'An ode, a love letter, and a paean to family tradition while also being a celebration of the longevity of the Rolex brand, this tome is encyclopedic and monumental in its scope.' - New York Journal of Books
For more than a century, Rolex has stood apart as the most legendary brand of watch in the world. Ever the record setter--the Daytona, belonging to actor Paul Newman, was auctioned by Phillips in New York in October 2017 for \$17.8 million--it comes as no surprise that Rolex is the most collected watch label in the world. Published to celebrate The Vintage Watch Company's 25th anniversary in 2020, the book contains a unique pictorial collection of vintage Rolex watches that have passed through the shop during the past 25 years. From early Rolex pocket watches to the world's first wristwatches, elegant in their simplicity yet revolutionary in their impact, to the very first Submariners, iconic Daytonas, and jewel-encrusted Crown collections, the mesmerizing archive of vintage timepieces charts the extraordinary rise of an extraordinary brand.

MB&F: the First Fifteen Years

"I've paged through stacks of books on the history of watches. . . . But I hadn't come across a book that actually moved me until I picked up A Man and His Watch. The volume is filled with heartfelt stories." —T: The New York Times Style Magazine
"There are a bunch of beautifully illustrated watch books out there, but A Man & His Watch by Matt Hranek is more than that. It speaks to the nature of watches as deeply personal items." —Gear Patrol, Coffee Table Books
Our Staff Can't Live Without Paul Newman wore his Rolex Daytona every single day for 35 years until his death in 2008. The iconic timepiece, probably the single most sought-after watch in the world, is now in the possession of his daughter Clea, who wears it every day in his memory. Franklin Roosevelt wore an elegant gold Tiffany watch, gifted to him by a friend on his birthday, to the famous Yalta Conference where he shook the hands of Joseph Stalin and Winston Churchill. JFK's Omega worn to his presidential inauguration, Ralph Lauren's watch purchased from Andy Warhol's personal collection, Sir Edmund Hillary's Rolex worn during the first-ever summit of Mt. Everest . . . these and many more compose the stories of the world's most coveted watches captured in A Man and His Watch.
Matthew Hranek, a watch collector and NYC men's style fixture, has traveled the world conducting firsthand interviews and diving into exclusive collections to gather the never-before-told stories of 76 watches, completed with stunning original photography of every single piece. Through these intimate accounts and Hranek's storytelling, the watches become more than just timepieces and status symbols; they represent historical moments, pioneering achievements, heirlooms, family mementos, gifts of affection, and lifelong friendships.

A novel about the thrilling voyage of a watch, a gold Rolex GMT Master, silent witness of drama, intrigue, death, adventure, love, tragedy. This incredible journey begins in Cuba, and from there it travels to Africa, South America, Europe, North America, Asia.

The brand with the crown is recognized worldwide as an invaluable sports implement and luxury product. In little more than one hundred years, it has become one of the most successful and innovative watch brands on the planet. Rolex manufactures more than a half a million wristwatches per year while maintaining an outstanding reputation and near-perfect quality. From the beginning, the sponsorship of statesmen, movie stars, and athletes has driven its success, but the company has expanded to include more than just the rich and famous. The Rolex Oyster became the first watch to defy the elements when, in 1927, Mercedes Gleitze wore one while she swam the English Channel. In 1933, the company patented the first automatic winding mechanism. Learn more about this history and read updated reports written about new Rolex ideas and performance tests featured in the German watch magazine Armbanduhren (Wristwatch) from the past 15 years.

The MB&F adventure starts in Geneva in 2005. After 15 years working for prestigious names in the world of fine watchmaking, Maximilian Büsser launched Maximilian Büsser & Friends (MB&F), the world's very first conceptual and artistic watchmaking laboratory. MBF reinterprets horological tradition into three-dimensional mechanical sculptures that tell time. From the launch of the first Horological Machine in 2007, followed by the Legacy Machine in 2011, to the most recent creations, MB&F's watches and clocks are genuine kinetic sculptures. Beyond a mere reasoned catalogue, MB&F: The First Fifteen Years invites the reader to dive into the process of creating and fabricating these incredible watches. Brimming with technical prowess, surrealist inspirations, and science fiction, this book is an invitation to discover the watchmaking of the future.

It was a heavy snow year in Breckenridge, Colorado—great for the ski resort, but extra work for Will Parker, working for his father, keeping the snow shoveled. The high point of his day happened when he caught a break in the clouds and was able to take pictures of sunspots for his science fair project, sharing the event with new friend Kelly Winslow. But what they saw on the face of the sun was the beginning of a solar storm powerful enough to disrupt the world and turn heavy snow into a catastrophe.

"Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowned collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET.

The history of Rolex is inextricably linked to its founder Hans Wilsdorf, who took the first steps in the world of Swiss watchmaking as he dreamed about a timepiece that could be worn around the wrist. This experimental research led Rolex to achieve its highest goals in both technological innovation and in the use of the finest materials alone. Its models have been photographed on the wrists of political leaders, sports champions, and film and fashion celebrities, transforming each rolex into a fully-fledged status symbol, a synonym of elegance and precision. Including essays with a historical and technical slant, in-depth descriptions of the most representative pieces and a brief glossary, the pages in this book sparkle with golden hands, diamond-studded dials and patent leather watchbands, illustrated in period photographs and macro-detail. The volume ends with a chapter dedicated to the most amazing auctions that saw the sale of the Geneva-based company's vintage watches.
