul supper club and encountered a beautiful young piano player who would change his life forever. The attraction between Ray and Joan was instantaneous and instantly problematic. Yet even the fact that both were married to other people couldn't derail their roller coaster of a romance. To the outside world, Ray and Joan were happy, enormously rich, and giving. But privately, Joan was growing troubled over Ray's temper and dark secret, something she was reluctant to publicly reveal. Those close to them compared their relationship to that of Elizabeth Taylor and Richard Burton. And yet, this volatility paved the way for Joan's transformation into one of the great philanthropists of our time. A force in the peace movement, she produced activist films, books, and music and ultimately gave away billions of dollars, including landmark gifts to the Salvation Army and NPR. Together, the two stories form a compelling portrait of the twentieth century: a story of big business, big love, and big giving.

It's time to go back to basics! If you're interested in art, but find that it's becoming an increasingly expensive hobby, The Organic Artist is just the book for you! The Organic Artist encourages you to return to those days when art was made with all-natural materials, like charcoal and birch bark. Immersing you in the natural world, The Organic Artist seeks to inspire creativity by connecting you to your organic roots. In addition to offering a wide variety of suggestions for using nature as supplies for art, this book also introduces the concepts of awareness and perception that are foundational to the creative process. Readers will refine drawing skills, as well as increase their appreciation for the visual arts and the natural landscape. Some of the projects and skills covered include the following: making paper and wild ink, working with soapstone, clay, wood, and rawhide, printmaking and stenciling, natural pigments and dyes, camouflage and body painting, and nature journaling.

Outperform, Outwork, and Outhustle Your Way to a More Successful and Rewarding Life

"Tessa Hadley recruits admirers with each book. She writes with authority, and with delicacy; she explores nuance, but speaks plainly; she is one of those writers a reader trusts."—Hilary Mantel *From the bestselling author of Late in the Day and The Past comes a compulsive new novel about one woman's sexual and intellectual awakening in 1960s London, 1967. While London comes alive with the new youth revolution, the suburban Fischer family seems to belong to an older world of conventional stability: pretty, dutiful homemaker Phyllis is married to Roger, a devoted father with a career in the Foreign Office. Their children are Colette, a bookish teenager, and Hugh, the golden boy. But when the twenty-something son of an old friend pays the Fischers a visit one hot summer evening, and kisses Phyllis in the dark garden after dinner, something in her catches fire. Newly awake to the world, Phyllis makes a choice that defies all expectations of her as a wife and a mother. Nothing in these ordinary lives is so ordinary after all, it turns out, as the family's upheaval mirrors the dramatic transformation of the society around them. With scalpel-sharp insight, Tessa Hadley explores her characters' inner worlds, laying bare their fears and longings. Daring and sensual, Free Love is an irresistible exploration of romantic love, sexual freedom and living out the truest and most meaningful version of our selves – a novel that showcases Hadley's unrivaled ability to "put on paper a consciousness so visceral, so fully realized, it heightens and expands your own" (Lily King, author of*

Euphoria).
