A step-by-step guide to drawing your favorite Nintendo heroes and villains.

This volume takes up the challenge of linking the focused campaigns and insights from African American campaigns for environmental justice with the perspectives of this global group of environmentally marginalized groups. The editorial team has drawn on Washington's work, on Paul Rosier's study of Native American environmentalism, and on Heather Goodall's work with Indigenous Australians to seek out wider perspectives on the relationships between memories of injustice and demands for environmental justice in the global arena. This collection contributes to environmental historiography by providing "bottom up" environmental histories in a field which so far has mostly emphasized a "top down" perspective, in which the voices of those most heavily burdened by environmental degradation are often ignored.

This was my first book and a true labor of love. I spent decades studying steam and the work of Dead Men, in both old buildings and on library shelves. I traveled the country, haunting used-book stores, looking for engineering books that held the answers to questions that nagged at me. I was obsessed with this topic, and when I finally sat to write, I poured all that I had learned into this book, and as I wrote, I tried my best to make the words sound good to you - like we were together and having a conversation. I wanted you to know what I know and I wanted you to be able to do what I can do when it comes to old steam systems. This book arrived in 1992 and has since gone though dozens of printings. We've sold it in every state as well as in foreign countries. Steam heat is everywhere there are old buildings, so why shouldn't you be the one with the answers? Dan Holohan

From #1 New York Times bestseller Mike Lupica! What happens when a star player ends up on the worst team? He either learns to lose or he stops playing the game he loves. These are the choices facing Jake, who has gone from champion to last place, testing his sportsmanship every time his soccer team gets waxed. But it's his teammate Kevin who shows Jake that being a good captain means scoring and assisting off the field as much as being the star player on it.

Proponents of professional ethics recognize the importance of theory but also know that the field of ethics is best understood through real-world applications. This book introduces students and practitioners to important ethical concepts through the lives of major thinkers ranging from Aristotle to Ayn Rand, John Stuart Mill to the Dalai Lama. Some two dozen contributors approach media ethics from five perspectives—altruistic, egoistic, autonomous, legalist, and communitarian—and use real people as examples to convey ethical concepts as something more than mere abstractions. Readers see how Confucius represents group loyalty; Gandhi, nonviolent action; Mother Teresa, the spirit of sacrifice. Each profile provides biographical material, the individual’s basic ethical position and contribution, and insight into how his or her moral teachings can help the modern communicator. The roster of thinkers is gender inclusive, ethnically diverse, and spans a broad range of time and geography to challenge the misperception that moral theory is dominated by Western males. These profiles challenge us not to give up on moral thinking in our day but to take seriously the abundance of good ideas in ethics that the human race provides. They speak to real-life struggles by applying to such trials the lasting quality of foundational thought. Many of the root values to which they appeal are cross-cultural, even universal. Exemplifying these five ethical perspectives through more than two dozen mentors provides today's communicators with a solid grounding of key ideas for improving discussion and attaining social progress in their lives and work. These profiles convey the diversity of means to personal and social betterment through worthwhile ideas that truly make ethics come alive.

In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. In Javatrekker: Dispatches from the World of Fair Trade Coffee, a unique hybrid of Fair Trade business, adventure travel, and cultural anthropology, author Dean Cycon people who make our morning coffee ritual possible. Second only to oil in terms of its value, the coffee trade is complex with several levels of middlemen removing the 28 million growers in fifty distant countries far from you and your morning cup. And, according to Cycon, 99 percent of the people involved in the coffee economy have never been to a coffee village. They let advertising and image worldview. Cycon changes that in this compelling book, taking the reader on a tour of ten countries in nine chapters through his passionate eye and unique perspective. Cycon, who is himself an amalgam-equal parts entrepreneur, activist, and mischievous explorer-has traveled extensively throughout the world's tropical coffeelands, and shows readers places and people that few if any outsiders realize the promise and hope offered by sustainable business principles and the products derived from cooperation, fair pricing, and profit sharing. Cycon introduces us to the Mamos of Colombia-holy men who believe they are literally holding the world together-despite the severe effects of climate change caused by us, their "younger brothers." He takes us on a trip through an ancient forest in discovered 1,500 years ago by the goatherd Kaldi and his animals. And readers learn of Mexico's infamous Death Train, which transported countless immigrants from Central America northward to the U.S. border, but took a horrifying toll in lost lives and limbs. Rich with stories of people, landscapes, and customs, Javatrekker offers a deep appreciation and understanding of the global trade and of the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. What is Fair Trade Coffee? Coffee prices paid to the farmer are based on the international commodity price for coffee (the "C" price) and the quality premium each farmer negotiates. Fair Trade pr floor price when the C plus premium sinks below \$1.26 per pound for conventional and \$1.41 for organics (that's us!). As important as price, Fair Trade works with small farmers to create democratic cooperatives that insure fair dealing, accountability and transparency in trade transactions. In an industry where the farmer is traditionally ripped off by a host of middlemen, this is tremendously in Fairtrade Labeling Organization (FLO), or the International Fair Trade Association (IFAT), European NGOs, for democratic process and transparency. Those that pass are listed on the FLO Registry or become IFAT members. Cooperatives provide important resources and organization to small farmers in the form of technical assistance for crop and harvest improvement, efficiencies in processing and an array of needed social services, such as health care and credit. Fair Trade also requires pre-financing of up to sixty percent of the value of the contract, if the farmers ask for it. Several groups, such as Ecologic and Green Development Fund have created funds for pre-finance lending.

Set against the backdrop of one of the most colorful countries in the world, A Glimpse of Eternal Snows is an inspiring story of courage, love and a family's determination to give their child the best life possible. In pulsating, polluted Kathmandu and an idyllic village on a river island at the foot of the Himalayas, 'Doctor Jane' and her engineer husband Simon hope to make a difference: Jane to fulfil her vision to heal and advocate for the poor, Simon to avert the floods that threaten to devastate the land every monsoon season. The Nepal people are accepting of whatever fate flings at them and here the family find sanity, compassion and joy with baby David, who in England was little more than an 'interesting case'. This is a tale of Himalayan highs and monsoon lows, of cultural complexities, unexpected wildlife and rugged terrain, of vivid color, superstition and spicy smells.

My husband is cruel, ruthless, and despicable.I hate him with every fiber of my being.The only reason I haven't killed him or tried to run away is because of the promise I made. I sold myself to save someone I loved...and this is the price I have to pay.I was sitting alone in a bar when the most handsome man walked inside. Striking blue eyes, cheekbones as sharp as glass, and a muscular body fit for a war. He was gorgeous. I couldn't take my eyes off him. When he bought me a drink, I didn't say no. I'd been unfulfilled for so long, and I wanted a real man for the night. My husband had his affairs so why couldn't I?I noticed the peculiar ring on his right hand, a diamond carved into a skull. If only I'd known what that meant, I would have known who this man was.The Skull King.A man more cruel and ruthless than my own husband.

The stories are legendary, the characters unforgettable, the world horrible and disturbing. Howard Phillips Lovecraft may have been a writer for only a short time, but the creations he left behind after his death in 1937 have shaped modern horror more than any other author in the last two centuries: the shambling god Cthulhu, and the other deities of the Elder Things, the Outer Gods, and the Great Old Ones, and Herbert West, Reanimator, a doctor who unlocked the secrets of life and death at a terrible cost. In Lovecraft Unbound, more than twenty of today's most prominent writers of literature and dark fantasy tell stories set in or inspired by the works of H. P. Lovecraft.

After a brutal night in the ER, Luke can't fight his desire for his wild sister-in-law another second. It's been a lifetime of doing the right thing. Tonight he's going to follow desire instead. But even after the man she always thought was such a good boy turns out to be sinfully bad between the sheets, Janica soon realizes she wants more than Luke's body. She wants his heart too.

This unique A-Z guide to central heating wiring systems provides a comprehensive reference manual for hundreds of items of heating and control equipment, making it an indispensable handbook for electricians and installers across the country. The book provides comprehensive coverage of wiring and technical specifications, and now includes increased coverage of combination boilers, recently developed control features and SEDBUK (Seasonal Efficiency of Domestic Boilers in the UK) boilers ratings, where known. In addition to providing concise details of nearly 500 different boilers fuelled by electric, gas, oil and solid fuel, and over 400 programmers and time switches, this invaluable resource also features numerous easy-to-understand wiring diagrams with notes on all definitive systems. Brief component descriptions are provided, along with updated contact and website details for most major manufacturers. Ray Ward has spent over 20 years as a specialist in the field of wiring domestic central heating systems and the knowledge he has gained from hands-on experience and staff training is now brought together in this comprehensive handbook.

The precise shape of a protein is a crucial factor in its function. How do proteins become folded into the right conformation? Molecular chaperones and protein folding catalysts bind to developing polypeptides in the cytoplasm and ensure correct folding and transport. This Guidebook catalogues the latest information on nearly 200 of these molecules, including the important class of heat shock proteins; each entry is written by leading researchers in the field.

Re-Write Your Life is a book of remarkable inspirational stories and will guide you to write your own in a way that transforms the impact of painful stories from negative to positive. Woven throughout the pages are many of the author's true-life stories including a candid account of her struggles with bi-polar illness. In Chapter 3, A Time in My Life When I Was Stronger Than I Thought, June writes about the time her personal and professional life came to a crashing halt when her manic-depressive illness kicked in again. She bravely shares what she did to empower herself and hundreds of others suffering with a mental illness. June's strength and determination to make a positive difference in the world is demonstrated once again in Re-Write Your Life. She has also invited 33 other women and men to share their journeys through beautifully written stories of pain and triumph. This is a book you won't want to put down. But you must to pick up your pen and write your own unique stories. "June Swadron is both a guide and a muse. Her book is a bright lantern, illuminating the often dark and tricky terrain of the soul. Grounded in personal experience, her techniques catalyze the deep authenticity possible to us all." Julia Cameron, author of The Artist's Way

From youth culture to adolescent sexuality to the consumer purchasing power of children en masse, studies are flourishing. Yet doing research on this unquestionably more vulnerable-whether five or fifteen-population also poses a unique set of challenges and dilemmas for researchers. In Representing Youth, Amy Best has assembled an important group of essays that address these concerns head on, providing scholars with thoughtful and often practical answers to their many methodological concerns. These original essays range from how to conduct research on youth in ways that can be empowering for them, to issues of writing and representation, to respecting boundaries and to dealing with issues of risk and responsibility to those interviewed.Contributors include: Amy L. Best, Sari Knopp Biklen, Elizabeth Chin, Susan Driver, Marc Flacks, Kathryn Gold Hadley, Madeline Leonard, C.J. Pascoe, Rebecca Raby, Alyssa Richman, Jessica Taft, Michael Ungar, Yvonne Vissing, and Stephani Etheridge Woodson.

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Changing approaches to diagnosis and clinical management of the uterus are comprehensively examined in this book. It gives a concise update of new concepts in physiology and pathology and their application in clinical practice. The book is designed especially for the gynecologist actively involved in patient care. Topics discussed include the pathophysiology of diethylstilbestrol (DES) changes, the immunology of the uterus, papillomaviruses and cervical neoplasia, endocervical carcinoma, mesenchymal tumors and diagnostic procedures such as colposcopy of the cervix, hysterosalpingography, and magnetic resonance imaging. The status of contemporary management is presented for hysteroscopy and hysteroscopic surgery, the congenital absence of the uterus and vagina, anovulatory dysfunctional uterine bleeding of the adolescent, uterine leiomyomata, genital prolapse, endometrial adenocarcinoma and childhood rhabdomyosarcoma of the vagina and uterus.
