The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the

cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. Nickel and Dimed reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how

This book deals with a broad range of social issues facing Mexican-origin people in the United States. The studies presented in this volume are brought together by two main themes: (1) social inequalities-cultural, educational, and economic-endured by the Chicano/Mexicano community in the United States and (2) the community's efforts to eradicate the source of those inequalities. The second edition of *Chicanas and Chicanos in Contemporary Society* takes into consideration the most recent demographic changes affecting the Chicano/Mexicano people. With one-third of persons of Mexican descent under the age of fifteen, many of the challenges center on the current well-being of children and their future prospects. Unlike any other book in the market,

Two additional features set this book apart from other books. Second, it has contributions that analyze relations between Mexican immigrants and their coethnics born in the United States. The studies offered in this volume employ multiple theoretical perspectives and research methods. The studies invoke theories from social science disciplines such as sociology, anthropology, and psychology. Contributors use a variety of

A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example,

Why is the United States the only advanced capitalist country with no labor party? This question is one of the great enduring puzzles of American political development, and it lies at the heart of a fundamental debate about the nature of American society. Tackling this debate head-on, Robin Archer puts forward a new explanation for why there is no American labor party-an explanation that suggests that much of the conventional wisdom about "American exceptionalism" is untenable. Conventional explanations rely on comparison with Europe. Archer challenges these

explanations by comparing the United States with its most similar New World counterpart-Australia. This comparison is particularly revealing, not only because the United States and Australia share many fundamental historical, political, and social characteristics, but also because Australian unions established a labor party in the late nineteenth century, just when American unions, against a common backdrop of industrial defeat and depression, came closest to doing something similar. Archer examines each of the factors that could help explain the American outcome, and his systematic comparison yields unexpected

Biographical research may take a range of forms and may vary in its application and approach but has the unified and coherent aim to give 'voice' to individuals. The central concern of this collection is to assemble articles (from sociology, social psychology, education, health, criminology, social gerontology, epidemiology, management and organizational research) that illustrate the full range of debates, methods and techniques that can be combined under the heading 'biographical research'. Volume One: Biographical Research: Starting Points, Debates and Approaches explores the different biographical methods currently used while locating these within the history of social science methods. Volume Two:

An updated edition of a standard in its field that

remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics with an afterword from Hochschild that addresses how

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements-from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing-web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we

must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Things out of place tend to get lost; they become invisible and their proper places end to be filled by other things that ought not be there at all and therefore serve to mislead. Lareau considers listening to be the core element of interviewing and observation. A researcher must listen to people as she collects data, listen to feedback as she describes what she is learning, listen to the findings of others as they delve into the existing literature on topics, and listen to herself in order to sift and prioritize some aspects of the study over others. By listening in these different ways, researchers will discover connections, reconsider assumptions, catch mistakes, develop and assess new ideas, weigh priorities, ponder new directions, and undertake numerous adjustments—all of which will make their contributions clearer and more valuable.
