An Interpersonal Approach

Contemporary Practice

Psychiatric-Mental Health Nursing

The concept of "the craft of caring" dictates that the basis of good nursing practice is a combination of both art and science, encouraging nurses to take a holistic approach to the practice of psychiatric and mental health nursing. Supported by relevant theory, research, policy, and philosophy, this volume reflects current developments in nursing practice and the understanding of mental health disorders. The book includes case studies of patients with anxiety, schizophrenia, and bipolar disorder as well as victims of sexual abuse, those with an eating disorder, homeless patients, and those with dementia and autism.

This newly published second edition is the definitive book covering the essentials of psychiatric-mental health (PMH) nursing applicable at all practice levels and settings. It articulates what is expected of all psychiatric-mental health nurses, specifying the who, what, where, when, why and how of their practice. It presents the underlying assumptions and characteristics, addresses matters of environments and settings as well as education and training requirements, and covers key issues and trends and the ethical and conceptual bases of the specialty.

Moreover, it specifies the competencies for nursing practice and professional performance of all PMH registered nurses. While this foundational volume is primarily for those directly involved with psychiatric-mental health nursing practice, education and research, other nursing and allied health care providers, researchers and scholars will find value in this content.

"Psychiatric and Mental Health Nursing" has established itself as Australia and New Zealand's foremost mental health nursing text and is an essential resource for all undergraduate nursing students. This new edition has been thoroughly revised and updated to reflect current research and changing attitudes about mental health, mental health services and mental health nursing in Australia and New Zealand.?

in the theory of mental health nursing. Case studies throughout the text allow readers to understand the application of theory in every day practice. Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues. Exercises for class engagement complement learning and development in the classroom environment.

Addressing contemporary mental health issues facing psychiatric nursing today, as well as traditional clinical skills, this reference work links stress, trauma, and behavioural health problems to neurobiological function and immune system depletion. This framework pinpoints assessment and selection of intervention strategies especially useful in this era of managed care, focused care, and time-limited treatment. The book describes the biology of mental illness and psychopharmacological interventions, provides a DSM-IV diagnosis and a psychiatric nursing diagnosis to a patient condition within the context of the nursing care plan, and clearly demonstrates how nurses integrate neurobiological, behavioural, and social science theories and research into patient care.

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter

It incorporates a reader-friendly style, and an emphasis on therapeutic communication and evidence-based practice. Perfect for shorter psychiatric nursing courses, this streamlined psychiatric text includes need to know information and key DSM-5 content you need to pass your course and prepare for the NCLEX®. A neurobiology of the brain teaching tool provides a visual depiction of how the disorder affects brain function — and what drugs are used to treat it. Additionally, this new edition includes Giddens Concept boxes, Integrative Care boxes, updated clinical disorders chapters, and new use of nursing diagnosis language International Classification for Nursing Practice (ICNP) which smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems Neurobiology of the brain feature provides a visual depiction on how the disorder affects brain function and what drugs are used to treat the disorder. Applying Evidence Based Practice boxes throughout the clinical chapters pose a question, walk you through the process of gathering evidence-based data from a variety of sources, and present a plan of care based on the evidence. Vignettes describing psychiatric patients and their disorders add more practical application to the chapter material. DSM-5 diagnostic criteria identify medical diagnostic criteria for most major disorders. Applying Critical Judgment introduces clinical situations in psychiatric nursing at the end of all chapters with thought provoking questions that engage critical thinking. NEW! Integrative Care boxes address alternative therapies to treat psychiatric illnesses. NEW! Giddens Concept boxes at the beginning of each chapter tie to the topics discussed in that chapter. UPDATED! Clinical disorders chapters such as Schizophrenia, Bipolar Disorders and Somatoform Disorders, and many others reflect the latest evidence-based research and practice. NEW! ICNP nursing diagnosis language smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems. UPDATED! Cultural Considerations sections include more updated and relevant material, whenever possible in the clinical chapters, and address cultural considerations with various patients and appropriate care.

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-

approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

"Psychiatric Mental Health Nursing emphasizes interpersonal relations as the foundation for nursing practice and the cornerstone for relationship-based care. Starting out with an important historical overview of the profession, the student is introduced to the rich history of psychiatric mental health nursing. This text then guides the nursing student through the essential phases of self-discovery while integrating interpersonal nursing theory concepts into practice with various populations"--

" The editors and contributors are to be congratulated for their clear effort to bring some degree of correction to the singular emphasis on pharmacotherapy. While it is clear that pharmacotherapy has a role to play in treatment, it is equally clear that the use of relationships as therapy has an equal if not more important role to play. There are several other features of this text that commend it to the student and the nurse seeking a review or a refresher course. First, the authors have done an excellent job in noting historical context. Second, [they] have made extensive use of the current research literature." - Grayce M. Sills, PhD, RN, FAAN Thoroughly updated to correlate with DSM 5 diagnostic descriptions and QSEN guidelines, the second edition of this highly acclaimed undergraduate psychiatric nursing text features concrete strategies for establishing interpersonal relationships as the basis not only for working with the psychiatric patient population, but as a timeless foundation for all nursing practice. The text guides students through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice. Modules designed to foster growth in therapeutic use of self, including the importance of boundary management, are integrated

Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

A Practical Focus on the Skills and Concepts Essential to Your Success With an accessible, clear and student-friendly approach, Psychiatric-Mental Health Nursing clarifies challenging concepts and helps you build a foundation for working successfully with clients experiencing mental health challenges regardless of care setting. The text explores the full spectrum of psychiatric nursing, helping you master specific nursing interventions, hone your therapeutic communication skills and learn to apply content effectively within the framework of the nursing process. New! Unfolding Patient Stories written by the National League for Nursing put the nursing process in a realistic context to prepare you for successful client interactions and interventions. Clinical Vignettes familiarize you with the features of major disorders you are likely to encounter in practice. Therapeutic Dialogues help you perfect your communication skills with specific examples of nurse-client interactions. Best Practice boxes provide the latest evidence-based findings in psychiatric nursing. Self-Awareness features foster your personal and professional development through self-reflection. Concept Mastery Alerts clarify important concepts essential to your classroom and clinical success. Watch and Learn icons point you to corresponding true-to-life Lippincott® Theory to Practice Video Series videos for a richer understanding of important mental health disorders. Built-In Study Guide reinforces your understanding with multiple-choice questions, multiple-response questions and clinical examples at the end of each chapter. Nursing Care Plans demonstrate effective approaches for addressing specific client disorders. Drug Alerts highlight essential concerns related to psychotropic drugs. Warning boxes alert you to FDA considerations for specific medications. Cultural Considerations help you ensure culturally sensitive care for a wide range of client populations. Elder Considerations sections prepare you to care for the growing population of older adults. Client/Family Education boxes boost your teaching capabilities. Nursing Interventions detail key treatment strategies for specific disorders. DSM-5 Diagnostic Criteria boxes summarize the medical diagnostic features of specific disorders.

This text fills a void in advanced practice nursing literature by providing a foundation for integrating psychopharmacology, psychotherapy and Complementary and Alternative Medicine (CAM) into advanced practice nursing. The text includes coverage of neurobiology, theory and research evidence related to psychopharmacology, psychotherapy and complementary and alternative medicine interventions. This text addresses the issue of defining and integrating relationship-based approaches with psychopharmacological and CAM approaches by providing beautifully-designed and easy-to-follow decision trees for initiating specific treatment and discussion of specific continuing care issues. This text has a lifespan focus and includes pediatric pointers and aging alerts.
