

Passguide

The Medicinal Chemist's Guide to Solving ADMET Challenges summarizes a series of design strategies and tactics that have been successfully employed across pharmaceutical and academic laboratories to solve common ADMET issues. These are exemplified with a curated collection of concrete examples displayed in a highly visual "table-of-contents" style format, allowing readers to rapidly identify the most promising approaches applicable to their own challenges. Each ADMET parameter is introduced in a concise yet comprehensive manner and includes background, relevance and screening strategies. Medicinal chemistry knowledge of how best to modify molecular structure to solve ADMET issues is challenging to retrieve from the literature, public databases and even corporate data warehouses. The Medicinal Chemist's Guide to Solving ADMET Challenges addresses this gap by presenting state-of-the-art design strategies put together by a global group of experienced medicinal chemists and ADMET experts across academia and the pharmaceutical industry.

PASS FIRST! This textbook provides you with the tools and techniques to ensure your answers align with awarding organisation assessment criteria requirements. While the unit textbook Award in Education and Training: Understanding Assessment in Education and Training provides the information needed to ensure you pass that unit of the qualification, this textbook seeks to ensure you fully understand how to apply that information effectively to your assessment(s). This will reduce the risk of you misunderstanding, over-answering or under-answering a question or task and provide you with a better understanding of what each element / assessment criteria of the unit requires. It also includes practical suggestions related to practice in the sector, what to focus on in your response, how to structure the response and further sources of information or guidance to consult or reference in order to support your answer. This textbook will provide you with the tools and, together with the above unit textbook, the information needed to pass each assessment first time. This textbook can also be used alongside the qualification textbook Achieving your Award in Education and Training: The Comprehensive Course Companion [tags: assessment, differentiation, summative assessment, summative feedback, formative assessment, formative feedback, constructive feedback, learner-centred, tutor-centred, AET]

Historical Highlights of Eagle Pass and Maverick County

Welcome to the epicenter of backcountry skiing and snowboarding on Colorado's Front Range. Since the 1930s skiers have been exploring the slopes surrounding US Highway 40 as it climbs and descends Berthoud Pass. This was the former home of one of Colorado's pioneering ski areas and when it closed, the Pass quickly emerged as the most popular backcountry ski destination on the Front Range. Quick access, a consistent snowpack, and endless discovery continue to draw skiers to Berthoud Pass. The east to west orientation of the Pass, located high above the Fraser River and Clear Creek valleys, attracts a deep snowpack benefiting from both northwest flow and upslope storms. In just over an hour drive from Denver, backcountry skiers have access to numerous trailheads leading into the high basins surrounding the Pass. From pre-work dawn patrols, to car shuttling, to all day epics, Berthoud Pass has an adventure for backcountry riders of all skill levels. The glade skiing, deep powder bowls, and steep couloirs of Berthoud Pass have enough terrain to keep you busy for a lifetime. This guidebook is here to assist you with your Berthoud Pass adventure, and it contains insights into over 100 routes. It is easy to use, small enough to carry, and durable enough to withstand food and beer stains from post riding barbeques at the Pass.

In Precarious Prescriptions, Laurie B. Green, John Mckiernan-González, and Martin Summers bring together essays that place race, citizenship, and gender at the center of questions about health and disease. Exploring the interplay between disease as a biological phenomenon, illness as a subjective experience, and race as an ideological construct, this volume weaves together a complicated history to show the role that health and medicine have played throughout the past in defining the ideal citizen. By creating an intricate portrait of the close associations of race, medicine, and public health, Precarious Prescriptions helps us better understand the long and fraught history of health care in America.

Contributors: Jason E. Glenn, U of Texas Medical Branch at Galveston; Mark Allan Goldberg, U of Houston; Jean J. Kim; Gretchen Long, Williams College; Verónica Martínez-Matsuda, Cornell U; Lena McQuade-Salzfass, Sonoma State U; Natalia Molina, U of California, San Diego; Susan M. Reverby, Wellesley College; Jennifer Seltz, Western Washington U.

As a result of the incorporation of computer software into countless commercial and industrial products, the patentability of software has become a vital issue in intellectual property law. This indispensable book provides an overview on the current status of computer-implemented inventions in patent law across Europe and major jurisdictions worldwide. A hugely practical field research tool with guidance based on case law, it examines the major hurdles in each particular country and describes the best practice to be adopted. Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for computer-implemented inventions can be established in several countries without spending money unnecessarily on problematic examination proceedings, this book covers such issues and topics as the following: • claim categories for patent applications; • sufficient level of abstraction/breadth of the claimed invention; • fundamental terms of computing and terminological traps; • probability for patents dependent on software application areas; and • patents in core areas of computing. With separate chapters for the key countries, Germany, the United Kingdom, France, the United States, China, Korea, Japan, India, and the European Patent Office the legal situation for computer-implemented inventions in each country or region, this book includes guidance on prosecution under national law, analyses of relevant court decisions, practice checklists, and an outlook on future developments.. The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might be or might not be patentable in each jurisdiction. With this incomparable resource, patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications. This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law.

A totally accessible user's guide from the creator of a scientifically proven form of psychotherapy that has successfully treated millions of people worldwide. Whether we've experienced small setbacks or major traumas, we are all influenced by memories and experiences we may not remember or don't fully understand. Getting Past Your Past offers practical procedures that demystify the human condition and empower readers looking to achieve real change. Shapiro, the creator of EMDR (Eye Movement Desensitization and Reprocessing), explains how our personalities develop and why we become trapped into feeling, believing and acting in ways that don't serve us. Through detailed examples and exercises readers will learn to understand themselves, and why the people in their lives act the way they do. Most importantly, readers will also learn techniques to improve their relationships, break through emotional barriers, overcome limitations

and excel in ways taught to Olympic athletes, successful executives and performers. An easy conversational style, humor and fascinating real life stories make it simple to understand the brain science, why we get stuck in various ways and what to do about it. Don't let yourself be run by unconscious and automatic reactions. Read the reviews below from award winners, researchers, academics and best selling authors to learn how to take control of your life.

Ira Aten was the epitome of a frontier lawman. He enrolled in Company D of the Texas Rangers during the transition from Indian fighters to peace officers. The years Ira spent as a Ranger were packed with adventure, border troubles, shoot-outs, major crimes, and manhunts. Aten's role in these events earned him a spot in the Ranger Hall of Fame.

In *Fevered Measures*, John Mckiernan-González examines public health campaigns along the Texas-Mexico border between 1848 and 1900, the changing medical and political frameworks U.S. health authorities used when facing the threat of epidemic disease. The medical border these officials changed with each contagion and sometimes varied from the existing national borders. Federal officers sought to distinguish Mexican citizens from U.S. citizens, a process troubled by the deeply interconnected nature of border communities. Mckiernan-González uncovers ignored cases in which Mexicans, Mexican Americans, African Americans, and other groups were subject to—and sometimes agents of—inspections, detentions, and forced-treatment regimens. These cases illustrate the ways that medical encounters shaped border identity in the Mexican Revolution. Mckiernan-González also maintains that the threat of disease provided a venue to destabilize identity at the border, processes of racialization, and re-legitimized the power of U.S. policymakers. He demonstrates how this complex history continues to shape contemporary perceptions of the Latino body today.

Understanding Assessment in Education and Training

RESEARCH, PLAN, DELIVER AND EVALUATE YOUR MICRO-TEACH LIKE A SEASONED PROFESSIONAL. THIS TEXTBOOK WILL HELP YOU TO PASS YOUR MICRO-TEACH FIRST TIME AND TO PREPARE YOUR MICRO-TEACH FOR TEACHING-RELATED JOB INTERVIEWS. Micro-teaching is an essential element of the Award in Education and Training (AET), forming part of the unit entitled: Understanding and Using Inclusive Teaching and Learning Approaches in Education and Training. The topic is often covered as a short chapter in most textbooks and stops short of providing a step-by-step practical guide or providing useful guidance for preparing for teaching-related interviews, where a micro-teach session is virtually guaranteed as part of the interview and selection process. An effective micro-teach is well researched, takes account of the audience's prior learning, knowledge and experience wherever possible, is meticulously planned, effectively practiced and delivered with confidence. It is then thoroughly evaluated and improvements and enhancements are carefully planned and executed before a future micro-teach or a lesson is delivered. This can be viewed as a form of continuous quality improvement. This textbook is aligned to recent changes in the further education and skills sector and shows you how to use such changes to inform your micro-teach research, planning and delivery and in this respect be on par with if not ahead of other candidates at interview. This textbook can be used by itself or as a complementary publication to the following textbooks by the same author: Achieving your Award in Education and Training: The Comprehensive Course Companion Or Achieving your Award in Education and Training: The Comprehensive Course Companion (Special Edition) The principal benefits of this textbook to the reader are as follows: It is written by an experienced practitioner with extensive experience of educational management, delivery, consultancy, quality assurance and of recruiting, appointing and mentoring lecturers in the public and private sectors; It adopts a very practical and systematic approach to the topic, reflecting current practice in the sector; It is clearly written and easy to understand, with lots of examples; It fully addresses each of the related unit learning outcomes and assessment criteria in a systematic way; It places the micro-teach in the context of all three units of the AET course and shows the inter-connections between certain assessment criteria, which will provide you with a more holistic view of the course; It is written for those undertaking a micro-teach as part of their course and for those preparing for a lecturing, teaching or training post; It shows you how to take account of relevant parts of the documents listed below when researching, planning and delivering your micro-teach: Professional Standards for Teachers and Trainers in Education and Training – England Special educational needs and disability (SEND) code of practice 0 to 25 years Ofsted Common Inspection Framework and related inspectors' handbook (for inspections from September 2015) Full lesson planning is also considered in the textbook, with the micro-teach session embedded in the full lesson plan for the purposes of completeness. This should prove to be particularly useful for teaching related job interviews This textbook is streamlined, thereby allowing you to make more efficient use of your time to learn, practice and develop your micro-teaching skills.

The American Educational History Journal is a peer-reviewed, national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines. The editors of AEHJ encourage communication between scholars from numerous disciplines, nationalities, institutions, and backgrounds. Authors come from a variety of disciplines including political science, curriculum, history, philosophy, teacher education, and educational leadership. Acceptance for publication in AEHJ requires that each author present a well articulated argument that deals substantively with questions of educational history. AEHJ accepts original papers of two types. The first consists of papers that are presented each year at our annual meeting. The second type consists of general submission papers received throughout the year. General submission papers may be submitted at any time. They will not, however, undergo the review process until January when papers presented at the annual conference are also due for review and potential publication. For more information about the Organization of Educational Historians (OEH) and its annual conference, visit the OEH web site at: www.edhistorians.org.

Urolithiasis is a common and ever-increasing problem all over the world. During the last few decades, percutaneous nephrolithotomy (PCNL) has become the preferred treatment method for moderate and large volume upper tract urinary calculi. In recent years, there have been groundbreaking advances in the field of percutaneous renal surgery in the form of minimally invasive percutaneous nephrolithotomy. Various techniques have been described over the years in the area, which have improved the results of percutaneous nephrolithotomy surgery while reducing the complication rate and morbidity. This book provides a broad, state-of-the-art review in the field of minimally-invasive percutaneous nephrolithotomy. It serves as a valuable resource for Urologists, endourology fellows, and researchers interested in mini-percutaneous nephrolithotomy. The book reviews the latest data about percutaneous management of Urolithiasis from the world over, various classification systems for mini-percutaneous nephrolithotomy, armamentarium, different techniques, and multiple advances, plus the results including complications. This book serves as a valuable resource for urologists dealing with and interested in learning the newer advances in percutaneous renal surgery. It delivers a comprehensive summary of the current status of minimally-invasive percutaneous nephrolithotomy in the management of Urolithiasis. All the chapters have been written by experts in minimally invasive percutaneous nephrolithotomy and present the most recent scientific data.
