By choosing a career based on what they want to do, students develop the ability to make informed decisions about their future, are more excited about learning, and are more motivated to stay in school. INVESTIGATING YOUR CAREER, 3E has been revised to include social networking, personal finance, blog activities, math and financial information, and additional coverage on the 16 Career Clusters. This text takes career exploration to a new level and is the perfect solution for states that now require/recommend a semester length middle school/junior high career course

before graduating students. Focusing education on the future, the U.S. Office of Education has grouped careers into 16 clusters based on similar job characteristics. Every chapter in INVESTIGATING YOUR CAREER, 3E includes detailed information on a career cluster allowing students to learn about the various career options available to them. If you didn't know how important your resume was before, permit me to enlighten you. It is your personal story, as well as the number one marketing tool in your possession. You are in fact, selling yourself through your resume. Whatever conclusion a hiring manager reaches after scanning through your resume is entirely up to you, he or she has simply gone through the information which you presented about yourself. And if that conclusion is that you aren't qualified for the job they are hiring for? Well, it all boils down to how poorly you have told your story. Statistics show that over 1000 people get to see a job post; out of which only 500 start the job application process and 300 complete it. Of that number, 75

are screened by the recruiter and only 25 end up being viewed by the hiring manager. Again, the number trickles down to 5 who are invited for an interview, 2 who are asked to come back for a final interview and the 1 person who finally gets that job! Want to know how to be that gold star boy/girl who gets the job? In this book, you'll come across 101 resume tips whose sole aims are to help you become the new hire. With the practical tips contained in this book, you can polish your resume to such a degree that it stands out from afar, telling your story so convincingly that you end up with the much coveted job or position.

In this second chronicle about Deborah, she faces an enemy whose sole purpose is to kill every human being in the universe. The location of the enemy's home planets is unknown. This enemy has unlimited ships and no concern about the high losses to their personnel. The initial evaluation is that the enemy may not even be human. They are given the name, Grays. A creature like the Grays seems rather harmless compared to what fiction shows you. The Grays went unchallenged only because they looked so weak and fragile. No one saw them as a serious threat. I can only think of the army ants on the march. No one takes an

ant seriously; however, an army of ants will devastate an area and kill every living creature. The Grays are the same type of threat to mankind. As the Grays are building up their fleets and personnel, Deborah desperately searches the known universe for additional personnel; in this search she even goes to primitive nations. The United States strips its military forces to provide as many personnel as possible. Despite this effort, there are still not enough personnel. Deborah's scientists are working around the clock to not only upgrade her weapons, but also provide her with new types of weapons. Ramah and the United States are making a maximum effort to prepare for the upcoming battle with the Grays. In this battle either the humans or the Grays will become extinct.
