

## Principles Of Contract Law 4 E Principles Of Law

Written with the busy practitioner in mind, this concise and insightful book sets out the principles that guide the courts in interpreting contracts. Each principle is covered in its own dedicated chapter, supported by case law which illustrates how the principle works in practice and in its wider context. In addition to interpretation of contracts, the book also considers the implication of terms, rectification, and estoppel by convention. This new edition considers the implications of key decisions of the Supreme Court in *Arnold v Britton* and *Marks & Spencer v BNP Paribas*, and *BNY Mellon v LBG Capital*. Other writing, including from judges writing extra-judicially, is also analysed. This book provides an invaluable reference for lawyers drafting, interpreting and litigating on contracts.

The Principles of Law aims to provide the law student with texts on the major areas within the law syllabus. Each text is designed to identify and expound upon the content of the syllabus in a logical order, citing the main and up-to-date authorities. This work covers contract law.

Legal thinkers typically justify contract law on the basis of economics or promissory morality. But Peter Benson takes another approach. He argues that contract is best explained as a transfer of rights governed by a conception of justice. The result is a comprehensive theory of contract law congruent with Rawlsian liberalism.

Principles of Contract Law, 5th Editionremains Australias premier text for students of contract law. The new edition has been significantly revised in light of recent developments. Paterson, Robertson & Duke at University of Melbourne.

The Principles of European Contract Law (Part III) and Dutch Law

A Commentary II

*This is the third edition of the widely acclaimed and successful casebook on contract in the lus Commune series, developed to be used throughout Europe and beyond by anyone who teaches, learns or practises law with a comparative or European perspective. The book contains leading cases, legislation and other materials from English, French and German law as the main representatives of the legal traditions within Europe, as well as EU legislation and case law and extracts from the Principles of European Contract Law. Comparisons are also made to other international restatements such as the Vienna Sales Convention, the UNIDROIT Principles of International Commercial Contracts, the Draft Common Frame of Reference and so on. Materials are chosen and ordered so as to foster comparative study, complemented with annotations and comparative overviews prepared by a multinational team. The third edition includes many new developments at the EU level (including the ill-fated proposal for a Common European Sales Law and further developments linked to the digital single market) and in national laws, in particular the major reform of the French Code civil in 2016 and 2018, the UK's Consumer Rights Act 2015 and new cases. The principal subjects covered in this book include: An overview of EU legislation and of soft law principles, and their interrelation with national law The distinctions between contract and property, tort and restitution Formation and pre-contractual liability Validity, including duties of disclosure Interpretation and contents; performance and non-performance Remedies Supervening events Third parties.*

*This book will provide readers with a clear understanding of the basic principles focusing on a study of the relevant case and statute law.*

*Studies in the Contract Laws of Asia provides an authoritative account of the contract law regimes of selected Asian jurisdictions, including the major centres of commerce where until now, limited critical commentaries have been available in the English language. In this new six part series of scholarly essays from leading scholars and commentators, each volume will offer an insider's perspective into specific areas of contract law, including: remedies, formation, parties, contents, vitiating factors, change of circumstances, illegality, and public policy, and will explore how these diverse jurisdictions address common problems encountered in contractual disputes. Concluding each volume will be a closing discussion of the convergences and divergences throughout eachacross the jurisdictions, and comparisons with European jurisdictions from which Asians well as an overview of the common themes found throughout each jurisdiction .contract law derive. Volume I of this series examines the remedies for breach of contract in the laws of China, India, Japan, Korea, Taiwan, Singapore, Malaysia, Hong Kong, Korea, and Thailand. Specifically, it addresses the readiness of each legal system in their action to insist that parties perform their obligations; the methods of enforcing the parties' agreed remedies for breach; and the ways in which monetary compensation are awarded. Each jurisdiction is discussed over two chapters; the first chapter will examine the performance remedies and agreed remedies, while the second explores the monetary remedies. A concluding chapter offers a comparative overview.*

*This book brings together the papers presented at the Society of European Contract Law's 13th annual conferece. It discusses the effect of constitutional principles, common principles to the laws of the EU Member States, and whether common principles can be transformed into rules. The Society of European Contract Law (SECOLA) promotes the development and understanding of European contract law, including its economic, sociological, and intellectual historic relation in theory and in practice. Further, SECOLA provides an international platform for the discussion of developing and proposed contract law in Europe. In this spirit, the series European Contract Law and Theory combines dogmatic thinking in comparative and EU law with strong social theory considerations, and makes publicly available the results of the discussions of leading scholars and practitioner. **Agency**

This book is the product of a unique collaboration between Mainland Chinese scholars and scholars from the civil, common, and mixed jurisdiction legal traditions. It begins by placing the current Chinese contract law (CCL) in the context of an evolutionary process

accelerated during China's transition to a market economy. It is structured around the core areas of contract law, anticipatory repudiation (common law) and defense of security (German law); and remedies and damages, with a focus on the availability of specific performance

in Chinese law. The book also offers a useful comparison between the CCL and the UNIDROIT Principles of International Commercial Contracts, as well as the Convention on Contracts for the International Sale of Goods. The analysis in the book is undertaken at two levels -

practical application of the CCL and scholarly commentary.

Foundational Principles of Contract Law not only sets out the principles and rules of contract law, it places more emphasis on what the principles and rules of contract law should be, based on policy, morality, and experience. A major premise of the book is that the best

way to grasp contract law is to understand it from a critical perspective as an organic, dynamic subject. When contract law is approached in this way it is much easier to grasp and learn than when it is presented simply as a static collection of principles and rules.

Professor Eisenberg covers almost all areas of contract law, including the enforceability of promises, remedies for breach of contract, problems of assent, form contracts, the effect of mistake and changed circumstances, interpretation, and problems of performance.

Although the emphasis of the book is on the principles and rules of contract law, it also covers important theories in contract law, such as the theory of efficient breach, the theory of overreliance, the normative theory of contracts, formalism, and theories of contract

interpretation.

In this volume, the Study Group and the Acquis Group present the first academic Draft of a Common Frame of Reference (DCFR). The Draft is based in part on a revised version of the Principles of European Contract Law (PECL) and contains Principles, Definitions and Model

Rules of European Private Law in an interim outline edition. It covers the books on contracts and other juridical acts, obligations and corresponding rights, certain specific contracts, and non-contractual obligations. One purpose of the text is to provide material for a

possible "political" Common Frame of Reference (CFR) which was called for by the European Commission's Action Plan on a More Coherent European Contract Law of January 2003.

The law of contracts permeates most, if not all, other subjects of legal education. The third edition of Principles of Contract Law surveys the fundamental legal principles underlying the law of contracts, addressing such customary topics as contract formation, defenses

and other doctrines of avoidance, breach and performance, remedies, as well as such other collateral but related topics involving third-party beneficiaries, assignments and delegations. The text addresses the traditional common law principles governing contracts, and yet

is accompanied by a steadied discussion of relevant commercial law principles pertaining to the sale of goods under Article 2 of the Uniform Commercial Code. When able to do so, the authors remained loyal to their commitment to utilize time-honored, classic common law

cases in their presentment of the subject matter. While this textbook adopts a classical approach to the study of contracts, it is also provides a relevant and robust experience for the aspiring law student. About the Authors: Kevin S. Marshall is Professor of Law at the

University of La Verne College of Law, Ontario California where he teaches Contracts, Antitrust, Corporate Finance and Governance and Law & Economics. Professor Marshall also serves as Lecturer at the University of La Verne College of Business and Public Administration

where he teaches graduate courses in finance, economics and quantitative methods. Professor Marshall joined the La Verne Law faculty in 2004, after having practiced law for approximately twenty years in Dallas, Texas. Professor Marshall received his J.D. from Emory

University School of Law and his M.P.A. and his PH.D. in Political Economy from the University of Texas. Professor Marshall also serves as both a testifying and consulting economic expert with respect to economic damages in Robinson-Patman, antitrust, breach of contract,

class-action fairness hearings, wrongful termination, employment discrimination, personal injury, and wrongful death cases. Professor Marshall has published and presented numerous books and articles involving the interdisciplinary workings of law and economics. Juanda

Lowder Daniel currently serves as University Counsel to California State University. Professor Daniel formerly taught at the University of La Verne College of Law at the rank of Full Professor teaching Contracts, Contract Drafting and Sales. Professor Daniel received her

J.D. from Emory University School of Law. Professor Daniel joined the La Verne Law faculty in 2001, bringing with her a wealth of practice experience and moot court familiarity. Professor Daniel also spent four years as deputy city attorney for the City of Riverside,

California, and several years in private practice. She is a member of the state bars of California, Michigan, Illinois, Washington, and Minnesota and is admitted to the United States District Court, Central District of California. Professor Daniel has published and

presented numerous articles on various aspects of the law of Contracts and Sales.

Contract as Promise

Anson's Law of Contract

International Construction Contract Law

Business Law I Essentials

Contract Law

Principles of European Insurance Contract Law

*This casebook focuses on the rules and principles of contract law, as well as the lawyer's role in planning and drafting contracts. Chapter One traces a contract case from the agreement stage, to a breakdown in the parties' relationship, to a lawsuit, to a decision in the trial court, and finally to the appellate court's opinion. It includes supporting material, including the parties' agreement, a correspondence from the lawyer to the client, the complaint, a motion to dismiss, the answer, the trial judge's charge to the jury, the special verdict form, the trial judge's decision on motions after the verdict, and the appellate court opinion. These materials help students understand where cases come from and lawyers' various roles, including planning, negotiating, counseling, drafting, as well as litigating.*

*Following the introduction, this casebook presents extensive material on the theory and practice of transactional planning and drafting, as well as additional materials from lawyers involved in the cases. The seventh edition offers comprehensive coverage of contract law theories of obligation, including bargain, promissory estoppel, unjust enrichment, and tort arising in the contract setting. This edition includes new cases and secondary sources on developing issues of contract law. In particular, the casebook introduces several new readings on the psychology underlying contractual obligation. The casebook highlights new approaches to the problem of assent over the internet, to the battle-of-the-forms, and to consideration. The casebook retains its strength in traditional subjects such as good faith, parol evidence, gap filling, conditional obligation, and breach, but the Seventh Edition contains fewer pages than earlier editions and is suitable for a 4, 5 or 6 hour course. Another goal of the new edition is to present interesting and enjoyable materials. It includes, among other things, cartoons, notes on unusual cases, and cases and problems involving public figures such as the Beatles, Elvis Presley, Aretha Franklin, and Michael Jordan. The Seventh Edition even highlights (through a squib case) the relationship of contract law to*

*epic of Gilgamesh, Woody Guthrie, the Declaration of Independence, Noah and The Great Flood, Game of Thrones, Star Wars Episode V: The Empire Strikes Back, Star Trek, President Obama, and Euclid's proof of the Infinity of Primes, among other references.*

*This edition provides an authoritative and detailed account of contract law. It is essential reading for any student of contract law, and a valuable source of reference for practitioners and academics.*

*This book chronicles how contract cases from the construction industry have influenced, solidified, refined and particularized U.S. contract law. The book's central claim is that the construction industry experience has helped to contextualize U.S. contract law and, therefore, has encouraged the common law to be more receptive to flexible legal standards and practices and less constrained by the relatively rigid rules that often characterize contract law. Other scholarly books analyze the themes, values, standards, and principles of*

*contemporary contract law, but none captures how construction industry relationships and practices have influenced the common law of contracts. After providing an overview of construction law as a specialty of the practicing bar and as a field for scholarly inquiry, this book examines the construction industry cases that have most directly influenced contract law. It reviews how industry dispute patterns have caused courts to refine contract law principles or to adapt and modify other principles. Separate chapters explain the special roles that cases in the U.S. Supreme Court and in the lower federal courts have played in defining and distinguishing contract law in the construction industry. The final chapters assess implications the construction industry cases hold for contract theory writ large, and for the future of contract law. This book is essential reading for legal scholars, construction law and contract law specialists, and those interested in how the construction industry has helped shape the U.S. legal system.*

*This compact casebook is designed for one-semester contracts classes. It helps students synthesize groups of related cases by focusing attention on the principles, policies, and rules of contract law. It employs many transitions and notes written for the students, rather than excerpting works written for professors or practitioners. Questions are limited to central issues to avoid overwhelming and losing the students. This revision is a thorough makeover that brings everything up to date, and includes a variety of recent cases, dealing with issues such as electronic communications and Internet contracting, while retaining the brevity and "principles approach" of earlier editions.*

**A less-expensive grayscale paperback version is available. Search for ISBN 9781680923018. Business Law I Essentials is a brief introductory textbook designed to meet the scope and sequence requirements of courses on Business Law or the Legal Environment of Business. The concepts are presented in a streamlined manner, and cover the key concepts necessary to establish a strong foundation in the subject. The textbook follows a traditional approach to the study of business law. Each chapter contains learning objectives, explanatory narrative and concepts, references for further reading, and end-of-chapter questions. Business Law I Essentials may need to be supplemented with additional content, cases, or related materials, and is offered as a foundational resource that focuses on the baseline concepts, issues, and approaches.**

**The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review**

**those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. The Principles of European Contract Law, prepared by the so-called Lando Commission, today constitute the most advanced project on the harmonisation of European private law. As well as providing a set of rules which could facilitate cross-border trade within Europe, the Principles can be seen as a modern lex mercatoria which, for example, could be referred to by arbitrators deciding a case according to internationally accepted principles of law. Furthermore, the Principles provide a framework for EU legislation on contract law and, more importantly, they can be viewed as a first step towards a European Civil Code. They may also prove to be a catalyst for the development of national legislation, judicial decisions and legal doctrine. This new title, which follows the first volume covering Parts I and II of the Principles, includes chapters on plurality of parties, assignment of claims, transfer of contract, set-off, prescription, illegality and conditions. It provides a systematic overview of the Principles in comparison with Dutch law, which will be of interest not only in the Netherlands but also to lawyers in other countries who need to gain a clearer understanding of the Dutch contract law system.**

**The Unidroit Principles of International Contract Law, first published in 1994, have met with extraordinary success in the legal and business community worldwide. Prepared by a group of eminent experts from all major legal systems of the world, they provide a comprehensive set of rules for international commercial contracts. This new edition of An International Restatement of Contract Law is the first comprehensive introduction to the Unidroit Principles 2004. In addition, it provides an extensive survey and analysis of the actual use of the Unidroit Principles in practice with special emphasis on the different ways in which they have been interpreted and applied by the courts and arbitral tribunals in the hundred or so cases reported worldwide. The book also contains the full text of the Preamble and the 180 articles of the Unidroit Principles 2004 in Chinese, English, French, German, Italian and Russian as well as the 1994 edition in Spanish.**

The updated second edition of the practical guide to international construction contract law The revised second edition of International Construction Contract Law is a comprehensive book that offers an understanding of the legal and managerial aspects of large international construction projects. This practical resource presents an introduction to the global construction industry, reviews the of construction projects and examines the common risks inherent in construction projects. The author — an expert in international construction contracts — puts the focus on FIDIC standard forms and describes their use within various legal systems. This important text contains also a comparison of other common standard forms such as NEC, AIA and VOB, and explains how they are used in a context. The revised edition of International Construction Contract Law offers additional vignettes on current subjects written by international panel of numerous contributors. Designed to be an accessible resource, the book includes a basic dictionary of construction contract terminology, many sample letters for Claim Management and a wealth of examples and case studies that offer helpful for construction practitioners. The second edition of the text includes: • Updated material in terms of new FIDIC and NEC Forms published in 2017 • Many additional vignettes that clearly exemplify the concepts presented within the text • Information that is appropriate for a global market, rather than oriented to any particular legal system • The essential tools that were highlighted the first ed such as sample letters, dictionary and more • A practical approach to the principles of International Construction Contract Law and construction contract management. Does not get bogged down with detailed legal jargon Written for consulting engineers, lawyers, clients, developers, contractors and construction managers worldwide, the second edition of International Construction Contract Law offers an essential guide to the legal and managerial aspects of large international construction projects.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Japan covers every aspect of the subject – definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted torts, quasi-contracts, and property is followed by a discussion of the concepts of ‘consideration’ or ‘cause’ and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of ‘relative effect’, termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Japan will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.

Provides a fresh, topical and accessible account of the Australian law of contract.

Now in its 13th edition, Jill Poole's immensely popular Textbook on Contract Law has been guiding students through contract law for over 20 years. Poole's case focus and clear writing style make this text a favourite with students and lecturers alike. The law of contract is placed within its commercial context, and students are provided with a detailed yet accessible treatment of all the key areas of contract law.Key features:• Each chapter begins with a summary of key issues, providing an overview of central themes and points of law, and concludes with suggestions for further reading, guiding students towards the most relevant texts and articles• Key points, illustrative examples and questions encourage a deeper understanding of the central facts and issues• Headings, case summaries and case extract boxes allow for easy navigation through the textOnline Resource Centre:This text is fully supported by an Online Resource Centre which provides:• 300 multiple choice questions with answers and feedback• Self-test questions and answers linked with Casebook on Contract Law• Guidance on answering problem questions in contract law• An opportunity for students to ask the author any questions

McMeel on the Construction of Contracts

Constitutional and Administrative Law, 4/e Constitutional and Administrative Law provides interesting and inquiring treatment of this wide-ranging and dynamic subject. Taking account of the various political, social and cultural factors that have shaped the law in this area, it has been fully updated with commentary on important recent developments. Law of Contract, 8/e Law of Contract provides a clear and engaging explanation of the main principles of contract law. This book guides students through each topic, explaining how the law currently operates but also considering debate on reform to provide an understanding of how the law may develop. The Longman Dictionary of Law, 7/e For over 25 years Longman Dictionary of Law has been the authority the legal community turns to for full and accurate definitions. It provides students and practitioners with essential information relating to the study and practice of law.

Contract as Promise is a study of the philosophical foundations of contract law in which Professor Fried effectively answers some of the most common assumptions about contract law and strongly proposes a moral basis for it while defending the classical theory of contract. This book provides two purposes regarding the complex legal institution of the contract. The first is the theoretical purpose to demonstrate how contract law can be traced to and is determined by a small number of basic moral principles. At the theory level the author shows that contract law does have an underlying, and unifying structure. The second is a pedagogic purpose to provide for students the underlying structure of contract law. At this level of doctrinal exposition the author shows that structure can be referred to moral principles. Together the two purposes support each other in an effective and comprehensive study of contract law. This second edition retains the original text, and includes a new Preface. It also includes a substantial new essay entitled Contract as Promise in the Light of Subsequent Scholarship--Especially Law and Economics which serves as a retrospective of the work accomplished in the last thirty years, while responding to present and future work in the field.

Declared dead some twenty-five years ago, the idea of freedom of contract has enjoyed a remarkable intellectual revival. In The Fall and Rise of Freedom of Contract leading scholars in the fields of contract law and law-and-economics analyze the new interest in bargaining freedom. The 1970s was a decade of regulatory triumphalism in North America, marked by a surge in consumer, securities, and environmental regulation. Legal scholars predicted the “death of contract” and its replacement by regulation and reliance-based theories of liability. Instead, we have witnessed the reemergence of free bargaining norms. This revival can be attributed to the rise of law-and-economics, which laid bare the intellectual failure of anticontractarian theories. Scholars in this school note that consumers are not as helpless as they have been made out to be, and that intrusive legal rules meant ostensibly to help them often leave them worse off. Contract law principles have also been very robust in areas far afield from traditional contract law, and the essays in this volume consider how free bargaining rights might reasonably be extended in tort, property, land-use planning, bankruptcy, and divorce and family law. This book will be of particular interest to legal scholars and specialists in contract law. Economics and public policy planners will also be challenged by its novel arguments. Contributors. Gregory S. Alexander, Margaret F. Brinig, F. H. Buckley, Robert Cooter, Steven J. Eagle, Robert C. Ellickson, Richard A. Epstein, William A. Fischel, Michael Klausner, Bruce H. Kobayashi, Geoffrey P. Miller, Timothy J. Muris, Robert H. Nelson, Eric A. Posner, Robert K. Rasmussen, Larry E. Ribstein, Roberta Romano, Paul H. Rubin, Alan Schwartz, Elizabeth S. Scott, Robert E. Scott, Michael J. Trebilcock

Now in its third edition, this authoritative work on the construction of contracts is an invaluable resource for legal practitioners and academics seeking to understand the legal principles involved in contract interpretation as well as the current trends in the neighbouring topics of implied terms and rectification. The third edition continues its principle-by-principle coverage of the main elements of contractual construction with reference to recent case law. Recent major construction of contract cases are discussed, including the UK Supreme Court decisions of *Rainy Sky v Kookmin Bank* (2011), *Arnold v Britton* (2015), the *Lloyds Bank Bonds case* (2016), and *Wood v Capita Insurance Services* (2017). Guidance is provided on balancing text, context, common sense and commercial purpose. The discussion of the implication of terms reflects the sceptical treatment of *Belize Telecom* (2009) in the *Marks & Spencer case* (2015). The issue of rectification addressed in detail in the new edition, reflecting the law's state of flux in this area with cases such as *Daventry* (2011), *Cherry Tree v Landmain* (2012) and *Tartsinis v Navona* (2015). The role of good faith is discussed with reference to *Leggatt J in Yam Seng* (2014) and the Court of Appeal in *MSC Mediterranean Shipping v Cottonex* (2016). Agreed damages clauses are revisited in the light of the reining in of the penalty rule in *Cavendish v Makdessi* (2016). There is consideration of *Prime Sight v Lavarello* (2013) and the Privy Council's reflections on contractual estoppel. Providing practical guidance on how courts would interpret contractual terms with reference to recent commercial contract litigation, this is the essential reference work for all commercial and corporate lawyers, both litigators and those negotiating and drafting deals.

Legal Principles and Practical Applications for Paralegals

**1. Freedom of contract and protection of weaker parties. -- 2. Preparation and formation of the contract. -- 3. Performance and remedies. -- 4. Legal pluralism and international challenges. -- 5. National experience and supranational law.**

**This text provides a comprehensive guide to the principles of European contract law. They have been drawn up by an independent body of experts from each Member State of the EU, under a project supported by the European Commission and many other organizations. The principles are stated in the form of articles, with a detailed commentary explaining the purpose and operation of each article and its relation to the remainder. Each article also has extensive comparative notes surveying the national laws and other international provisions on the topic.**

**The Draft of a Common Frame of Reference (DCFR) is based in part on a revised version of the Principles of European Contract Law (PECL) and contains Principles, Definitions and Model Rules of European Private Law. A year ago, an interim outline edition of the Draft Common Frame of Reference (DCFR) was published by sellier. european law publishers (Germany). It covered the books on contracts and other juridical acts, obligations and corresponding rights, certain specific contracts, and non-contractual obligations. One purpose of the text was to provide material for a possible "political" Common Frame of Reference (CFR) which was called for by the European Commission's Action Plan on a More Coherent European Contract Law of January 2003. Now available for the first time is the final outline edition of the DCFR. This final outline edition covers major new topics and includes a revised and expanded list of definitions. This revision of the interim outline edition takes public discussion into account and also contains an additional section on the principles underlying the model rules. In late 2009, the six-volume full edition of the DCFR, including all comments and notes, will be published.**

**This new follow on work from An Outline of the Law of Agency provides a useful and accessible reminder of the principles of agency law for experienced practitioners as well as being of interest to students looking for an approachable text on this topic. This new works takes into account all recent changes and developments including coverage on the Commercial Agents (Council Directive) Regulations 1993 and focuses more specifically on particular classesof commercial agents, for instance those acting within the banking and finance sectors.**

In recent years there has been a revival of interest in the philosophical study of contract law. In 1981 Charles Fried claimed that contract law is based on the philosophy of promise and this has generated what is today known as 'the contract and promise debate'. Cutting to the heart of contemporary discussions, this volume brings together leading philosophers, legal theorists, and contract lawyers to debate the philosophical foundations of this area of law. Divided into two parts, the first explores general themes in the contract theory literature, including the philosophy of promising, the nature of contractual obligation, economic accounts of contract law, and the relationship between contract law and moral values such as personal autonomy and distributive justice. The second part uses these philosophical ideas to make progress in doctrinal debates, relating for example to contract interpretation, unfair terms, good faith, vitiating factors, and remedies. Together, the essays provide a picture of the current state of research in this revitalized area of law, and pave the way for future study and debate.

A student classic: clear, comprehensive, contextual. Jill Poole's immensely popular Textbook on Contract Law has been guiding students through contract law for over 20 years. This new edition has been updated with the latest key legal developments by Professor Robert Merkin and Dr Severine Saintier. The law of contract is placed within its commercial context, and students are provided with a detailed yet accessible treatment of all the key areas of contract law. Key features: - Each chapter begins with a summary of key issues, providing an overview of central themes and points of law, and concludes with suggestions for further reading, guiding students towards the most relevant texts and articles - Key points, illustrative examples and questions encourage a deeper understanding of the central facts and issues - Headings, case summaries and case extract boxes allow for easy navigation through the text Online resources: The study of contract law continues via the online resources, keeping you up to date and helping to consolidate your learning. - 300 multiple choice questions with answers and feedback - Self-test questions and answers - Guidance on answering problem questions in contract law - Updates on new legislation, cases, and other legal developments

Thomas and Ellis discuss the most troublesome contract clauses and present rules to construe them so as to avoid disputes that must be resolved in court.

Contracts for Paralegals: Legal Principles and Practical Applications engages students with a practical, applied approach. Using a clear and accessible writing style, Wendling makes a comprehensive presentation of contracts, rounded out by current exercises that motivate lively discussions. Students are encouraged to develop critical thinking, vocabulary, and analytical and writing skills through a variety of real-world exercises, portfolio creation, and team exercises. New to the Second Edition: “Cyber Contracts” feature familiarizes students with the latest blockchain technology in the application of “smart contracts” Updated cases provide students the opportunity to apply their knowledge of chapter topics through analysis of relevant cases Examples of new technology demonstrate the influence of social media on contract origination, performance, and evidence Professors and students will benefit from: An accessible style A variety of approaches that stimulate students A step-by-step chronology that walks students through all the phases of contract formation, performance, and breach Practical applications Portfolio creation

Textbook on Contract Law

Theory, Doctrine, and Practice

In this volume the Project Group "Restatement of European Insurance Contract Law" presents its Principles of European Insurance Contract Law ("PEICL"). These principles were submitted to the European Commission as a Draft Common Frame of Reference of European Insurance Contract Law ("DCFR Insurance"). The volume comprises the PEICL/DCFR Insurance as well as translations into Czech, Dutch, French, German, Greek, Hungarian, Italian, Polish, Portuguese, Slovak, Spanish and Swedish. A short introduction sets out the approach used by the Project Group, how the PEICL/DCFR Insurance relate to the overall Draft Common Frame of Reference, the participation of the Project Group in the CoPECL (Common Principles of European Contract Law) Network, as well as the general structure and characteristics of the PEICL/DCFR Insurance. The Project Group has also drafted the PEICL/DCFR Insurance as a model for an Optional Instrument of European Insurance Contract Law.
