conquest and the birth of the U.S. racial state. Race and Crime examines how race became a defining feature of the system and why mass incarceration emerged as a new racial management strategy. This book reviews the history of race and criminology and explores the impact of racist colonial legacies on the organization of criminal justice institutions. Using a macrostructural perspective, students will learn to contextualize issues of race, crime, and criminal justice. Topics include: How "coloniality" explains the practices that

Winner, CCCC Outstanding Book Award Until recently, American composition scholars have studied writing instruction mainly within the borders of their own nation, rarely considering English composition in the global context in which writing in English is increasingly taught. *Writing in the Devil's Tongue* challenges this anachronistic approach by examining the history of English composition instruction in an East Asian country. Author Xiaoye You offers scholars a chance to observe how a nation changed from

monolingual writing practices to bilingual writing instruction in a school setting. You makes extensive use of archival sources to help trace bilingual writing instruction in China back to 1862, when English was first taught in government schools. Treating the Chinese pursuit of modernity as the overarching theme, he explores how the entry of Anglo-American rhetoric and composition challenged and altered the traditional monolithic practice of teaching Chinese writing in the Confucian spirit. The author focuses on four aspects of this history: the Chinese negotiation with Anglo-American rhetoric, their search for

innovative approaches to instruction, students' situated use of English writing, and local scholarship in English composition. Unlike previous composition histories, which have tended to focus on institutional, disciplinary, and pedagogical issues, *Writing in the Devil's Tongue* brings students back to center stage by featuring several passages written by them in each chapter. These passages not only showcase rhetorical and linguistic features of their writings but also serve as representative anecdotes that reveal the complex ways in which students, responding to their situations, performed multivalent, intercultural discourses. addition, You moves out of the classroom and into the historical, cultural, and political contexts that shaped both Chinese writing and composing practices and the pedagogies that were adopted to teach English to Chinese in China. Teachers, students, and scholars reading this book will learn a great deal about the political and cultural impact that teaching English composition has had in China and about the ways in which Chinese writing and composition continues to be shaped by rich and diverse cultural traditions and political discourses. In showcasing the Chinese struggle with teaching and practicing bilingual

The retail industry globally is in the early stages of an era of profound, perhaps unprecedented, change. This book is intended to serve as a robust and practical guide to leaders of enterprises tasked with both understanding and delivering success in the new landscape of retailing. The

book firstly describes the major directions and drivers of change that define the new global landscape of retailing (Part 1). Accelerating technology change, the rise to prominence globally of internet enabled shoppers and the rapid emergence of entirely new retail enterprises and business models are combining to re-shape the very fundamentals of the retail industry. No longer are shops needed to be in the business of

retailing. No longer is choice for the shopper limited to the neighbourhood, town or even country in which they live. No longer is the act of retailing solely the preserve of traditional retail enterprises as internet-enabled businesses, technology, logistics, suppliers and financial services enterprises all seek direct relationships with the shopper. The new landscape of retailing is an unforgiving one. Success can be

achieved more quickly than has ever been possible before but failure is equally rapid. The opportunities in the new landscape of retailing are profound, but so too are the challenges. Part 2 of this book discusses the structures, skills and capabilities retail enterprises will need if they are to be successful in this new landscape and the skills and perspectives that will be required of the leaders of retail enterprises. Case

studies of innovative and successful enterprises are presented throughout the book to illustrate the themes discussed. Frameworks are presented to provide practical guidance for enterprise leaders to understand and contextualise the nature of change that is re-shaping retail landscapes globally. Clear guidance is given of the capabilities, skills and perspectives that will be needed at both an enterprise and a personal

This important text and reference for researchers and students in machine learning, game theory, statistics and information theory offers a comprehensive treatment of the problem of predicting individual sequences. Unlike standard statistical approaches to forecasting, prediction of individual sequences does not impose any probabilistic assumption on the data-generating

mechanism. Yet, prediction algorithms can be constructed that work well for all possible sequences, in the sense that their performance is always nearly as good as the best forecasting strategy in a given reference class. The central theme is the model of prediction using expert advice, a general framework within which many related problems can be cast and discussed. Repeated game playing, adaptive data compression, sequential investment in the stock market, sequential pattern analysis, and several other problems are viewed as instances of the experts' framework and
