Medicine is concerned with the most intimate aspects of private life. Yet it is also a focus for diverse forms of public organization and action. In this volume, an international team of scholars use the techniques of medical history to analyse the changing boundaries and constitution of the public sphere from early modernity to the present day. In a series of detailed historical case studies, contributors examine the role of various public institutions – both formal and informal, voluntary and statutory – in organizing and coordinating collective action on medical matters. In so doing, they challenge the determinism and fatalism of Habermas's overarching and functionalist account of the rise and fall of the public sphere. Of essential interest to historians and sociologists of medicine, this book will also be of value to historians of modern Britain, historical sociologists, and those engaged in studying the work of Jürgen Habermas.

The internal dynamics of families have altered dramatically as the family has gradually shifted from a unit of economic production to a collection of individuals in pursuit of different goals. Taking examples from the eighteenth through the twentieth centuries, this eclectic reader illuminates changes in the American family and presents some of the methods and approaches used to study families. Linking family patterns with changing social circumstances, Family and Society in American History considers husband–wife and parent–child relationships in light of language usage, gender roles, legal structures, and other contexts. For example, new legal attitudes toward divorce emerged as marriage came to be seen as a site for individual satisfaction. Marital fertility declined as American society modernized and pregnancy and childbirth came to be seen as medical rather than family issues. Schools and other institutions of the state absorbed functions formerly performed by the family, and women's economic contributions to the family disappeared from view as the social values of the early republic divided the male (work) from the female (home) sphere. Do–It–Yourself–developed in the wake of suburbanization. In addition to identifying trends within the dominant culture, contributors consider the experiences of ethnic and immigrant families, reassessing generational conflict in Italian Harlem, comparing the attitudes of male and female Mexican migrant workers in Kansas, and showing how Chinese immigrant women targeted for rescue by Presbyterian mission workers took advantage of the gap between Chinese and American culture to increase their leverage in family and marital relationships. A diverse compendium of family life, Family and Society in American History provides an intriguing commentary on the permeability of social structures and interpersonal behavior.

This edited volume brings together natural scientists, social scientists and humanists to assess if (or how) we may begin to coexist harmoniously with the mosquito. The mosquito is humanity's deadliest animal, killing over a million people each year by transmitting malaria, yellow fever, Zika and several other diseases. Yet of the 3,500 species of mosquito on Earth, only a few dozen of them are really dangerous—so that the question arises as to whether humans and their mosquito foe can learn to live peacefully with one another. Chapters assess polarizing arguments for conserving and preserving mosquitoes, as well as for controlling and killing them, elaborating on possible consequences of both strategies. This book provides informed answers to the dual question: could we eliminate mosquitoes, and should we? Offering insights spanning the technical to the philosophical, this is the “go to” book for exploring humanity's many relationships with the mosquito—which becomes a journey to finding better ways to inhabit the natural world. Mosquitopia will be of interest to anyone wanting to explore dependencies between human health and natural systems, while offering novel perspectives to health planners, medical experts, environmentalists and animal rights advocates.
