Christopher Keane has spent 20 years in the business, learning the truths--and the tricks--of writing a selling screenplay. In *How to Write a Selling Screenplay*, he takes writers through the entire process, from developing a story to finding the best agent. Using an annotated version of an often-optioned screenplay of his own, and citing examples from movies ranging from *Casablanca* and *Lethal Weapon* to *Sling Blade* and *The English Patient*, he discusses how to create three-dimensional characters, find a compelling story, build an airtight plot structure, fine-tune dialogue, and much more. Keane's tips on the difference between writing for film and television, as well as his advice on dealing with Hollywood movers and shakers, make this an essential companion for people writing their first--or their fortieth--screenplay. From the Trade Paperback edition.

We have all heard stories of web cam models making hundreds of thousands of dollars, but what are opportunities are there for technically minded guys (and girls) who would prefer to be managers than performers? Running a professional studio requires a great deal of expertise but is ideally suited to somebody with a background in computing. No matter whether you are an acknowledged Stack Overflow expert or an anonymous coward that lurks among the Slashdot trolls, becoming a web cam studio owner is a great way to become your own boss. This book is a how-to guide on getting started before your current job is outsourced to Bangalore or replaced completely by artificial intelligence algorithms. From selecting a location to recruiting models, this book will guide you through the process of setting up a fully functioning studio anywhere in the world. It explains all the equipment that you will need to get started as well as how to train your models and get the very best out of each one. There is a full chapter on the increasingly complex areas of model marketing and branding, as well as a very detailed look at the vast potential of off-line profits, ranging from custom videos and personalised picture sets to fetish exotica, such 'burusera' underwear sales and intimately flavoured pussy pops. The demand for model related products will certainly make your eyes pop. It also takes an indepth look at subjects such as teledildonics and virtual reality. This book is unique in that it even anticipates the death of the camgirl, explaining how they are quickly being replaced by AI-powered, digital chatbots. The author uses his own wide ranging experience and unique perspective to reveal one of the most profitable new industries of the new millennium.

Turning your great idea into reality always feels like the most difficult step in getting your start-up off the ground - until you realize that nobody beyond your family and close friends knows about your amazing product or service. This difficult lesson evades many aspiring entrepreneurs: The success of your startup is limited by the number of potential customers who know about it. Ideally, you'll market your startup well before you're open for business. And you need to spread the word quickly to gain customers. Remember that: "Short-term wins absolutely exist, but instead of spending time and money searching for them, early-stage companies should formulate repeatable, scalable marketing techniques." In other words, your core marketing strategy shouldn't be swinging for the fences and trying desperately to create a viral video. Rather, you should be focusing on the following basics to increase exposure in a sustainable way: define your brand, reach your audience and craft a SEO strategy. You'll find a great insight about Time Management: Time Management is about living your best life. It's about having time to focus on your essential tasks, skills and passions. It's about streamlining your practices and business tasks into systems that you can manage yourself quite quickly and

efficiently. Be ready to analyse your market segment, reach your customers, market and sell your product. Make your start-up a successful project!
