and Daniel were teenage sweethearts, but then Daniel left their sleepy village of Middlefern and his grandfather's veterinary practice behind for the bright lights of London. Now, fifteen years later, the prodigal grandson has returned to temporarily take over the village practice with a veterinary qualification and his dog, Sammy, in tow. Daniel is ready for rabbits with tummy aches, guinea pigs who've lost their squeak, plenty of cow complaints and a whole lot of memories – both good and bad. But is he ready to see Hannah again? Of course, a high-flying city vet like Daniel was never planning to stay in Middlefern for good – especially given his history with the place. But could another, even more important, vacancy convince him to change his mind?

What Saladino finds in his adventures are people with soul-deep relationships to their food. This is not the decadence or the preciousness we might associate with a word like "foodie," but a form of reverence . . . Enchanting." —Molly Young, The New York Times
Dan Saladino's Eating to Extinction is the prominent broadcaster's pathbreaking tour of the world's vanishing foods and his argument for why they matter now more than ever. Over the past several decades, globalization has homogenized what we eat, and done so ruthlessly. The numbers are stark: Of the roughly six thousand different plants

*once consumed by human beings, only nine remain major staples today. Just three of these—rice, wheat, and corn—now provide fifty percent of all our calories. Dig deeper and the trends are more worrisome still: The source of much of the world’s food—seeds—is mostly in the control of just four corporations. Ninety-five percent of milk consumed in the United States comes from a single breed of cow. Half of all the world’s cheese is made with bacteria or enzymes made by one company. And one in four beers drunk around the world is the product of one brewer. If it strikes you that everything is starting to taste the same wherever you are in the world, you’re by no means alone. This matters: when we lose diversity and foods become endangered, we not only risk the loss of traditional foodways, but also of flavors, smells, and textures that may never be experienced again. And the consolidation of our food has other steep costs, including a lack of resilience in the face of climate change, pests, and parasites. Our food monoculture is a threat to our health—and to the planet. In *Eating to Extinction*, the distinguished BBC food journalist Dan Saladino travels the world to experience and document our most at-risk foods before it’s too late. He tells the fascinating stories of the people who continue to cultivate, forage, hunt, cook, and consume what the rest of us have forgotten or didn’t even know existed. Take honey—not the familiar product sold in plastic bottles,*

but the wild honey gathered by the Hadza people of East Africa, whose diet consists of eight hundred different plants and animals and who communicate with birds in order to locate bees' nests. Or consider murnong—once the staple food of Aboriginal Australians, this small root vegetable with the sweet taste of coconut is undergoing a revival after nearly being driven to extinction. And in Sierra Leone, there are just a few surviving stenophylla trees, a plant species now considered crucial to the future of coffee. From an Indigenous American chef refining precolonial recipes to farmers tending Geechee red peas on the Sea Islands of Georgia, the individuals profiled in Eating to Extinction are essential guides to treasured foods that have endured in the face of rampant sameness and standardization. They also provide a roadmap to a food system that is healthier, more robust, and, above all, richer in flavor and meaning.

realism and adventure. This account of the seventeenth-century vagabond performer and trickster Tyll Ulenspiegel begins when hes a scrawny boy growing up in a quiet village. When his father, a miller with a secret interest in alchemy and magic, is found out by the church, Tyll is forced to flee with the bakers daughter, Nele. They find safety and companionship with a traveling performer, who teaches Tyll his trade. And so begins a journey of discovery and performance for Tyll, as he travels through a continent devastated by the Thirty Years War and encounters along the way a hangman, a fraudulent Jesuit scholar, and the exiled King Frederick and Queen Elizabeth of Bohemia. Tyll displays Kehlmanns remarkable narrative gifts and confirms the power of art in the face of the senseless brutality of history.

The land is for those who work it—"La tierra es de quien la trabaja." One hundred kilometers from Seville, there is a small village, Marinaleda, that for the last thirty years has been at the center of a long struggle to create a communist utopia. In a story reminiscent of the Asterix books, Dan Hancox explores the reality behind the community where no one has a mortgage, sport is played in the Che Guevara stadium and there are monthly "Red Sundays" where everyone works together to clean up the neighbourhood. In particular he tells the story of the village mayor, Sánchez Gordillo, who in 2012 became a household name in Spain after leading raids on local supermarkets to feed the Andalucian unemployed.

A call to action in an ongoing battle against industrial agriculture From the early twentieth century and across generations to the present, In the Struggle brings together the stories of eight politically engaged scholars, documenting their opposition to industrial-scale agribusiness in California.

As the narrative unfolds, their previously censored and suppressed research, together with personal accounts of intimidation and subterfuge, is introduced into the public arena for the first time. In the Struggle lays out historic, subterranean confrontations over water rights, labor organizing, and the corruption of democratic principles and public institutions. As California's rural economy increasingly consolidates into the hands of land barons and corporations, the scholars' work shifts from analyzing problems and formulating research methods to organizing resistance and building community power. Throughout their engagement, they face intense political blowback as powerful economic interests work to pollute and undermine scientific inquiry and the civic purposes of public universities. The findings and the pressure put upon the work of these scholars—Paul Taylor, Ernesto Galarza, and Isao Fujimoto among them—are a damning indictment of the greed and corruption that flourish under industrial-scale agriculture. After almost a century of empirical evidence and published research, a definitive finding becomes clear: land consolidation and economic monopoly are fundamentally detrimental to democracy and the well-being of rural

societies.

This popular technical paper is currently in its sixth reprinting (10/97). Many development projects require that people be involuntarily resettled to other locations to live and work. Governments need adequate policies to minimize the negative effects of this relocation both on the individuals involved and on the national economy. This report presents policy guidelines and procedures for World Bank-financed projects requiring involuntary resettlement. Designed for development specialists, social anthropologists, and sociologists, this volume discusses past Bank projects to illuminate the responsibilities of the governments and the needs of resettlers and host populations during resettlement. Among the topics addressed are types of involuntary resettlement; basic sociological principles in approaching resettlement; policy objectives and strategies; reconstruction of the resettlers' homes, production bases, and social organizations; and the effects of resettlement on the environment. Annexes to this report contain technical checklists for preparing and appraising resettlement plans in projects and for monitoring and evaluating resettlement. Michael M. Cernea has published and edited several books on

the sociological aspects of development. Among these books is Putting People First: Sociological Variables in Rural Development , which describes culturally sensitive approaches to the preparation, planning, and implementation of development projects. Other books include Social Organization and Development Anthropology; Social Assessments for Better Development: Case Studies in Russia and Central Asia ; and Urban Environment and Population Relocation . For readers of Behind the Beautiful Forevers and Nothing to Envy, this is a breathtaking real-life story of four street children in contemporary Zambia whose lives are drawn together and forever altered by the mysterious murder of a fellow street child. Based on years of investigative reporting and unprecedented fieldwork, Walking the Bowl immerses readers in the daily lives of four unforgettable characters: Lusabilo, a determined waste picker; Kapula, a burned-out brothel worker; Moonga, a former rock crusher turned beggar; and Timo, an ambitious gang leader. These children navigate the violent and poverty-stricken underworld of Lusaka, one of Africa's fastest growing cities. When the dead body of a ten-year-old boy is discovered under a heap of garbage in Lusaka's largest landfill,

a murder investigation quickly heats up due to the influence of the victim's mother and her far-reaching political connections. The children's lives become more closely intertwined as each child engages in a desperate bid for survival against forces they could never have imagined. Gripping and fast-paced, the book exposes the perilous aspects of street life through the eyes of the children who survive, endure and dream there, and what emerges is an ultimately hopeful story about human kindness and how one small good deed, passed on to others, can make a difference in the face of seemingly insurmountable odds.

The World's Rarest Foods and Why We Need to Save Them

Realism, the dominant theory of international relations, particularly regarding security, seems compelling in part because of its claim to embody so much of Western political thought from the ancient Greeks to the present. Its main challenger, liberalism, looks to Kant and nineteenth-century economists. Despite their many insights, neither realism nor

Download Ebook The Village Against World Dan Hancox

liberalism gives us adequate tools to grapple with security globalization, the liberal ascent, and the American role in their development. In reality, both realism and liberalism and their main insights were largely invented by republicans writing about republics. The main ideas of realism and liberalism are but fragments of republican security theory, whose primary claim is that security entails the simultaneous avoidance of the extremes of anarchy and hierarchy, and that the size of the space within which this is necessary has expanded due to technological change. In Daniel Deudney's reading, there is one main security tradition and its fragmentary descendants. This theory began in classical antiquity, and its pivotal early modern and Enlightenment culmination was the founding of the United States. Moving into the industrial and nuclear eras, this line of thinking becomes the basis for the claim that mutually restraining world government is now necessary for security and that political liberty cannot survive without new types of global unions. Unique in scope, depth, and timeliness, Bounding Power offers an international political theory for our fractious and perilous global village.

Daniel Miller spent 18 months undertaking an ethnographic study with the residents of an English village, tracking their use of the different social media platforms. Following his study, he argues that a focus on platforms such as Facebook, Twitter and Instagram does little to explain what we post on social media. Instead, the key to understanding how people in an English village use social media is to appreciate just how 'English' their usage has become. He introduces the 'Goldilocks Strategy': how villagers use social media to calibrate precise levels of interaction ensuring that each relationship is neither too cold nor too hot, but 'just right'.

The “haunting and fascinating” tale of a young boy’s harrowing odyssey from Africa to Sweden (Booklist). In the 1870s, Hans Bengler arrives in Cape Town from Småland, Sweden, driven by a singular desire: to discover an insect no one has seen before and name it after himself. But then he impulsively adopts a young San orphan boy whose parents have been killed by European colonists. Christening the boy Daniel, Hans brings him back to Sweden—a quite different specimen than he first contemplated. Daniel is told to call Bengler “Father,” and to knock on doors and bow. He continually struggles to understand this strange new land of mud and snow that surrounds and seemingly entraps him. At the same time, he is haunted by visions of his murdered parents calling him home to Africa. Knowing that the only way home is by sea, he decides he must learn to walk on water if he is ever to reclaim his true place in the world. Evocative and sometimes brutal, the novel follows Daniel through a series of tragedies and betrayals that culminate in a shocking act. Henning Mankell, a world-renowned “master of atmosphere,” offers this “quiet tragedy” with a ruthless elegance all his own (The Boston Globe). “Historical touches mingle with elements of magic realism to convey themes dear to the author’s heart.” —Los Angeles Times “An engrossing story, with a real sense of pace and adventure, illuminated by empathy with the bewilderment and longing of a clever, lonely child.” —The Independent “Mankell’s fierce instinct for social criticism is admirable.” —The New York Times Book Review “A writer with the imagination, brains, resources . . . [who] make[s] thoughtful, challenging, exciting, artistic novels.” —The Philadelphia Inquirer “Mankell is expert at depicting brutal scenes. He’s also adept at getting inside exotic heads like Daniel’s; this book’s greatest strength is imagination. Its second greatest is empathy.” —Pittsburgh Post-Gazette

One hundred kilometers from Seville lies the small village of Marinaleda, which for the last thirty-five years has been the center of a tireless struggle to create a living utopia. Today, Marinaleda is a place where the farms and the processing plants are collectively owned and provide work for everyone who wants it. As Spain's crisis becomes ever more desperate, Marinaleda also suffers from the international downturn. Can the village retain its utopian vision? Can the iconic mayor Sánchez Gordillo hold on to the dream against the depredations of the world beyond his village?

In The Broken Village, Daniel R. Reichman tells the story of a remote village in Honduras that transformed almost overnight from a sleepy coffee-growing community to a hotbed of undocumented migration to and from the United States. The small village—called here by the pseudonym La Quebrada—was once home to a thriving coffee economy. Recently, it has become dependent on migrants working in distant places like Long Island and South Dakota, who live in ways that most Honduran

townspeople struggle to comprehend or explain. Reichman explores how the new "migration economy" has upended cultural ideas of success and failure, family dynamics, and local politics. During his time in La Quebrada, Reichman focused on three different strategies for social reform—a fledgling coffee cooperative that sought to raise farmer incomes and establish principles of fairness and justice through consumer activism; religious campaigns for personal morality that were intended to counter the corrosive effects of migration; and local discourses about migrant "greed" that labeled migrants as the cause of social crisis, rather than its victims. All three phenomena had one common trait: They were settings in which people presented moral visions of social welfare in response to a perceived moment of crisis. The Broken Village integrates sacred and secular ideas of morality, legal and cultural notions of justice, to explore how different groups define social progress. Eating to Extinction

Mushroom Village Series: Volume I

This offering is Volume One in Joe Slade's Mushroom Village series. Enjoy following Dan Miller on his first official murder mystery as The Mushroom Village's only detective. Explored in this tale are questions of law in a lawless world with a backdrop of a village that is both open and set in its ways. The village, for those who don't already know, is set in a Michigan county which was given up on after a mega tornado tore it apart and was subsequently bought by private citizens. This mystery gives us a glimpse into how folks who come to a sacred place feel, and how the folks who live there feel about the visitors. Of course, the Evil Magician makes his presence known, as he is the president of the co-op. This mystery is maybe mostly about getting to know the funkiness of the village in the summer time. As Dan's family gets involved in the case the reader is shown a typical day in the life of village teenagers.

The genre of Britpop, with its assertion of Englishness, evolved at the same time that devolution was striking deep into the hegemonic claims of English culture to represent Britain. It is usually argued that Britpop, with its strident declarations of Englishness, was a response to the dominance of grunge. The contributors in this volume take a different point of view: that Britpop celebrated Englishness at a time when British culture, with its English hegemonic core, was being challenged and dismantled. It is now timely to look back on Britpop as a cultural phenomenon of the 1990s that can be set into the political context of its time, and into the cultural context of the last fifty years - a time of fundamental revision of what it means to be British and English.

A global future in the history of a single village After a decade away from her ancestral family village, during which she became a writer and literary scholar in Beijing, Liang Hong started visiting her rural hometown in landlocked Henan Province. What she found was an extended family riven by the seismic changes in Chinese society and a village turned inside out by emigration, neglect, and environmental despoliation. Combining family memoir, literary observation, and social commentary, Liang's by turns lyrically poetic and movingly raw investigation into the fate of her village became a bestselling book in China and brought her fame. For many months, Liang walked the roads and fields of her village, recording the stories of her relatives—especially her irascible, unforgettable father—and talking to everyone from high government officials to the lowest of village outcasts. Across China, many saw in Liang's riveting interviews with family members and childhood acquaintances a mirror of their own lives, and her observations about the way the greatest rural-to-urban migration of modern times has twisted the country resonated deeply. *China in One Village* tells the story of contemporary China through one clear-eyed, literary observer, one family, and one village.
