In the tenth River Cottage Handbook, Nikki Duffy shows how to grow and cook with herbs. Herbs are the most liberating and confidence-boosting of ingredients: grow some and you feel like a proper gardener, bring some into the kitchen and you feel like a proper cook. They allow you to experiment and bring individuality to your cooking while, at the same time, anchoring you in sound culinary tradition because herbs are often responsible for those key flavours that 'make' a dish. Not only that but they are a step on the road to a more self-sufficient, homegrown, organic way of eating. In the first part of the book, Nikki explains how to get the most from herbs. She outlines the basic choosing, picking and using guidelines. The second part is a catalogue of herbs, each with grow-your-own notes, flavour descriptions and mini-recipes. Among the forty herbs that Nikki describes are basil, bay, bergamot, chives, coriander, dill, fennel, horseradish, hyssop, marigold, marjoram, mint, parsley, perilla, rocket, rosemary, sage, scented geranium, tarragon, thyme, wild garlic and winter savory. Following this are over fifty wonderful and adaptable recipes for everything from herb-scented cakes and biscuits to soups, stuffings and tarts, where more than one herb is, or can be, used. With an introduction by Hugh Fearnley-Whittingstall and full-colour photographs, Herbs is a must-have book for every kitchen.

In the fifteenth River Cottage Handbook, Tim Maddams offers a comprehensive guide to harvesting and preparing game, and a host of delicious recipes. Game offers some of the most intense, delicate, rich and varied meat around. And not only is it delicious, it can also be a healthy and more nutritious alternative to traditional red meats. Here, Tim Maddams gives an accessible guide to obtaining, assessing, preparing and cooking game, including pheasant, grouse, venison, partridge, hare, rabbit, boar and duck. Tim begins by describing the characteristics of game species, then discusses ethical and sustainable hunting, preservation and seasonality. Next he gives a step-by-step guide to skinning, feathering and butchering techniques (and if you don't have a fresh supply, how to buy game meat). Lastly he shares his seriously tasty recipes from the River Cottage kitchen, such as Slow-roast spiced soy duck, Quick-smoked duck, Lasagne of game and wild mushrooms, Partridge with pumpkin and cider, Goose sausages, Gamekeeper's pie and Roasted hen pheasant with all the trimmings. With an introduction by Hugh Fearnley-Whittingstall and colour photography throughout, Game is the indispensable guide to enjoying wild meat.

Herbs and spices are among the most versatile ingredients in food processing, and alongside their sustained popularity as flavourants and colourants they are increasingly being used for their natural preservative and potential health-promoting properties. An authoritative new edition in two volumes, Handbook of herbs and spices provides a comprehensive guide to the properties, production and application of a wide variety of commercially-significant herbs and spices. Volume 1 begins with an introduction to herbs and spices, discussing their definition, trade and applications. Both the quality specifications for herbs and spices and the quality indices for spice essential oils are reviewed in detail, before the book goes on to look in depth at individual herbs and spices, ranging from basil to vanilla. Each chapter provides detailed coverage of a single herb or spice and begins by considering origins, chemical composition and classification. The cultivation, production and processing of the specific herb or spice is then discussed in detail, followed by analysis of the main uses, functional properties and toxicity. With its distinguished editor and international team of expert contributors, the two volumes of the new edition of Handbook of herbs and spices are an essential reference for manufacturers using herbs and spices in their products. They also provide valuable information for nutritionists and academic researchers. In the thirteenth River Cottage Handbook, Steven Lamb shows how to keek and smoke your own meat, fish and cheese. Curing and smoking your own food is a bit of a lost art in Britain these days. While our European neighbours have continued to use these methods on their meat, fish and cheese for centuries, we seem to have lost the habit. But with the right guidance, anyone can preserve fresh produce, whether living on a country farm or in an urban flat – it doesn't have to take up a huge amount of space. The River Cottage ethos is all about knowing the whole story behind what you put on the table: and as Steven Lamb explains in this thorough, accessible guide, it's easy to take good-quality ingredients and turn them into something sensational. Curing & Smoking begins with a detailed breakdown of any kit you might need (from sharp knives to sausage stuffers, for the gadget-loving cook) and an explanation of the preservation process – this includes a section showing which products and cuts are most suitable for different methods of curing and smoking. The second part of the book is organised by preservation method, with an introduction to each one, and comprehensive guidance on how to do it. And for each method, there are, of course, many delicious recipes! These include chorizo Scotch eggs, salt beef, hot smoked mackerel, home-made gravadlax ... and your own dry-cured streaky bacon sizzling in the breakfast frying-pan. With an introduction by Hugh Fearnley-Whittingstall and full-colour photographs as well as illustrations, this book is the go-to guide for anyone who wants to smoke, brine or air-dry their way to a happier kitchen.

Gill gently guides the reader through simple recipes, with no need for obscure ingredients or complicated cooking. With great food at its heart, Gather is the most contemporary of cookbooks, with photography that captures a year of the best cooking and eating. 'This is a book about feeding children, but these recipes are for adults too. I don't think there should be any sharp distinctions between 'baby food,' 'children's food' and 'grown-up food'. It's a spectrum the whole family can be on, the food each person eats becoming a little more sophisticated and seasoned as they mature.' Nikki Duffy brings the River Cottage ethos to feeding children, and shows that it's never too early to involve the youngest family members in mealtimes. Her delicious seasonal pur é es and simple, wholesome recipes put the needs and wants of babies and toddlers first, whilst offering up dishes that will delight adults too. With clear advice on nutrition and weaning, The River Cottage Baby & Toddler Cookbook is the perfect starting point for your child's great food adventure. With an introduction by Hugh Fearnley-Whittingstall, this book will put real food on the table for the whole family to share.

In the fourth River Cottage handbook, Mark Diacono tells us everything we need to know to create our own productive, organic garden, no matter where we live. Drawing directly from his experience as an acclaimed climate-change gardener, and of setting up a kitchen garden from scratch for River Cottage, Mark explains the practical aspects of organic growing, introduces us to a whole world of vegetables we may not have previously considered, and does away with alienating gardening jargon once and for all. Mark begins with a catalogue of vegetables that will grow in this country, explaining for each their benefits, what varieties to go for, dos and don'ts, and popular culinary uses. He then invites us to create a wish list of foods, and shows us his own list from his early gardening days. Next, he explains how to turn this wish list into a coherent kitchen garden plan appropriate for our space, whether it be a patch of acidic soil, a roof-top garden or an allotment, whether we put on our wellies in every free moment or are 'time-poor' gardeners. Then he puts all the theory into practice, showing us how to look after nutrients in the soil, how to resist pests and diseases, and how to make our garden sustainable and organic. In clear, concise sections we learn about seed trays, supporting plants with climbing structures, mulching, composting, companion planting, irrigation and promoting pollination, and there are additional tables showing sowing and harvesting times, plant sizes, and alternative varieties of plants for different sites. About thirty recipes and a directory of useful addresses finish the book, and the handbook is complemented by bright colour photography throughout. Practical and inspiring, with a textured hard cover and an introduction by Hugh Fearnley-Whittingstall, Veg Patch is destined to join Handbooks No. 1, 2 and 3 as an indispensable household reference.

Hedgerows, moors, meadows and woods - these hold a veritable feast for the forager. Next he guides you through the tasty edible species to be found. Each one is accompanied by photographs for identification, along with their conservation status, habitat, distribution, season, taste, texture and cooking methods - not forgetting, of course, some fascinating asides and diversions about their taxonomy and history. After this there is a section describing the poisonous species to steer clear of, with identifying photographs as well as warnings about nasty 'lookalikes'.

The word of mouth results, have been the product of years of experimentation done millenniums ago. When did grandma become the epitome of wisdom and experience? Well, we should go back millenniums, when it was the job of the oldest generation to take care of the youngest generation, while the adults generation in between went out to collect food, water and other basic necessities necessary for survival. The job of raising and training the children was left to those people who were most experienced. It is possibly this reason why the oldest and the youngest generations still find that they are more compatible and comfortable with each other, due to natural preference, instinctive selection and human psychological and social behavior. So the children of the tribe, group, gathering, and city were put in charge of the elders, who used to talk to them about their ancient traditions, talk to them by their own grandparents. The rules and regulations of living in society and getting to know one's own place in the hierarchy of a tribe was thus transmitted from generation to generation through these elders. Grandpa trained the kids with tribal knowledge and physical exercise. Grandma was in charge of their overall emotional, spiritual and physical well-being. She was responsible for their health, well-being, food and other essential things necessary to keep children healthy and well-balanced members of the family and later on the tribe. ...and that caring instinct still is present... That is why the matriarch – mother – was given the job of passing on the herbal knowledge to the girls in the family, preparing them to be future matriarchs taking care of their own families, as years went by. The boys were trained into becoming warriors, teachers, farmers, food gatherers or in other professions by the males of the tribe. So the lines were demarcated out very clearly in well-regulated times since ancient days. The house, home and hearth and other duties pertaining to a domestic nature was under the jurisdiction of the females. The land, the preservation, cultivation and protection of the area around it was under the jurisdiction of the males. So it was the man's prerogative to be the hunter and the warrior, to feed and protect his family and tribe.

The Detox Miracle Sourcebook MORSE

"A beautiful book, and one which makes me want to cultivate my garden just as much as scurry to the kitchen." — Nigella Lawson "At its core this book is about cooking, but it's an essential and valuable resource for folk who love to grow their own herbs and cook. Sorted by individual herbs with detailed notes on how to grow and use them, it's going to be a book I will turn to a lot over the years." — Nik Sharma
Herb is a plot-to-plate exploration of herbs that majors on the kitchen, with just enough of the simple art of growing to allow the reader to welcome a wealth of home-grown flavours into their kitchen. Author Mark Diacono is a gardener as well as a cook. Packed with ideas for enjoying and using herbs, Herb is much more than your average recipe book. Mark shares the techniques at the heart of sourcing, preparing and using herbs well, enabling you to make delicious food that is as rewarding in the process as it is in the end result. The book explores how to use herbs, when to deploy them, and how to capture those flavours to use when they might not be seasonally available. The reader will become familiar with the differences in flavour intensity, provenance, nutritional benefits and more. Focusing on the familiars including thyme, rosemary, basil, chives and bay, Herb also opens the door to a few lesser-known flavours. The recipes build on bringing your herbs alive – whether that ’ s a quickly swizzed parsley pesto when short of time on a weekday evening, or in wrapping a crumbly Lancashire cheese in lovage for a few weeks to infuse it with bitter earthiness. With a guide to sowing, planting, feeding and propagating herbs, there are also full plant descriptions and their main culinary affinities. Mark then looks at various ways to preserve herbs including making oils, drying, vinegars, syrups and freezing, before offering over 100 innovative recipes that make the most of your new herb knowledge.

In the eleventh River Cottage Handbook, bestselling author Mark Diacono gives recipes and comprehensive guidance for keeping chickens. Chickens are a fantastic addition to a garden or outdoors space - you don't have to live in the back of beyond to have a few clucking around and giving you fresh eggs. They come in all shapes and sizes: some are layers, some are just born to strut. Mark Diacono begins at the basics, showing how you can raise chickens from eggs, and look after them once they start laying their own. The first part of Chicken & Eggs explains how to think ahead about what kind of chickens you want and how many to get, whether you are going for a breed that lays eggs regularly, or that you might eventually use for eating, or that simply looks decorative. You can choose from Orpingtons, Derbyshire redcaps, Muffed Old English Game, Leghorns and many more. The formidable River Cottage team turns their attention to all matters aquatic in this definitive guide to freshwater fish, saltwater fish, and shellfish. Hugh Fearnley-Whittingstall and Nick Fisher examine the ecological and moral issues of fishing, teach individual skills such as catching and descaling, and offer a comprehensive (and fascinating) species reference section. They also demystify the cooking of fish with 135 recipes for preparing fish and shellfish in diverse ways, from pickling to frying to smoking. This ambitious reference-cookbook appeals to both intellect and appetite by focusing on the pleasures of catching, cooking, and eating fish while grounding those actions in a philosophy and practice of sustainability. The authors help us understand the human impact on the seafood population, while their infectious enthusiasm for all manner of fish and shellfish—from the mighty salmon to the humble mackerel to the unsung cockle—inspires us to explore different and unfamiliar species. Fish is superlative food, but it’s also a precious resource. The River Cottage Fish Book delivers a complete education alongside a wealth of recipes, and is the most opinionated and passionate fish book around.

In the ninth River Cottage Handbook, Mark Diacono explains how to nurture and grow your own garden fruit. Growing fruit at home is a delicious and altogether more enjoyable alternative to buying it in the shops. Mark Diacono offers a practical and accessible guide to making the most of your garden and what it has to offer. The first part of the book is an A-Z of the different varieties of fruit, with old favourites like apples, cherries, plums, blackcurrants, white currants, redcurrants, strawberries, blueberries, gooseberries, raspberries and rhubarb as well as more exotic species like figs, grapes, cranberries, Japanese wine berries and apricots. Each is accompanied by a photograph, with detailed advice on when and how to grow and harvest. In the second part of the book, Mark gives straightforward guidelines on techniques like pruning and training, as well as how to deal with problems or pests. There is a section dedicated to growing under covers and in containers. Introduced by Hugh Fearnley-Whittingstall and with 30 delicious recipes, beautiful, full-colour photographs and a directory of useful addresses, this is the ideal reference for any aspiring fruit grower.

Fruit is pretty much the perfect food: bountiful, delicious and colourful, it also helps us to fight infection, stresses and strains. But why are we still a nation that thinks it's a bit rayc to slice a banana onto our cornflakes in the morning? A 'piece of fruit' in a lunch box, on the breakfast table or at the end of a meal is all very well, but fruit is so much more exciting than this, and we don't eat nearly enough of the stuff. Perhaps this is because we don't always understand how to use it in our cooking, or how to choose the best fruit for the season. Hugh sets out to address this head on. With 180 delicious recipes, River Cottage Fruit Every Day! will show you how to enjoy a broader eating experience and make fruit easy, fun and irresistible. You'll find recipes for all the wonderful seasonal fruit that grows in this country, and learn how to make the most of fruit from other parts of the world. Recipes include marinated lamb and fig kebabs; barbecued pork chops with peaches and sage; venison stew with damsons; and parsnip and apple cakes. There are also fresh and zingy salads as well as gorgeous cakes, tarts, pies, crumbles and puddings. With glorious photography from Simon Wheeler, this book will bring amazing new fruity vitality and flavour to your food.
