Developing Web Applications with Oracle ADF Essentials covers the basics of Oracle ADF and then works through more complex topics such as debugging and logging features and JAAS Security in JDeveloper as the reader gains more skills. This book will follow a tutorial approach, using a practical example, with the content and tasks getting harder throughout. "Developing Web Applications with Oracle ADF Essentials" is for you if you want to build modern, user-friendly web applications for all kinds of data gathering, analysis, and presentations. You do not need to know any advanced HTML or JavaScript programming. Business logic can be implemented by adding Java code at well-defined hook points, so you do not need to know advanced object-oriented programming-regular Java programming skills are enough.

Develop enterprise architect skills by building secure, highly available, and cost-effective solutions with Oracle Functions, Terraform, and the Oracle Cloud VMware Solution Key Features Explore Oracle's Gen 2.0 Cloud infrastructure and its high-performance computing capabilities Understand hybrid cloud capabilities and learn to migrate apps from on-premises VMware clusters to OCI Learn to create Kubernetes clusters and run containerized applications on Oracle's Container Engine Book Description Oracle Cloud Infrastructure (OCI) is a set of complementary cloud services that enables you to build and run a wide range of applications and services in a highly available hosted environment. This book is a fast-paced practical guide that will help you develop the capabilities to leverage OCI services and effectively manage your cloud infrastructure. Oracle Cloud Infrastructure for Solutions Architects begins by helping you get to grips with the fundamentals of Oracle Cloud Infrastructure, and moves on to cover the building blocks of the layers of Infrastructure as a Service (IaaS), such as Identity and Access Management (IAM), compute, storage, network, and database. As you advance, you'll delve into the development aspects of OCI, where you'll learn to build cloud-native applications and perform operations on OCI resources as well as use the CLI, API, and SDK. Finally, you'll explore the capabilities of building an Oracle hybrid cloud infrastructure. By the end of this book, you'll have learned how to leverage the OCI and gained a solid understanding of the persona of an architect as well as a developer's perspective. What you will learn Become well-versed with the building blocks of OCI Gen 2.0 Cloud Control access to your cloud resources using IAM components Manage and operate various compute instances Tune and configure various storage options for your apps Develop applications on OCI using OCI Registry (OCIR), Cloud Shell, OCI Container Engine for Kubernetes (OKE), and Service Mesh Discover ways to use object-relational mapping (ORM) to create infrastructure blocks using Terraform code Who this book is for This book is for cloud architects, cloud developers, and DevSecOps engineers who want to learn how to architect and develop on Oracle Cloud Infrastructure by leveraging a wide range of OCI IaaS capabilities. Working knowledge of Linux, exposure to basic programming, and a basic understanding of networking concepts are needed to get the most out of this book.

Teachers, principals, school administrators, even school support staff know that it "takes a village to educate a child". Unfortunately, educators, parents and tax payers are often on different sides of issues, and work at cross purposes. Teachers get frustrated and stressed, and parents get angry, upset, and often aggressive and hostile towards school staff, often because they care so much. In this practical and hands-on book, teachers, administrators and school staff can learn to deal with even the most difficult parents, even those who are insulting and challenging. You'll learn over 100 hands-on, practical tactics to: Take control of difficult conversations with parents Maintain your own self-control when interacting with upset, and even abusive parents and members of the community. Reduce the time and stress involved in dealing with uncooperative parents. Apply the Psychology of anger, and basic psycholinguistic elements to establish rapport and bridges when conflict happens. Apply basic principles of Jiu Jitsu and Aikido to difficult conversations. Stop verbal abuse cold, while maintaining a professional demeanor and focusing on the welfare of the student. Handle non-verbal intimidation tactics smoothly and safely. Set limits and apply them to difficult interactions when the gentler methods of verbal self-defense fail. Ideal for teaching staff, but also school principals, school superintendents and school board officials -- anyone who deals directly with parents and community members. Included is a special chapter for principals and administrators with tactics to use to support teachers and staff in building bridges with the community, rate payers, and parents.
