quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these

a range of gerontologic disciplines use new research as bases to develop care solutions under the mandates of managed care. Maintaining quality and improving cancer care does not occur in a vacuum. It requires a coordinated effort among many team members to whom this book is directed. Cancer care in the United States is in crisis as per a recent National Institute of Health publication. Much of this has to do with the complexity of the cancer care, its delivery systems, the aging

population and the diminishing workforce. We need to be smarter and more efficient to de-escalate this crisis and improve the survival and survivorship of our cancer patients.

Improved survivorship of families and caregivers will be included as well. The book will follow the continuum of cancer care model as its outline vide infra. It will provide many concrete instances of successful practices and programs which improve survivorship. Initially it will discuss the current crisis on

a global and then national platform. There will be a discussion about disability adjusted life years lost, lost productivity, loss of life and its impact upon the nation and communities. The financial impact of cancer on society and government will be included in this.

Population health management as regards cancer will then look at communities served, community health needs assessments and social determinants of health. How prevention and screening programs can be formulated

from the above will be illustrated. Compliance with treatments as promulgated by the Commission on Cancer's Cancer Program Practice Performance Reports (CP3R) will be reviewed. The relationship between compliance and improved survival will be highlighted. Navigation and distress management to assure patients complete planned treatments will be included in this section. Quality of survivorship will review the four domains of life- spiritual, social, psychological and physical.

How these can be maximized through system improvement and program development will be illustrated. Financial issues and legal protections will also be included in this section. Survivorship care planning i.e. surveillance for recurrent cancer, prevention of related and new cancers will be an integral part of this section. Palliative, end of life care and bereavement care will complete the continuum cycle. Identifying hospitalized patients in need of palliative needs will be refreshed. How to establish

This book addresses current issues surrounding hospital readmissions and the practice of post-acute and long-term care (LTC). Thoroughly updated, the Second Edition of this practical pocket guide presents new regulations governing these services and lessens the uncertainty involved in caring for patients in a long-term care facility. The book is divided into four sections that cover: types of care, which include community care, nursing facility care, and teamwork; clinical medicine, with suggested approaches to common conditions and wound care; psychosocial aspects of care, which include ethical and legal issues and caring for families; and special

issues, with chapters on documentation, coding, and medication management. As community-based care is an area of rapid growth where the elderly are increasingly seeking their medical care, new chapters have also been added that describe these programs. Written by expert contributors, many of whom have worked within the American Medical Directors Association to create and disseminate a knowledge base for post-acute and LTC, this is a valuable resource for clinicians and educators seeking to maximize the care and living experience of residents in post-acute and long-term care settings.
