1968. Riga. News of the Prague Spring washes across Europe, causing ripples on either side of the Iron Curtain. A young Estonian woman has agreed to pose as a model for a famous sculptor, who is trying to evade military service and escape to the West. Although the model has only a vague awareness of politics – her interest in life is primarily poetic – the consequences of the politics of both past and present repeatedly make themselves felt. Chance remarks overheard prompt memories of people and places, language itself becomes fluid, by turns deceptive and reassuring. The Beauty of History is a novel of poetic intensity, of fleeting moods and captured moments. It is powerfully evocative of life within the Baltic States during the Soviet occupation, and of the challenge to artists to express their individuality whilst maintaining at least an outward show of loyalty to the dominant ideology. Written on the cusp of independence, as Estonia and Latvia sought to regain their sovereignty in 1991, this is a novel that can be seen as an historic document – wistful, unsettling, and beautiful... Viivi Luik is one of Estonia’s most highly-acclaimed and well-known writers. The Beauty of History has been published in eleven languages.

From Intervention to Social Change
Over the last two decades, the topic of forest ecosystem services has attracted the attention of researchers, land managers, and policy makers around the globe. The services rendered by forest ecosystems range from intrinsic to anthropocentric benefits that are typically grouped as provisioning, regulating, supporting, and cultural. The research efforts, assessments, and attempts to manage forest ecosystems for their sustained services are now widely published in scientific literature. This volume focuses on broad-scale aspects of forest ecosystem services, beyond individual stands to large landscapes. In doing so, it illustrates the conceptual and practical opportunities as well as challenges involved with planning for forest ecosystem services across landscapes, regions, and nations. The goal here is to broaden the scope of land use planning through the adoption of a landscape-scale approach. Even though this approach is complex and involves multiple ecological, social, cultural, economic, and political dimensions, the landscape perspective appears to offer the best opportunity for a sustained provision of forest ecosystem services.
A clear, practical framework for getting higher education back on track The Undergraduate Experience is a guide for significantly improving student learning and institutional performance in the rapidly changing world of higher education. Written by recognized experts in undergraduate education, this book encourages college and university leaders to rethink current practices that fragment the student experience, and to focus on creating powerful, integrated undergraduate learning for all students. Drawing from their own deep experience and the latest research, the authors reveal key principles that enable institutional change and enhance student outcomes in any higher education setting. Coverage includes high-impact practices for engagement, the importance of strategic leadership, the necessity of setting and maintaining high expectations, and insight on fostering excellence through systematic planning. Through its core themes and action principles, this book can be a valuable resource for faculty, staff, administrators, and governing boards at all types of postsecondary institutions. The book provides a practical framework for achieving excellence in undergraduate education by focusing on: Learning Relationships Expectations Alignment Improvement Leadership The value of an undergraduate education is under greater scrutiny than ever before, and campus leaders must be able to convey the value of their institutions to students, boards, donors, and legislators. Is a college or university degree worth the increasing cost? Are today's students academically adrift? What's the difference between a degree and an education? Responding to these questions requires focused action by individuals and institutions. The Undergraduate Experience offers practical guidance for creating and sustaining excellence in the face of disruption and change in higher education.

In a brief, clear and easily accessible way, this summary illustrates the dynamics of the obesity epidemic and its impact on public health throughout the WHO European Region, particularly in eastern countries. It describes how factors that increase the risk of obesity are shaped in different settings, such as the family, school, community and workplace. It makes both ethical and economic arguments for accelerating action against obesity, and analyses effective programs and policies in different government sectors, such as education, health, agriculture and trade, urban planning and transport. The summary also describes how to design policies and programs to prevent obesity and how to monitor progress, and calls for specific action by stakeholders: not only government sectors but also the private sector - including food manufacturers, advertisers and traders - and professional consumers' and international and intergovernmental organizations such as the European Union.

In a parallel or future Estonia, whose language has been outlawed and its native population deported after the invasion by the Russian Tsardom, Nikolai Vasilievich Gogol is resurrected, Christ-like, bringing phantasmagoric mayhem to the sleepy town of Viljandi. By the end of the story, four evangelists will have emerged from the novel's ragtag cast of Russian- speaking beatniks, bohemians, booksellers, blaggers, and Beatles- maniacs to write their subversive Gogol Gospels in the local insane asylum, despite efforts to thwart them on the part of the mysterious Murka, heroine of a criminal underworld ballad and agent of the Tsardom’s secret police. By turns exuberant, grotesque, erudite, oneiric, hilarious, mystical, psychedelic, and dystopian, Gogol’s Disco tells the parable of a small nation, whose gigantic neighbor quite literally consigns its literature to the latrine, only for it to rise from the dead in a literarily spectacular apocalypse in the best traditions of Bulgakov and magic realism.
