- Books available for other subjects including Physics, Chemistry, Biology, Mathematics, Economics, English
- Primary level, Secondary level, GCE O-level, GCE A-level, iGCSE, Cambridge A-level, Hong Kong DSE
- visit www.yellowreef.com for sample chapters and more

Originally published in 1985. ‘Europe’ and the EEC seemed to be virtually synonymous for the majority of our population and the ambivalent feelings many people have about the Community, together with the consistently bad press it received in the UK, seemed to engender a hostility in educational circles towards teaching about Europe as a whole. However, if one of the aims of education is to increase children’s awareness, tolerance and understanding of the world about them; to widen their experience and horizons; then teaching about the wider world must have a place in the curriculum. This book argues for education about Europe, not necessarily in favour of Europe, breaking down the national insularity of the UK curriculum and using Europe as one convenient ‘window on the wider world’.

Cambridge IGCSE and O Level Geography has been written specifically for Cambridge International syllabuses

0460 and 2217. Filled with sources, graphs and case studies, the coursebook requires students to examine a range of information, helping to build their analytical skills. Written by highly experienced authors and Cambridge trainers, this coursebook is updated to support both Cambridge IGCSE and O Level students. It includes clear and practical support, case studies from 25 different countries, fieldwork ideas and a range of interesting content. The accompanying CD-ROM contains support sheets for the topics covered, outline maps and sample exam-style questions. Answers to the activities are in the teacher's resource.

Have you ever wondered whether individuals born in the year of the Dragon are truly blessed? Or why you can't find a taxi when you need one? What about the effects of superstitious beliefs on housing prices? Kiasunomics© explores these issues and more in a series of stories through the lens of Teng, the protagonist of this book. Told in a conversational story-telling style yet grounded on rigorous research, the book explains the influences and outcomes of the decisions we make, using simple economic logic. The book follows the life journey of Teng — from birth to adulthood — and examines how seemingly innocuous decisions bear economic consequences on his life. It starts with the decision by Teng's parents to have him as a Dragon baby and shows how this decision affects not only his education but also his career and spending in the long term. The grown-up Teng in later chapters, is a taxi driver who learns that the daily budgeting of finances from many of his taxi-driving friends has proven to be poor financial planning. The story also shows how his purchase of a flat based on superstitious beliefs, and its location near a primary school and a Mass Rapid Transit station influences prices, and with some surprising results. This book touches the man on the street with issues that many Singaporeans can identify with. These include how Singaporeans' shopping in Johor affects their spending and savings; how different shoppers respond variedly to predictable promotions such as the Great Singapore Sale; how the haze or a mere nearby construction site affects water and electricity consumption; how playing golf elevates women's opportunities to sit on corporate boards; how Singaporeans' travel patterns are affected by their opinion towards public transportation; and how retirement poses financial challenges in silver years. These and many more are unravelled in the 20 stand-alone chapters through the authors' application of their research findings to day-to-day issues. Kiasunomics© brings to light that research can be made relevant to our daily living. Research helps us make sense of what we do and with that, we can learn to make better decisions for a smarter thinking nation.

Cambridge IGCSE Computer Studies Revision Guide is designed to help students prepare for the examination. The book instills confidence and a thorough understanding of the topics learned by the students as they revise for an examination in Computer Studies.

A Compass for Living and Loving for All Times

Cambridge IGCSE and O Level Business Studies 5th edition

Cambridge IGCSE® and O Level Geography Coursebook with CD-ROM

Final Exam: A Novel

Exam Papers for 'o' Level Physics

Reissuing works originally published between 1971 and 1994, this collection includes books which offer a broad spectrum of curriculum, both within individual schools and the wider issues around curriculum development, reform and implementation. Some cover the debate surrounding the establishment of the national curriculum in the UK while others are a more international in scope. Many of these books go beyond theory to discuss practical issues of real curriculum changes at primary or secondary level. The collection includes books on cross-curricular topics such as citizenship and environment, and also guidance, careers, life skills and pastoral care in schools. A fantastic collection of education history with much still relevant today.

'Exams tend to corrupt; final exams corrupt finally.' This novel is about exams, literature, sex, cancer and time. Part 1: 1961: Examining a mind. Pembroke College, Cambridge. Peter Green and his friends Jack (big, dangerous) and Casey (small, sinister) sit their final examinations in English. Keen, they discuss their literary ideas. Peter, whose main study-aid is sexual pleasure, discards his girlfriend Arabella, one of his two girlfriends. Competitive exams apparently subvert left-wing ideals. He alienates a don, Haggerty. Discovers literary 'covert plotting', Peter overlooks real-life covert plots. Part 2: 1969: Examining a campus. Sussex University. Jack, tricked by Haggerty, lectures there. Peter quarrels with radical students. Part 3: 2011: Examining a body. Hospitals in and around London undergo intimate examinations. Death makes incursions. Now what use is the study of literature?

Cambridge O Level English Second Edition has been written for students preparing for the Cambridge O Level English Language examination conducted by Cambridge International Examinations. Written in a clear and accessible style, the book offers comprehensive coverage as per the revised syllabus. Updated and designed for class use as well as independent study, the book prepares students for the examination.

The author attempts to answer the question of why ESL classroom talk is the way it is. Basing her answer on a case study of an ESL community, she argues that classroom talk may be linked in important ways to an operative sociocultural structure of pedagogy over and above the classroom at the institutional level.

This book offers a critical analysis of radicalization in Pakistan by deconstructing the global and the official state narratives designed to restrain Pakistani radicalization. Chapters are centered around three distinct themes: educational norms, religious practices and geo-political aspects of radicalization to examine the prevalent state and global practices which propagate Pakistani radicalization discourse. The book argues that there is both a global agenda, which presents Pakistan as the epicenter and sponsor of terrorism, and a domestic, or official, agenda that portrays Pakistan as the state which sacrificed and suffered the most in the recent War on Terror, which allow the country to gain sympathy as a victim. Delineating both conflicting agendas through a critical analysis of global and state practices in order to understand the myths and narratives of radicalization in Pakistan constructed by powerful elites, the book enables readers to gain a better understanding of this phenomenon. A multidisciplinary critical approach to comprehending radicalization in Pakistan with innovative prescriptions for counter-radicalization policy, this book will be of interest to researchers working in the fields of International Relations, Security Studies, Asian Politics, as well as Religious Studies and Education, in particular in the context of South Asia.

This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2020. With the recent scrapping of GCSEs fresh in everyone's minds, The O Level Book is the perfect book to settle that age-old argument between the generations: were the exams of yesteryear really harder than anything children have to face today in the age of calculators and spell checkers? Are contemporary kids less intelligent than previous generations? Here is the chance to find out as the whole family pit their wits against one another in the ultimate generation game, contrasting the schooling of yesteryear with modern educational practices. Testing you on a range of old-school topics: English Language; General Science; Geography and History; Household Cookery; Mathematics. A wonderfully nostalgic yet testing anthology, The O Level Book encourages you to dust off your slide rules and get your thinking caps on to see who will come out on top in your family!

These resources have been created for the Cambridge IGCSE® and O Level Additional Mathematics syllabuses (0606/4037), for first examination from 2020. This coursebook gives clear explanations of new mathematical concepts followed by exercises. This allows students to practise the skills required and gain the confidence to apply them. Classroom discussion exercises and extra challenge questions have been designed to deepen students' understanding and stimulate interest in Mathematics. Answers to coursebook questions are in the back of

the book.

• 10 sets of complete solutions to the challenging examination questions • full and complete mark schemes and exam reports are included for the candidate to review his / her answers • best used just before taking the actual examination • complete edition eBook available

These Books Will Act As Tools For Preparation And Revision For Students. These Books Have An Edited Answer Guide For Each Paper Based On The Marks Scheme Written By Cie Principal

From Testing to Assessment: English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in three major settings: in countries such as Japan and Brazil where English functions as the language of international commerce; in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government; and in such countries as Canada, the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy implications, which is grounded in literacy theory as well as in practical constraints such as available human and material resources.

Exam Papers for Gce "o" Level Additional Maths

As teachers we often tend to expect other countries to teach chemistry in much the same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over

the world: Teaching Chemistry around the World. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand - due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving - we have to learn from each others' educational systems.

A new, full-colour textbook matched exactly to the syllabus, featuring: - Data-based structured questions - Multiple choice questions at the end of every chapter - Student activities throughout This title is endorsed by Cambridge International Examinations

Fulfill your potential and attain the goals in all aspect of your life.

First published in 1984, this book focuses upon pupil perspectives of schooling from first school to school leaver, taking their thoughts and feelings as accurate assessments of their experience. The study presents what was at the time new thinking and research findings on a wide range of important topics to provide an insight in
